

INSTA'S ELECTRICAL DISTRIBUTION SERVICES

Great results from the outset, with safety and quality ensured

Electrical Distribution is Insta's flexible and cost-effective unit specializing in lifecycle services, engineering, system maintenance and rebuild of electrical distribution equipment.

We provide a wide range of services in the engineering, installation, maintenance and energy measurement of industrial and property electrical distribution systems. Our brand-independent range of services covers not only maintenance, repairs and installations, but also the engineering of new equipment. We help ensure the predictability, availability, security and production reliability of electricity distribution systems.

Our operations are guided by the ISO 9001 quality management system, the ISO 45001 occupational health and safety system and the ISO 14001 environmental standard. We have also been evaluated according to the HSEQ assessment of service providers.

We have been awarded Finland's Strongest Platinum special certificate as proof of long-term excellent financial indicators.

We serve customers across Finland. We have permanent locations in Tampere, Pori, Espoo and Muurame.

Our services for electrical distribution equipment as field and repair-shop work

	Maintenance	Repair	Rebuild	Testing / implementation	
Engineering, power system analysis and calculations	Switchgear up to 110kV	✓	✓	✓	✓
