

Accubid Anywhere

ADVANCED, CLOUD-HOSTED
ESTIMATING, AVAILABLE 24/7

One simple subscription does it all:

Estimating - Graphical Takeoff - Change Management -
Integrated Material Pricing - Collaboration - Analytics

trimble.com/en/products/trimble-accubid-anywhere

Focus on what you do best...
win work!

Trimble® Accubid® Anywhere is a comprehensive cloud-based estimating solution designed for electrical, ICT and industrial mechanical contractors available as an all-in-one, easy-to-manage subscription. With robust estimating functionality, integrated graphical takeoff, change management, pricing, submittal management, document management, collaboration, analytics and multi-user support, Accubid Anywhere does it all, and, because it's cloud-hosted, it's accessible anytime and anywhere.

“Very efficient way
of doing things.”

“With Accubid Anywhere we can have multiple estimators working on the same project at the same time and getting real updates live as they are doing takeoff. This is a huge feature. Very time saving, cost effective, efficient way of doing things and that has been one of the biggest drivers for us to move forward.”

Eric Dees, Sr. Estimator, CSI Electrical Contractors, Inc.

Bid more profitable work
in less time with the right
estimating solution

Accubid Anywhere helps you and your team create estimates faster and more accurately and supports your preconstruction workflows beyond the creation of the initial estimate. As a secure, cloud-hosted solution, Accubid Anywhere ensures IT issues are a thing of the past while continuous development means you and your estimating teams can be confident you're working with the most current features and functionality. Plus, your subscription is accessible from anywhere with Internet access, providing greater flexibility, whether at home, in the field or with a customer.

Maximized Profit

Real-time material, labor, and vendor pricing ensure bids are accurate and up-to-date, helping to protect and maximize profit margins.

Increased Accuracy

Pre-built assemblies, spec-driven takeoff, a live link to the graphical takeoff—and more—reduce the chances of costly errors to increase accuracy.

Efficient Collaboration

With multi-user and multi-branch support, Accubid Anywhere ensures your entire estimating team can access and work on an estimate at the same time, saving time and streamlining processes. Plus, the integration with Trimble Connect® lets you easily store and share project data for efficient and simplified coordination.

Faster Estimating

AI-powered takeoff, Auto Count, global items and spec-driven assemblies enable greater consistency, quicker decision making, shorter estimating times and easy modifications.

The Full Package

Estimating

Accubid Anywhere offers robust, spec-driven estimating functionality and supports seamless collaboration between departments both simultaneously and without restrictions. Powerful specification, assembly and item libraries hold key item material and attribute information so you only manage a few fields at the time of takeoff. Using intuitive and customizable takeoff pads, graphic shortcuts allow you to quickly select items and assemblies for takeoff.

Integrated Graphical Takeoff - Featuring AI Functionality

Speed up the estimating process and eliminate the cost of printed paper drawings. With AI-powered* takeoff functionality and patented Auto Count symbol recognition, LiveCount® on-screen takeoff solutions streamlines the quantification process and seamlessly integrates marked-up digital image files. The live, bi-directional link with Accubid ensures your estimate is always up to date for more accurate bids.

Change Management

Draw from your existing database of contract estimates to start new contract documents and use multiple pricing methods to accommodate list and net pricing, plus overhead and markups. Quickly produce customizable, professional-looking change-order reports for quick submission and approval.

Integrated Material, Pricing and Labor

Fully integrated pricing technology ensures up-to-date pricing for all of your projects. You have full access to Trimble's TRA-SER product and pricing data, Supplier Xchange for instant bid time price quotes from your favorite suppliers, and Submittal Manager to help you create submittal packages in half the time compared to conventional methods.

Document Management*

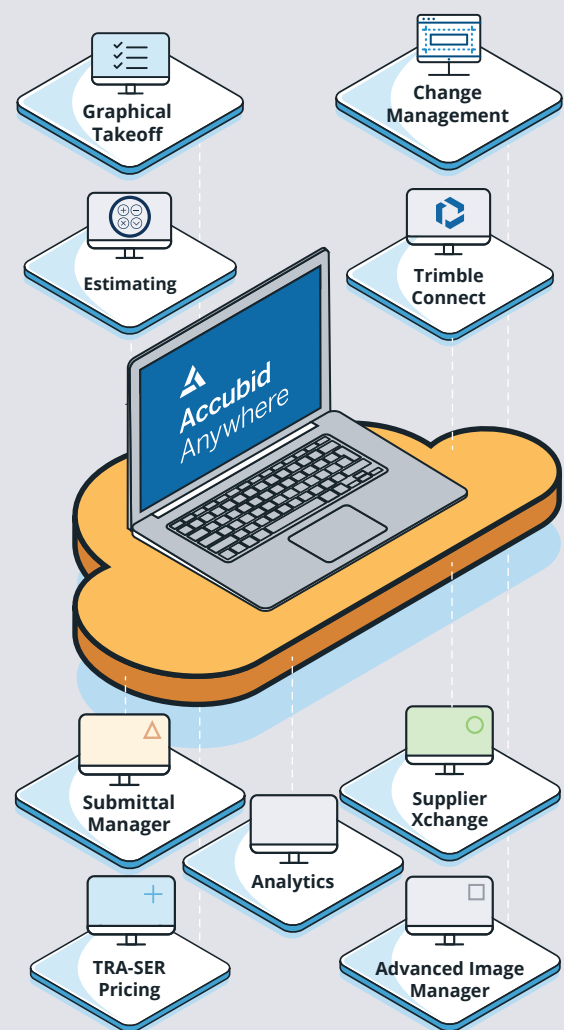

An easy-to-use, stand-alone document management tool, the Advanced Image Manager (AIM) works with most digital file formats, giving you the flexibility to view, organize, modify and manage documents according to your unique workflow needs.

Connected Workflows and Analytics*

Accubid Anywhere APIs allow your organization to unlock the full potential of estimation data by seamlessly integrating it into your workflows, streamline your processes and drive powerful data-driven insights. Additionally, Trimble Analytics dashboards allow you to visualize your estimation data into actionable insights.

Collaboration*

Trimble's open collaboration tool, Trimble Connect, facilitates sharing detailed project data to help connect workflows and simplify coordination amongst project stakeholders, enabling better decision-making and increasing productivity.

* LiveCount AI-powered takeoff functionality, AIM, Trimble Connect, APIs, and Trimble Analytics Dashboards are only available with the named user version of the Accubid Anywhere subscription.

Estimating With Confidence

Accubid Anywhere emulates the life cycle of a project, using logical business rules and centralized data to support consistent, efficient workflows and uniquely address an estimator's need for speed and accuracy. Updates to takeoffs can be viewed in real time in the bill of material and closeout screens without running a report. Additionally, data validation instantly identifies any issues or conflicts in a takeoff.

Dynamic assemblies save additional time at takeoff and maintain further consistency within your organization. Plus, Intelligent Assemblies and Specifications drastically reduce the required number of assemblies.

Once your bid has been awarded, you can break an estimate down into any structure to create a Schedule of Values, and take advantage of robust reporting capabilities to create professional reports that aggregate and analyze data from across the entire project. With the Enhanced ReportWriter, you can create custom reports with your company logo for Proposed Change Order Reports or other external-facing documents.

System Requirements

Processor

i7 or Higher Quad Core 2+ Ghz

RAM

8 GB (16 GB Recommended)

Storage

SSD 20+ GB Free Space

Graphics Card

512MB or higher

Operating System*

64-bit Windows® 11 Professional

Display**

1280 x 1024 resolution or higher
Windows Custom DPI Setting of
96 pixels, 4K Monitor Supported

Connectivity

Requires a reliable broadband
internet connection

25+ Mbps (~ 5 Mbps/user)

download speed

10+ Mbps (~ 1 Mbps/user)

upload speed

Certifications

ISO27001:2013

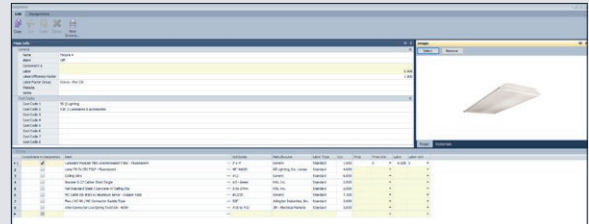

* We do not support Mac OS.

* We do not support Windows RT,
Windows 10s or Windows 10 Professional.

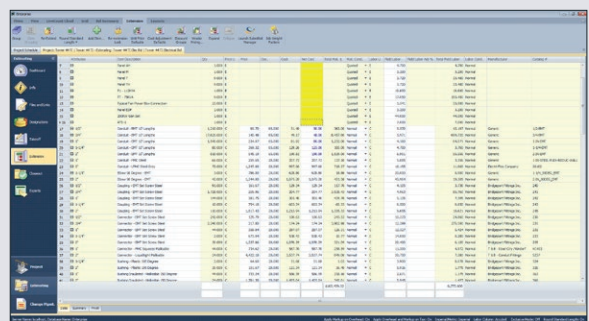

** Non standard resolutions (for example,
some laptops) are not supported.

Key Estimating Features

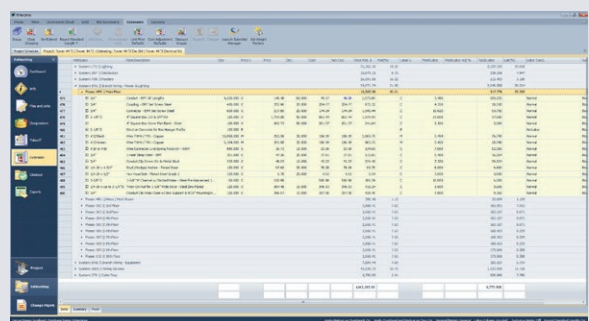

- Powerful specification-driven takeoff
- Intuitive and customizable takeoff pads
- Live bi-directional link to takeoff via LiveCount
- Global items, pre-built and spec-driven assemblies
- Multiple industry-standard laboring methods
- Robust reporting functionality and easily pivoted data

Fixture Designation

Consolidation Extended Data

Grouped Extension View
