

Carbon Reduction Plan

Supplier name: Tandem Diabetes UK Limited

Publication date: 26 January 2026

Commitment to achieving Net Zero

Tandem Diabetes UK Limited is committed to achieving Net Zero emissions by 2050.

Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline Year: 2026 (expected)
Additional Details relating to the Baseline Emissions calculations.
Tandem Diabetes UK Limited has been operational for less than 12 months and has not yet established its baseline year and associated emissions data. The baseline year will be determined once a full 12-month period of trading data is available, expected by the end of 2026.
An updated Carbon Reduction Plan will be published as soon as practicable thereafter.

Current Emissions Reporting

As Tandem Diabetes UK Limited has less than 12 month's trading history, Scope 1, Scope 2 and Scope 3 emissions data are not yet available. Initial data collection processes are underway and full reporting will commence as soon as practicable after establishment of the baseline year.

Emissions Reduction Targets

Once its baseline year is established, Tandem Diabetes UK Limited will consider appropriate emissions reduction targets aligned with achieving Net Zero by 2050, which will be published in an updated Carbon Reduction Plan.

Carbon Reduction Projects

Once its baseline year is established, Tandem Diabetes UK Limited will consider appropriate environmental management measures and projects for future implementation, which will be published in an updated Carbon Reduction Plan.
