

SPEC SHEET

# Trimble Meka

SOFTWARE

Day-to-day operations for  
the supply chain

Trimble® Meka is a comprehensive software solution designed for saw mills, providing tools that cover the entire production value chain from sales contracts through warehouse management and production to goods delivery (order to cash).

# Trimble Meka

## Software

### Modules

MekaERP	MekaMRP	MekaMAP
Serves as the base supply chain management system and masterdata foundation. It provides end-to-end visibility and control from sales contracts through finished product delivery to customers.	Handles material resource planning and production planning.	Provides advanced warehouse and delivery management.

### Capabilities

MekaERP: Complete Supply Chain Management	MekaMRP: Production Planning and Optimization	MekaMAP: Graphical Warehouse Management
Highly flexible master data settings allowing customers to create their own product qualifications and adapt the system to specific operational needs	Comprehensive profitability analysis including raw material costs, production costs, and finished product values per production batch	Inventory management in drying kilns and ready package areas
Warehouse management and inventory control	Cost tracking and profitability calculations throughout the production chain	Visual warehouse maps with graphical representation
Sales documents and contract management	Better utilization of process data for batch-based monitoring	Live operational visibility for warehouse operations
Real-time operational data across all documents and operations	Harmonization of production planning across operations	Efficient forklift operations management
Invoicing and billing processes	Synchronization of sales and production activities	Real-time location tracking of packages

### Integrations

Meka offers robust integration with seamless interfaces from MekaERP to production systems through MekaProcess. It supports various data exchange formats and protocols and enables real-time data synchronization across connected systems.

### Available languages

English, Finnish, and Swedish
