

# Trimble Accubid Classic

Trimble® Accubid® Classic is the original full-featured electrical estimating solution that facilitates the complete construction workflow, from estimating to purchasing, project management and billing.

## Proven Material Database

Installed as a client solution only, Trimble Accubid Classic is powered by a comprehensive material database with over 42,000 items and 13,000 assemblies--flexible enough for any sized project. You can hit the ground running with labor units, labor factoring, labor tracking and cost codes built right into the program.

## Dynamic Takeoffs

Easily create custom, project specific assemblies on-the-fly allowing Trimble Accubid Classic to meet the needs of your unique projects. The built-in dynamic takeoff capability automatically calculates the required quantities for each component in an assembly based on length or count specifications.

## Multi-Level Breakdowns

Applying takeoff breakdowns in a multi-dimensional format allows users to view subtotals across breakdowns in any order. With complete flexibility and control, you can easily re-sort the extension and breakdown the bid by any combination of breakdowns.

## Live Extensions

The Live Extension functionality instantly calculates each takeoff as it occurs. With a single click, you can jump from the audit trail to the extended bill of materials. Easily sort the bill of materials to perform last minute checks and ensure accuracy. Changes to the quantity, material and labor are immediately reflected in the final price.

## Instant Bid Summary

Trimble Accubid Classic's Instant Bid Summary allows you to compare components of the estimate using labor-to-material ratios, costs per foot, per system or per floor. With Accubid Classic Pro, you can create multiple bid summaries each with different combinations of takeoff breakdowns. Last minute adjustments, modifications, and 'what-ifs' can be easily and seamlessly accommodated.

## Project Management

With sophisticated project management features you can break down the entire bid by logical and physical aspects such as floor, system, area, cost code, or drawing, and export this information to other applications including Microsoft® Office Excel® and MS Project. Project managers can quickly create a preliminary construction schedule or e-mail material lists to suppliers.

Updated final pricing screen shows both the pricing and the percentage calculations.

# Trimble Accubid Classic

## Key Features

- Seamless integration with Trimble LiveCount and Trimble Accubid Change Order
- Updated final pricing screen shows both the pricing and percentage calculations
- Cost Allocation for Incidental Labor, Labor Factoring, Labor Escalation and Indirect Labor
- Easily print all vendor and sub-contractor pricing to compare material and pricing quotes
- Quickly copy a takeoff and paste as a temporary assembly for improved efficiency and time savings
- Up-to-date, accurate pricing with access and integration to TRA-SER and Supplier Xchange which allows you to get electronic pricing from your local suppliers
- Add your quoted vendors to the Change Order log screen for a more complete Change Order log

## System Requirements

- **Processor:** i3 equivalent or higher
- **RAM:** 8 GB minimum
- **Storage\*:** 80 GB minimum free space (200 GB recommended for data & drawings)
- **Operating System\*\*:** Windows® 11 Professional or higher operating system; Web browser for application login
- **Display:** Minimum 1680 X 1050

The screenshot displays the Trimble Accubid Classic software interface. The top menu bar includes Job, Edit, View, Takeoff, Bid Summary, Database, Settings, Window, and Help. Below the menu is a toolbar with various icons for file operations, editing, and navigation. The main window is divided into several panes. On the left, a 'Takeoff: COMMON ASSEMBLIES' pane lists items with columns for 'Common Assemblies: Level 3', 'Type', and 'Count'. The central pane shows a detailed table of items with columns for 'Description', 'Length', 'Count', 'Mat \$', 'Lbr Hr', 'Source', and 'Date'. The right pane shows a 'Job' summary with fields for 'Job', 'Drawing...', 'Area...', 'Phase...', 'System...', 'Bid Item...', and 'Lb Factor...'. The bottom pane shows a 'Show deleted takeoffs' checkbox.
