

# WARNING LIGHTS

## 200 Series Bus Light

### Surface Mount

The 200 Series is the next generation of bus signal lighting. Featuring enhanced styling and hugely improved performance. The 200 Series warning lights include an all-new integrated alternating 'wigwag' flash pattern to fit an individual 90 FPM (180 FPM combined), complying with all Australian bus standards (including NSW TS150).

Additionally the 200 Series can be used in Steady Burn mode for backwards compatibility with existing flasher controllers. The 200 Series adheres to all photometric requirements for bus lights including surface area standards.

### Features and Benefits

- Alternating 'Wig Wag' and Steady Burn flash patterns.
- Synchronisable with additional units
- Temperature Range: -30°C to +55°C
- Feature a non-corrosive bezel
- Polycarbonate base & lens
- Units sealed against moisture and dust ingress
- Dimensions: 118mmH x 130mmW x 21.5mmD
- Replaces legacy 830-106A & 830-107A products
