

Project Document Collaboration with Accubid Anywhere

Connect Estimating, Project Management and Field Teams for Stronger Collaboration and Optimized Project Outcomes

The ability to access and collaborate on documents throughout all stages of a project is crucial for accuracy, efficiency and team-wide execution. Now, all project stakeholders, whether in the office or the field, can easily share, review and update documents in real-time by using the integrated workflows in Trimble Construction One, leveraging Accubid Anywhere, LiveCount and Trimble Connect.

Streamlined project document collaboration enhances productivity, minimizes errors and optimizes the construction process from start to finish. With increased visibility into project data, teams can make better decisions, get jobs done more quickly and with greater precision and help drive improved project outcomes.

Benefits

Streamline Project Handoffs

Estimators can share bid information and prioritize tasks so project managers can start work immediately with the project files at their fingertips.

Access Information Anytime, Anywhere

Leverage one single source of truth for all project files, including drawings, in one location – accessible at any time and from anywhere.

Increase Collective Efficiency and Productivity

With universal access to important project data, teams can more effectively collaborate across projects and share drawings and other documents with stakeholders in a single click of a button.

Avoid Costly Mistakes On-Site

Using a laptop, tablet or smartphone, field teams can view up-to-date drawings or upload site photos to quickly collaborate with the office, improve coordination and minimize errors.

Who Benefits?

Estimators

Reduce rework, increase communication and simplify hand-offs by sharing estimate information with stakeholders.

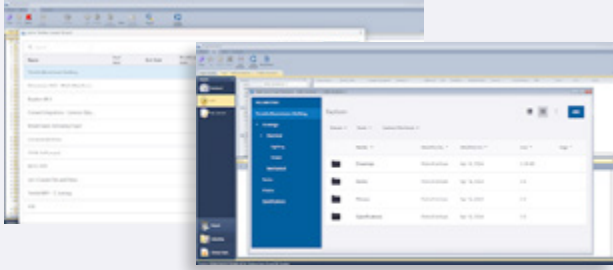

Project Managers

Work efficiently by organizing tasks, viewing drawings and addressing issues to deliver projects on time and within budget.

Field Staff

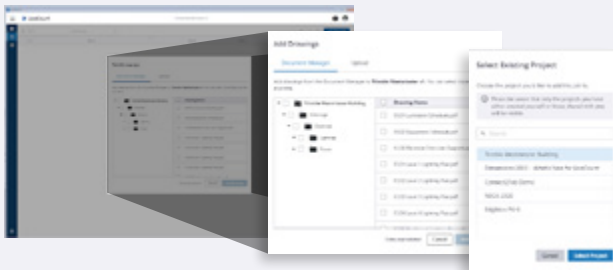

Enhance project outcomes and avoid costly mistakes by leveraging the most up-to-date documentation and drawings.

How does it work?

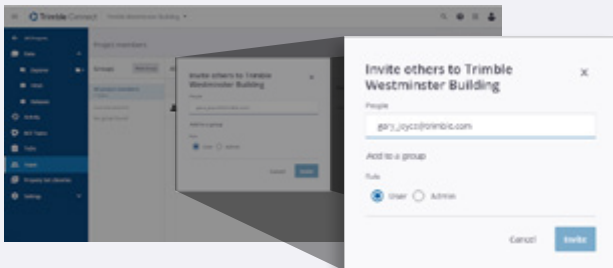

1. Create your project in Accubid Anywhere and upload documentation to your Trimble Connect Project.

Create your project in Accubid Anywhere and link it to a Trimble Connect project. Upload project documentation, including drawings, to Trimble Connect.

2. Access the same stored drawings in LiveCount to perform takeoff.

Associate the LiveCount job with the same Trimble Connect project and bring the latest versions of the drawings into LiveCount to start the takeoff process.

3. Share your Trimble Connect project with stakeholders to collaborate in the office and the field.

Invite additional project stakeholders to collaborate on your project within Trimble Connect and share your drawings or other documentation with staff in the field.
