# Trimble Construction One ProjectSight for MEP

Complete construction project management designed for MEP contractors

Now MEP contractors have one powerful construction management solution that provides unparalleled visibility to MEP workflows.

By leveraging Trimble's next generation construction management solution, ProjectSight™, project managers and stakeholders across the organization can collaborate in one powerful platform. Trimble® ProjectSight for MEP also includes additional tools for project managers to collaborate with other specialized MEP functions such as estimating, design and fabrication.

Provided with more visibility than ever, project managers can defend profit margins while increasing efficiency and collaboration across their MEP projects.

Benefits:

- **Stronger collaboration** between project teams, offices or remote teams.
- **Simplify documents** by managing RFIs, submittals and change orders in one system
- **Increase transparency** to the shop floor with access to view and edit spools
- **Defend project profitability** by managing your budget, contracts, purchase orders, changes and payments in one system
- **Improve field productivity** with online and offline mobile access when an internet connection is unavailable
- **Prevent rework** before it is built by eliminating outdated paper drawings in the field and making models accessible to everyone

What's Included

- ProjectSight™
- Trimble Connect® Business Premium
- Connect2Fab
- Estimation MEP - Base
- Submittal Manager
- Supplier Xchange™

ProjectSight for MEP

Complete construction project management designed for MEP contractors

ProjectSight

ProjectSight is a project management solution with financial management; document, drawings and model collaboration sharing; and field management in one powerful platform. With ProjectSight, project managers can identify risks early, collaborate across teams and have open lines of communication between field, office and other stakeholders.

Trimble Connect

Trimble Connect is an open collaboration tool specifically designed for the needs of the construction industry that makes project data available to all team members, providing crucial information to empower on-time, on-budget project delivery. With Trimble Connect, non-CAD users can access data-rich models with industry-leading load times from a mobile, tablet, desktop or mixed reality device.
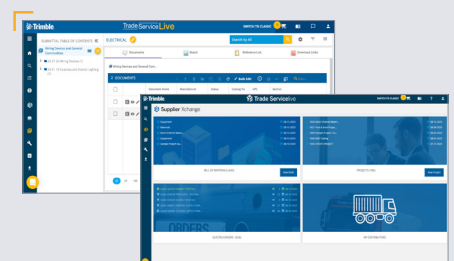

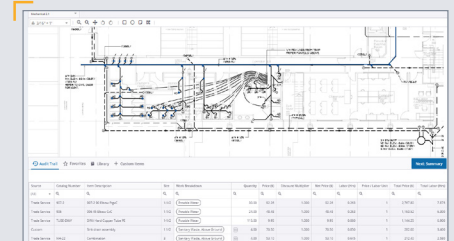

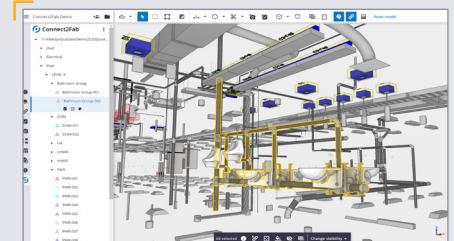

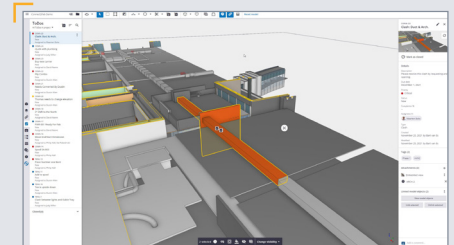

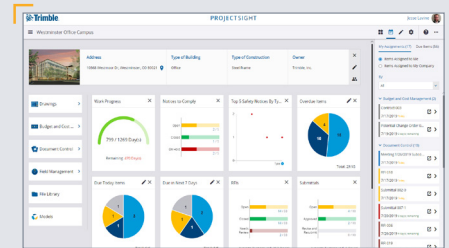

Trimble Connect2Fab

Connect2Fab is an application within Trimble Connect that expands model viewing capabilities to include content data from SysQue detailed models. Connect2Fab digitizes and transforms the MEP prefabrication and fabrication workflows with a seamless connection between the design and fabrication systems.

Estimation MEP - Base

Trimble Estimation MEP - Base is an easy-to-use web-based estimating solution with just the right features project managers need to complete a change order or basic estimate. Estimation MEP - Base includes fully integrated graphical takeoff, Trimble-managed content library with pricing for labor and materials. As a cloud-hosted solution, users can access and share drawings and estimates wherever they have an internet connection.

Submittal Manager and Supplier Xchange

Submittal Manager and Supplier Xchange allow a project manager to use a bill of materials to automate tasks, including creating submittal packages and procuring materials. Use Submittal Manager to save 50%-75% of the time to create a submittal package by leveraging Trimble's extensive database of documentation. With Supplier Xchange, you can purchase against a bill of materials from a convenient web-based platform. With a direct connection to your preferred suppliers, you can streamline the quoting and purchasing process for every project.
