SunPower®
SunVault® Storage
Bottle the Sun®

SunPower Equinox® with SunVault® storage is the only home solar + storage solution designed by one company—providing a truly seamless experience.

When your battery is depleted in the evening, your home will seamlessly shift to drawing electricity from the grid again.

Energy storage can help manage your usage during peak times and reduce the impact of complex time-of-use rates.

Your SunPower Equinox® solar system generates electricity during the day and uses that energy to power your home and charge the SunVault® storage system. Any extra electricity is sent to the grid.

SunPower Equinox® with SunVault® storage is the only home solar + storage solution designed by one company—providing a truly seamless experience.

Intelligent and intuitive software lets you choose how your stored energy is used. Easily adjust how much energy to save for backup and how much to use to reduce peak-time usage.

Check the SunVault® battery LED panel or your monitoring app to see how much energy remains in real time.

If there’s an outage, SunVault® storage provides power to your appliances and electronics—such as charging your phone or powering your refrigerator.

In the evening, when your solar isn’t producing electricity, SunVault® storage can help decrease the amount of electricity you draw from the grid.

When your battery is depleted in the evening, your home will seamlessly shift to drawing electricity from the grid again.

And if your energy needs ever change—such as buying an electric vehicle or adding a pool—SunPower can help you find the right solution.

Intelligent and intuitive software lets you choose how your stored energy is used. Easily adjust how much energy to save for backup and how much to use to reduce peak-time usage.

Energy storage can help manage your usage during peak times and reduce the impact of complex time-of-use rates.
