EB5200A

Wireless Rechargeable Beacon

ECCO's EB5200A wireless rechargeable LED beacon is a non-permanent warning light solution for any work truck, utility truck or any other commercial vehicle application that's ready to use right out of the box. This durable battery-powered beacon mounts to the roof of the vehicle in seconds with a sturdy vacuum-magnet mount and can quickly be removed when it's not in use. Rubber housing on the bottom of the beacon protects the vehicle's paint from damage or scratching when mounting or removing. The EB5200 LED beacon features a wireless remote to turn the beacon on/off and to cycle through seven flash patterns and comes with a cigarette-plug charging cable.

Models

| PART NO. | MOUNT | LENS COLOUR | LED COLOUR |
