FOCUS360™ SERIES

Remote Spotlight LEDs

ECCO's EW3010 Series Remote Spotlights are multifunctional, motorized searchlights featuring a 9-36VDC operation. Both spotlights can be installed wirelessly and are protected by a polycarbonate lens and the housings are available in black or white.

The EW3010/3011 offers full 360° continuous rotation, a 135-degree tilt range and features an optional hardwired in-dash joystick controller. The spotlight also has a home setting that automatically returns the light to its original position upon powering off the device. ASA resin housing makes the EW3010/3011 corrosion, UV and impact resistant and also feature patent pending reflective optics.

Models

PART NO.	VOLTAGE	AMPS	BEAM DISTANCE	CANDELAS	TILT RANGE	COLOR
EW3010	9-36	2.8	3,925 ft	470,000	135°	Black
