

**Trimble** Construction One™

# Digital Procurement and Payment Workflows for MEP Contractors

Simplify and connect your procurement and payment processes for improved efficiency, visibility, and reduced risk.

# Benefits

## Work with the same suppliers you know and love

Optimize your processes without overhauling your supply chain. Work digitally with your preferred suppliers within Supplier Xchange to get material pricing, avoid back-and-forth phone calls, and combat supply chain uncertainty and rising material costs by comparing pricing among multiple suppliers.

## Save time and money with connected workflows

Streamline collaboration between your procurement team and accounts payable by simplifying the hand off of information. Leverage powerful integrations between Supplier Xchange and your ERP to save time and avoid human error by automatically syncing purchase orders, vendors, and jobs.

## Pay your suppliers on time every time

Streamline your payment workflow with Automatic Invoicing in your cloud-based Trimble ERP. Automatic Invoicing takes the burden off your accounting teams by streamlining the manual workflows that are slowing them down and can be prone to errors. Continue to optimize your processes with Viewpoint ePayments. Moving away from paper checks protects businesses by utilizing secure online banking processes, ultimately minimizing the exposure to payment fraud.

# Who?

## Procurement

Save time and money with digital connections to your preferred suppliers. Compare pricing among multiple suppliers, spend more time on the things that matter, and reduce the back and forth.

## Finance

Pick up where the procurement team leaves off with a simple, automated process. Easily process the invoices with Automatic Invoicing and sync purchase orders directly from Supplier Xchange, cutting out manual data re-entry.

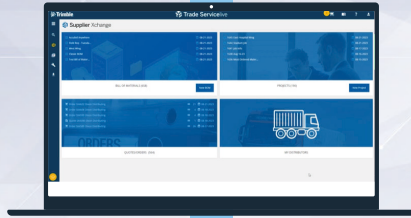

## Project Management

Create more accurate bids, gain greater project-level visibility and optimize your procurement workflows to achieve success.

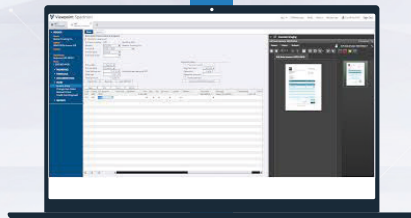

# How?

## Trimble Construction One™

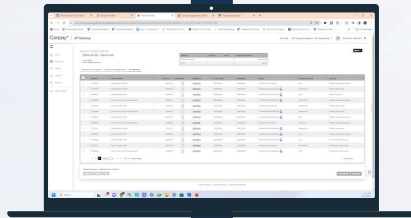

### Supplier Xchange

Leverage digital supplier connections to compare pricing and identify material alternates. Create more accurate purchase orders through a direct connection with your favorite suppliers.

### Viewpoint

Automatically sync the purchase order to your ERP with line item level detail. With Automatic Invoicing, PDF invoices are turned into new invoice entries in your ERP. Invoice entries are reviewed and approved.

### Viewpoint ePayments™

Pay your suppliers digitally and securely, using automated banking processes through Corpay.

Contractors are managing the procure-to-pay workflow through disparate systems requiring manual data entry, arduous back and forth with suppliers, and antiquated payment processes. Because of these disconnected systems, contractors like you struggle to get the information you need to make important decisions.

Now, you can manage your entire procure-to-pay process with connected workflows in Trimble Construction One that simplify, streamline, and connect your construction tech stack.
