

UNIFIED

Estimating & Field Tracking

Winning bids is important – but maximizing profitability after you win is the real goal. That's why so many contractors combine B2W Estimate and B2W Track to:

- Bid faster and more accurately to win more jobs at better margins
- Export bid data seamlessly to the field tracking system, eliminating redundant data entry, errors and ambiguity
- Capture and analyze performance data daily – relative to the bid – to make better decisions and motivate crews
- Transfer information directly from the estimating and field tracking systems to the ERP/accounting system
- Use actual performance data to improve future bids

B2W ESTIMATE

Bid faster and more accurately
Standardize processes
Win more jobs at better margins

- Central database with up-to-date labor, tasks, materials and equipment costs
- Specialized functionality for creating bids from databases, templates and cost structures
- Easy to learn and deploy, with familiar, intuitive user interfaces and construction estimating logic
- Scalable, enterprise-class performance

B2W
TRACK

Streamline performance reporting
Analyze daily and adjust immediately
Manage jobs to profitability

- Easy, immediate capture and communication of field performance
- Faster and smarter, data-driven adjustments to field operations
- Advanced mobile tablet functionality including logs, timecards, electronic sign-off and dashboards
- Direct connectivity to accounting/ERP systems, eliminating errors and redundant data entry
