Superior performance, value and design

SunPower® Helix® Carports are designed by an experienced team of in-house architects and engineers to reduce energy costs, enhance the value of your real estate and strengthen your commitment to sustainability.

Optimized for financial returns

SunPower’s single-incline canopy uses industry-leading design techniques to increase production yield, lower material and installation costs and maximize your return on investment.

A track record of success

With more than 100 MW of carport installations nationwide, SunPower knows what it takes to meet milestones, keep your project on schedule and minimize any disruption to your organization.

SunPower® Helix® T-Type Carport System

The only fully integrated single-tilt carport structure on the market
Elegant, durable design is uniquely engineered to maximize the benefits of SunPower® solar panels and the Helix electrical and mechanical system architecture.

Industry-leading solar panels
Reliability and unmatched efficiency rates combine to deliver up to 60% more energy in the same space over 25 years.¹

- High efficiency
- High energy production
- 40-year projected useful life²
- Unparalleled for durability³

Powerful EnergyLink® Monitoring Software
Gather real-time insights for intuitive energy management.

Simplified Electrical System
Streamlined architecture minimizes system complexity.

Integrated Cable Management
Keeps cables secure and protected from abrasion and wear.

Pre-Configured Inverter Power Station
Preconfigured inverter improves installation efficiency.

Innovative Options

Water Management
Manages water runoff on the underside of the canopy, providing the potential for re-use in onsite irrigation.

Battery Storage
Couples with canopies to achieve demand charge savings and better utilization of energy produced.

Lighting
Integrates energy-efficient LED lighting within canopies to ensure parking areas stay well lit at night.

EV Charging Compatible
Enhances functional use of carports for customers and employees, while promoting EV adoption.

Warranties

- SunPower panels
  25 years
- Helix mechanical BOS
  25 years
- Helix electrical BOS
  10 years
- Inverter
  10 years
- SunPower carport structure
  25 years
- EnergyLink® monitoring hardware
  10 years

¹ SunPower 450 W, 22.2% efficient, compared to a Conventional Panel on same-sized arrays (330 W multi, 17% efficient, approx. 2 m²), 5% more energy per watt (based on PVSim runs for avg US climate).
² 0.5%/yr slower degradation rate (Jordan, et. al. Robust PV Degradation Methodology and Application. PVSC 2018).
⁴ Manufacturer pass-through warranty. Warranties of 15 or 20 total years are available directly through manufacturer.
