

Insta's intelligent industrial data platform

Maximize the benefit from your data and create better business

COLLECT | ANALYZE | LEAD | DEVELOP

UTILIZING DATA FOR BETTER BUSINESS OPERATIONS

The intelligent industrial data platform collects the essential industrial data at a single location. It provides a central situational picture and up-to-date reports that enable making better, data-based decisions.

The data platform directs the user's attention to deviations that can indicate problems with production. Data enables making the facility operate more efficiently, automating tasks, optimizing activities, or performing maintenance in a more sensible and proactive way.

Do you already know how you would like to utilize your data or do you need help with developing a data strategy? Contact us!

DATA-BASED MANAGEMENT

A real-time situational picture based on various data sources. Integrations, reports, historical data, and forecasting can be accessed centrally.

EFFICIENCY AND PREDICTABILITY

Refined data compiled to support product development and decision making. Predictability and optimization through machine learning.

A single location for all process data

Secure data management

Data available to all applications

Enabling intelligent automation

Optimizing production and energy consumption

Reducing the carbon footprint from operations

**A CENTRALIZED
DATA REPOSITORY**

**PRODUCTION REPORTS
FOR THE COMPANY'S
MANAGEMENT NEEDS**

**A SECURE CLOUD
SOLUTION**

**DEPLOYABLE IN
WEEKS**

**NO APPLICATION
LIMITATIONS**
