

MYTH:

We don't need B2W Schedule to optimize resource scheduling and dispatching because we already use...

- ☐ Microsoft Project
- ☐ Primavera P6
- ☐ Another Project Management tool

SOFTWARE

FACT:

Real-time, online resource scheduling and dispatching complements a project management system and delivers a different set of benefits for additional people in the organization.

SOFTWARE

Project Management

...systems use a critical path method to help contractors plan activities – along with the proposed resources – required for each project and to communicate timelines, budgets and scope changes to project owners, executives and other stakeholders.

Scheduling & Dispatching

...with B2W Schedule gives the people responsible for carrying out project activities a comprehensive view of where labor, equipment and material resources are and where they will be and a way to communicate about needs, assignments and moves as they occur and change in real time.

SOFTWARE

Who interacts with and benefits from the systems?

Project Management	Role & Responsibilities	Scheduling & Dispatching
◆	Project Owners	
◆	Construction Executives	◆
◆	Project Managers	◆
	Site Supervisors & Foremen	◆
	Resource Coordinators	◆
	Move Dispatchers	◆
	Plant Managers	◆
	Maintenance Managers	◆

What do the systems provide?

Project Management	B2W Schedule	
◆	◆	Multi-user communication and collaboration among stakeholders
◆ *	◆	Real-time visibility
◆		Project planning: definition of activity schedule and resource estimates
◆		Project tracking: mapping tasks, timelines, tracking progress vs. plan
◆		Project budgeting: cost and project controls
◆		Documentation and communication of project scope changes
◆	◆	Integration with accounting and ERP systems
	◆	Scheduling and dispatching of specific employees, crews and equipment
	◆	Execution and communication of resource moves
	◆	Material order and material inventory management
◆ *	◆	Live map indicating resource location
	◆	Assisted resolution of resource scheduling conflicts
	◆	Alerts and notifications regarding resource needs, assignments and moves
	◆	Communication with equipment maintenance and field tracking software

* Not with Microsoft Project Manager or Primavera P6

Resource Scheduling & Dispatching

- Coordinate resources in real time
- Collaborate enterprise wide
- Keep jobs on schedule and budget
