

Summary

Our company needs a full-time Lab Technician to operate under the supervision of our Lab Manager and to undertake a variety of laboratory procedures of a technical nature. The successful candidate will be responsible for testing in-service petroleum-based oils and in-service coolants/antifreezes to validate wear levels, contamination, and additive components. Ideally, we are looking for a professional with experience in lab environment that can optimize lab procedures and succeed in producing reliable results.

Responsibilities and Duties

- Perform quality control tests in the lab equipment.
- Assist with testing and calibrating lab equipment in preparation for specific tasks.
- Sample preparation prior to them being run in lab equipment.
- Conduct experiments under defined conditions to verify test data.
- Disposal of tested sample in appropriate manner.
- Retrieve and prepare reports for laboratory management.
- Recognize and report any equipment or sample issues.

Qualifications and Skills

- Capable of prioritizing tasks to meet daily and weekly goals.
- Ability to communicate and work in teams effectively.
- Working knowledge of MS Office
- Ability to work semi-autonomously
- 1+ year of laboratory experience (Preferred)
- Associates degree in science field (Preferred)
