Notice: 21-01

Date: 06/01/2021

Subject: Secaucus NJ Maintenance Notice

Details

FAIRX will be performing updates and maintenance to our environment at Equinix NY5 in Secaucus, NJ on Friday June 4th, 2021 beginning at 21:00 UTC and ending on Sunday, June 6th, 2021 at 17:00 UTC. Some updates will involve migration of cross connects from their existing locations to their final locations. There is no cost or action required on your part.

The cross connect migration is being performed in close collaboration with Equinix personnel. Equinix has verified the existing cross connects, run new cabling, and performed testing to ensure a smooth transition. In the event that a cross connect does not normalize after the migration, we will have FAIRX personnel confirm local equipment and Equinix confirm RX/TX signal to your Equinix DMARC. If it is determined that signal is being received at the Equinix DMARC from FAIRX and there is a lack of signal originating from you at your DMARC with Equinix; or there is signal and no BGP peering relationship established with FAIRX, we will notify the technical contacts we have on file with your organization. If you are experiencing connectivity issues after June 6th, 2021 at 17:00 UTC, please do not hesitate to contact us.
