

A TRIMBLE COMPANY

B2W Inform

FORMS & REPORTING

BETTER DATA COLLECTION & ACTIONABLE REPORTING

- Fast, easy creation of configurable form templates
- Dynamic, connected form fields
- Event-driven alerts and notifications
- Real-time data analysis
- Custom reporting and dashboards

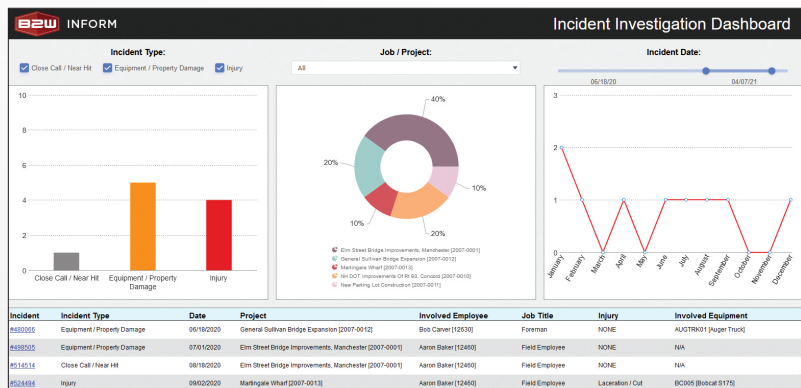

USE B2W INFORM FOR...

- Equipment Inspections
- Toolbox Talks
- Incident Investigations
- Job Safety Analysis (JSA)
- Field Safety Checklists
- Near Misses
- Fall Protection Plans
- Employee Certifications
- Employee Leave Requests
- Confined Space Entry Permits
- Traffic Control Devices/Measures
- AND MORE!

B2W Inform empowers companies to collect, manage, and analyze data more efficiently and effectively across operations. The application makes it fast and easy to create and manage (no code!) forms, replace inefficient paper-based processes, capture richer information, and standardize data collection practices. An advanced business intelligence and reporting engine allows companies to create reports, dashboards, and alerts needed to improve operational performance, safety, quality, and financial outcomes.

Business-critical reports and dashboards

B2W Inform provides the tools to effectively organize operational data and eliminate time-consuming, manual efforts needed to report on that data. Custom, standard, and ad-hoc reports and dashboards can be generated and scheduled to provide insight into trends and processes, enhance data-driven decision making, and expand collaboration across workflows.

Dynamic, connected forms to capture richer data

Creating, customizing, and updating electronic forms is fast and easy. Quite simply, paper forms cannot compete with the different types of rich data that can be collected with B2W Inform.

- E-signatures
- Photos and videos
- File attachments
- Calculations
- GPS locations
- Timestamps

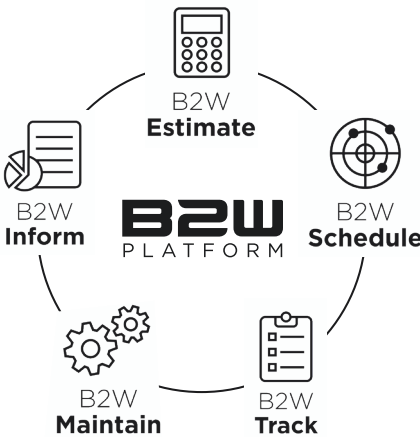

A TRIMBLE COMPANY

ADDITIONAL FEATURES

- Adaptive user interface
- Granular, role-based security
- Built-in approve/reject workflow
- Data binding and auto population
- Free library of user-ready form templates
- Automated repair request creation in B2W Maintain

B2W Software empowers and inspires heavy civil construction companies to win more work and complete it more profitably. The company's unified platform connects resources, workflows and data and includes applications to manage estimating, scheduling, field tracking, equipment maintenance, data capture and business intelligence.

The screenshot shows the 'Equipment Safety Inspection' form. It includes fields for Inspector Name (Jeremy Chyso), Inspection Date (1/20/2022 4:57 PM), Equipment Description & ID, Job / Project Name (Em Street Bridge Improvements, Manchester (2007-0001)), Operator Name (Derrick Hanover (12710)), and Operator Title (Equipment Operator). A rating scale is provided for safety equipment items like Seat belts, Operator's seat, Horn, Fire Extinguisher, Parking brake, Operator controls, Locks, Mirrors, and Other Comments. A signature field shows 'Jeremy Chyso'.

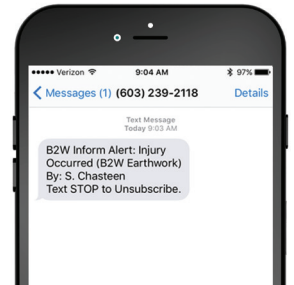

The screenshot shows the 'TEMPLATE EDITOR' interface. It features a 'CREATE A TEMPLATE' button and a grid of form elements like Text Box, Paragraph, Date/Time, Email, Phone, URL, Section, Dropdown, Auto Populate, Check List, Radio Buttons, Check Box, Media Upload, Signature, File Upload, Numeric, Currency, and Embedded Image. A preview of a 'Toolbox Talk Form' is shown on the right, including fields for Date, Business Unit, Foreman or Supervisor, and Toolbox Talk Topic.

Fast, easy drag-and-drop form template creation

B2W Inform makes it easy to break free from the rigidity and manual effort of standard programs and customize form templates to meet specific needs. No graphic design, coding, or IT skills are required.

Immediate, event-driven alerts and notifications

Custom alerts, triggered by data documented in electronic forms, can be configured for email, text message, or in-application delivery. Real-time notifications empower decision makers, help prevent problems, reduce correction times, and keep employees safe.

Anytime, anywhere, any device

As a cloud hosted solution, B2W Inform is accessible from any modern web browser or by using the purpose-built mobile application. An offline mode allows users to take forms to disconnected environments where they can be filled out, saved, and queued for syncing when an internet connection becomes available.

Unified with the B2W platform and operational data

A live connection with the B2W ONE Platform operational database allows form fields to be data bound to resources such as jobs, equipment, employees, and materials – ensuring that form fillers always have the most up-to-date information. Contractors may also configure equipment inspection templates to automatically create new repair requests in B2W Maintain through use of the B2W Ops API.
