Everlaw

Your AI Can Do More with Everlaw

Put your firm's chosen AI to work on the matters your clients entrust to you, connected directly to the evidence.

Attorneys and their teams face a whole new world of possibilities to leverage advanced AI in their practice.

Everlaw helps ensure that the legal AI and frontier models you use in litigation and investigations can access the right data, in the right place, with the right protections.

Empower your teams to find relevant documents, test their understanding of the facts, and develop case strategy using firm-approved AI tools connected to Everlaw – with access governed by each user's existing Everlaw permissions.

GO BEYOND MATTER MANAGEMENT. GET TO THE EVIDENCE.

Your approved AI works from the case record, not just the admin around it, so your team can:

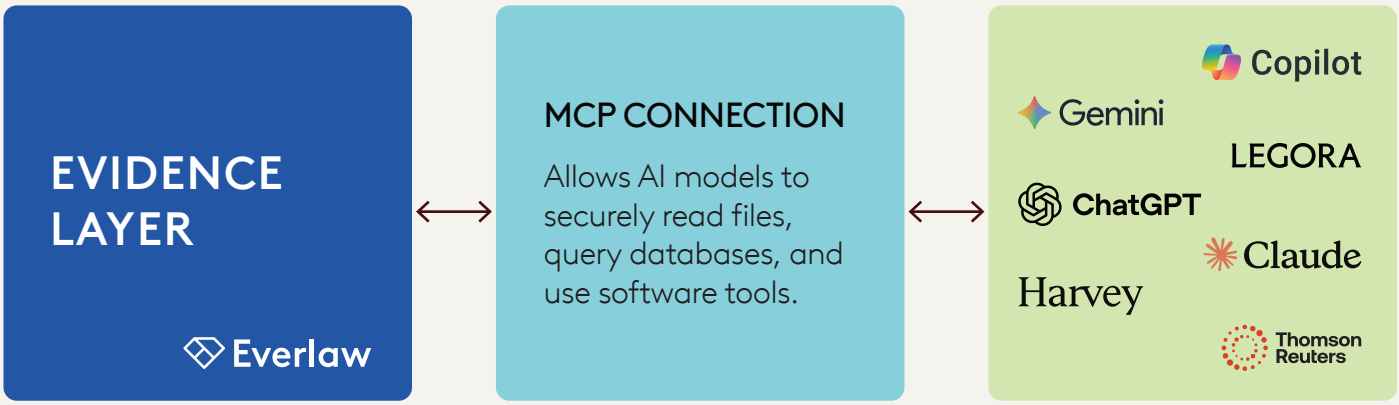

- Prepare for depositions with witness briefings and lines of questioning
- Draft pleadings and motions with key facts at hand
- Spot gaps across productions and close them

All governed by your Everlaw permissions.

"We are applying Claude's capabilities across many litigation workflows and see significant potential in realizing them in the right context. Everlaw allows us to bring the right evidence into the equation, unlocking additional power."

Manfred J. Gabriel, Partner, Holland & Knight

Connect Your AI Tools Directly With Everlaw's Governed Evidence Layer

Everlaw

Give Supported AI Tools Access to Evidence for Quality Outputs

Trusted AI Connected to Live Evidence	Swift Segue from Evidence to Action
Connect your AI workflows to Everlaw's trusted evidence layer, with permissions and citations applied to every request – and never copy case data into other systems.	Connect searches and analysis into a single workflow: find evidence relevant to an allegation, trace the timeline, and identify potential gaps to help your team develop strategy sooner.
Accessible to Non-Tech Users	**Visibility Into Cost and Usage at a Glance**
Give your litigators, legal ops, and investigators conversational access to Everlaw search, reporting, and analytics – no coding required.	Track Everlaw costs and usage in your AI workspace to support budgeting, ALSP oversight, and reporting.

"This partnership delivers a seamless, end-to-end workflow. By pulling evidence and analysis directly from Everlaw into Legora's drafting environment, our legal teams can ensure every assertion is grounded in verified evidence, which significantly accelerates insight and leads to better legal outcomes.."

David Shargel,
Partner, Bracewell
