

Take a **look** at Ricoh Production. Continuous Feed Inkjet Presses

If you're ready to accelerate your operations, look to Ricoh, the authority in inkjet solutions. Our growing lineup includes options for high-speed graphic color, printing on offset coated papers without priming or post-treatment, transactional color, integrated or on-demand MICR and true IPDS.

For more than 40 years, Ricoh has been a pioneer in developing inkjet technologies. You may be surprised to learn that we've been a leading supplier of printheads to the biggest names in business for decades. Today, our advancements in continuous feed inks and internal technologies combine to give your high-volume print operation an unparalleled business advantage.

Put better economics to work.

The growth in short-run, highly-personalized applications requires a nimble printing approach. With the ability to handle enormous amounts of customer data and customize every page of a run without slowing it down, Ricoh continuous feed inkjet printers give you the chance to operate more strategically, more competitively and offer customers greater economic value for their print budgets.

Exceed expectations.

The RICOH Pro VC70000 is doing more than turning heads, it's starting a brand new conversation about inkjet. With the ability to deliver superior image quality on offset coated papers with no priming or post-treatment, along with extended gamut inks that help you effectively match more colors, the system is redefining what's possible with continuous feed inkjet.

Streamline production.

Get to work faster with no plating and a user-friendly job setup. Take advantage of proven solutions to batch jobs and track output at a component level for critical communications workflows. Leverage powerful automation tools to reduce human touchpoints and help eliminate opportunities for error to enter the production process. Get the job done on-time, on-budget and with less handling.

Continuous Feed Inkjet Presses

RICOH Pro VC70000

Take command with the next leap forward in inkjet.

The RICOH Pro VC70000 sets a new standard in high-speed print production for quality and productivity on offset coated paper, with no priming or post-treatment required. Extended gamut inks and advanced drying technologies combine to make new media choices possible. Reliably achieve more colors and produce a broader range of high-value graphic arts applications, complete with inline personalization and customization for data-driven applications.

RICOH Pro VC60000

Proven, predictable performance for high-speed production.

The RICOH Pro VC60000 brings high-speed, near offset quality to the high-volume graphic communications and critical communications printing markets. Ricoh inkjet printheads and our proprietary inks deliver superb image quality and offer the precision customers are counting on for direct mail, policy materials, bills, statements and more.

RICOH Pro VC40000

Fast, efficient production for color and B&W print applications.

The RICOH Pro VC40000 is a powerful combination of speed, resolution and ease-of-use for the transactional, trans-promo and direct mail printing markets. This system delivers documents with crisp text and imagery, while separate black and color printhead arrays allow for cost-effective printing of color and monochrome applications.
