

Accubid Classic Estimating Essentials

Essential Tools for Electrical Estimators in One Convenient Subscription

Your essential estimating solution and the foundation for your electrical pre-construction workflow, Accubid Classic Estimating Essentials provides the tools you need to accurately create electrical estimates, facilitate collaboration and information-sharing with team members and profitably bid and win more work - all in one value-packed subscription.

With Estimating Essentials, you get access to Trimble's industry leading Accubid Classic Pro electrical estimating software, multi-user graphical takeoff, material pricing, submittal management, change order management and collaboration tools. Plus, your subscription includes an exclusive preview of Estimation MEP Pro web-based estimating software.

Estimating Essentials is a powerful estimating solution in a simple, cost-effective package to help you build better, more accurate estimates and get to bid day faster.

What's included

- Accubid® Classic Pro Estimating Software
- LiveCount Graphical Takeoff
- Accubid® ChangeOrder Pro
- Trade Service® Product & Pricing Content
- Supplier Xchange
- Submittal Manager
- Advanced Image Manager (AIM)
- Trimble Connect® Business Premium
- Estimation MEP Pro (preview)

Benefits

- **One convenient subscription** to meet your needs from estimating through bid submittal.
- **Increase efficiency and consistency** by equipping your whole estimating team with the same powerful tools, facilitating easier collaboration and training as well as simpler license management.
- **Build estimates up to two times faster** with streamlined, repeatable estimating processes and connected graphical takeoff.
- **Increase accuracy** with pre-built assemblies and integrated, up-to-date material pricing and labor.
- **Streamline workflows**, reduce double entry of data and improve project handoff by sharing estimate data with project operations, the financial ERP and other third-party applications.
- **Increase visibility** into the impact changes have on your project by tracking and modifying change orders in a solution connected to the original estimate.
- **Improve information sharing** with your teams and other stakeholders for enhanced efficiency and informed decision making.

Accubid Classic Estimating Essentials

Accubid Classic Estimating Essentials

Essential Tools for Electrical Estimators in One Convenient Subscription

Accubid Classic Pro

Accubid® Classic Pro is the original full-featured electrical estimating solution that facilitates the complete estimating workflow, offering a proven material database with more than 40,000 items and 9,500 assemblies--flexible enough for any sized project--dynamic takeoffs, multi-level breakdowns, instant bid summaries, live extensions and live, bi-directional link to Trimble® LiveCount® graphical takeoff.

LiveCount

LiveCount is a cloud-based solution that speeds up the estimating process and eliminates the cost of printed paper drawings. With multi-user support and patented AutoCount symbol recognition, LiveCount streamlines the quantification process and seamlessly integrates marked-up digital image files with Accubid.

Accubid ChangeOrder Pro

Accubid® ChangeOrder Pro is a change order management solution designed to pull from an existing contract estimate created in Accubid Classic. Track and modify the entire lifecycle of a change and adapt quickly to changing project dynamics with a connected change management solution. Now you can assess the "big picture," pricing not just labor, material, and equipment, but also clean-up, material handling, overtime, project management and more.

TRA-SER Product & Pricing Content

TRA-SER® product and pricing software allows users to easily import up-to-date pricing and product data directly into Trimble Accubid Classic, increasing estimating accuracy and saving time on database maintenance.

Supplier Xchange

Supplier Xchange is a digital pricing and procurement service powered by local distributor connections and shared item-level project data. Electronically submit a list of items and obtain company-specific pricing from multiple suppliers in real time, saving rework, reducing errors and speeding up the bid and buy process.

Submittal Manager

Submittal Manager can trim 50% - 75% off the time it takes to create a submittal package. Simply upload the bill of material from your estimate and within seconds, you will have the most current catalog pages ready to add to your estimate and customize using simple design tools for a professional bid submittal package.

Advanced Image Manager

Advanced Image Manager (AIM) provides estimators with essential document management functionality to support their preconstruction workflows. With AIM, users can view multi-paged files (.pdf, .jpg, .png, etc.) and easily break apart or merge individual sheets. Beyond robust file editing capabilities, AIM also offers impeccable file resolution improvements and advanced 2D takeoff to help estimators further modify and organize digital assets, such as drawings, reports or images.

Trimble Connect

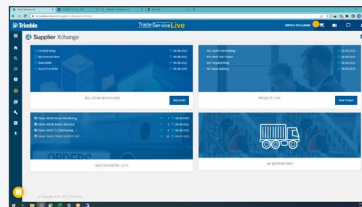

Trimble Connect® is an open collaboration tool that connects the right people to the right data at the right time on any device-enabling informed decision making and enhancing project efficiency. Trimble Connect facilitates the sharing of detailed data such as estimates, drawings, models and more, to help connect workflows and simplify collaboration and coordination among stakeholders.

Estimation MEP Pro (preview)

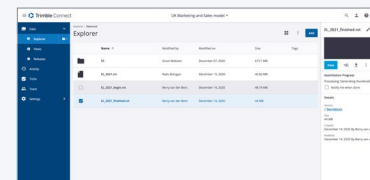

Your Estimating Essentials subscription includes exclusive, early access to Trimble's newest web-based estimating solution. Not yet generally available, Trimble Estimation MEP Pro represents the future of estimating software, offering fully integrated graphical takeoff, material pricing and labor, and a continuously expanding set of features - features you can help define. This is your opportunity to preview and try Estimation MEP Pro, provide us with your feedback and be a part of the evolution of Trimble's next-generation estimating solution.
