Life-cycle services for electrical distribution

Improved reliability of electrical distribution through life-cycle-based, proactive and brand-independent maintenance

Ensure the reliability of electrical distribution equipment and systems with Insta's dependable, life-cycle-based maintenance, repair and testing services. With our support, you can ensure system availability, continuity of production, and the safe and reliable operation of equipment.

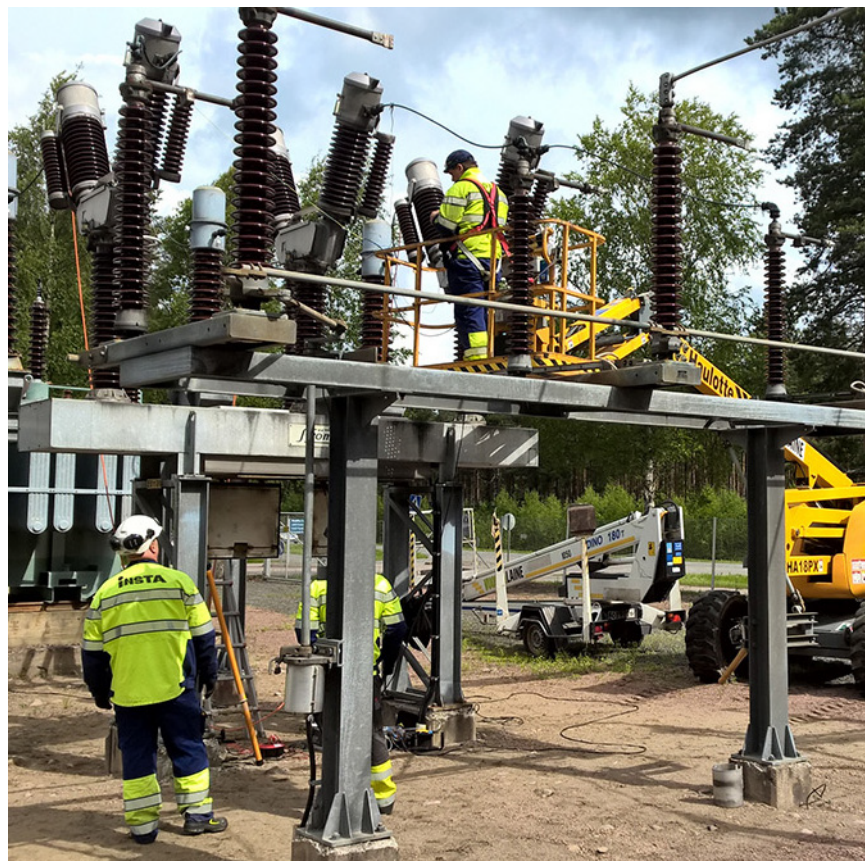

Our brand-independent service portfolio for industrial and property needs covers a wide range of maintenance, repair and installation services.

As a life-cycle partner for electrical distribution, we help ensure the timely execution of custo-

mer investments. Proactive asset maintenance helps prevent uncontrolled equipment failures and unplanned production shutdowns.

Our operations are guided by the ISO 9001 quality management system, ISO 45001 occupational health and safety management system, and ISO 14001 environmental management system. We have also been assessed in accordance with the HSEQ evaluation for service providers.

We operate nationwide across Finland. Our permanent offices are located in Tampere, Pori, Porvoo, Espoo and Muurame.

Field and Workshop Services for Electrical Distribution Equipment

	Maintenance	Repair	Renewal	Testing / commissioning
