

UNTHA

The reliable brand!

POWER CORE

Boost your performance

Boost your performance 

UNTHA POWER CORE

Boost your performance

The UNTHA Power Core is a powerful generator that enables UNTHA shredders to operate independently. It serves as a reliable source of energy at locations without an existing power supply – ideal for temporary applications such as test operations, rental solutions or at varying locations.

Specifically designed for operating UNTHA XR and ZR models, the generator is precisely tailored to meet their requirements. During the shredding process, the

Power Core automatically adjusts its output — ensuring maximum efficiency and minimal operating costs.

The Power Core stands out with its compact design and multiple transport options, making it highly flexible in use. Thanks to Plug & Play connections, it's ready to operate within a few minutes.

Moreover, the Power Core is fully integrated into the MyUNTHA customer portal, giving users access to a wide

range of smart features such as the spare parts catalog and the maintenance manager. The integrated GENIUS assistance system processes collected machine data and proactively notifies users when, for example, maintenance tasks are required. In addition, MyUNTHA and the UNTHA service team provide comprehensive support for service and maintenance inquiries and ensure the supply of appropriate spare parts.

Your benefits at a glance

Compatible

The Power Core has been perfectly matched to the XR and ZR series shredders and is the perfect addition for autarkic operation.

Dynamic

The Power Core's performance automatically adapts to the shredding process, depending on the material, quantity and composition, thus ensuring maximum productivity for every application.

Fuel-efficient

The highly efficient and dynamic drive system enables fuel savings of approximately 20–25 % compared to other generators.

Compact & silent

The generator set is installed in a noise-insulated, compact and lockable 20-foot container. This reduces noise emissions to a minimum and protects the Power Core from external influences.

Sample image Power Core

Durable

The generator operates continuously within its rated range, eliminating the need to hire additional load resistors and maximising the service life of the entire unit.

Plug & Play

Connected to the shredder and ready for use in just a few steps with quick coupling connectors.

Emissions standards

Complies with current EPA Final Tier 4 / EU Stage V emissions standards – mandatory in the European Union.

Digitalisation

Full integration of the Power Core into the MyUNTHA customer portal, including incorporation into GENIUS, spare parts catalogue and maintenance manager apps.

Insulation monitoring

The integrated insulation monitoring guarantees maximum safety and flexibility – without any additional installations – and ensures reliable monitoring of the system.

Optional additional equipment

Hook frame

- » The hook frame enables easy and flexible handling of the Power Core directly at the site of use with a hook lift truck. An anti-theft device has also been integrated.

External 2,000 litre additional tank

- » Increased operational reliability thanks to additional fuel reserve: With the optionally available 2,000-litre tank, the operating time can be extended to up to 100 hours. The tank can be retrofitted at any time and integrated into existing systems.

Accessories

- » An electric cable dispenser is available as an option for space-saving and secure storage of the supply cables in the container. This makes handling all the necessary cables simple.

Service and maintenance

The UNTHA service team is the first point of contact for all service and maintenance queries and ensures smooth processing. Regular service visits are carried out directly by John Deere. This ensures that the functionality of the Power Core and the warranty claim remain fully valid.

All dimensions in mm

TECHNICAL DATA		
Diesel engine		John Deere 6136 CG550
Power	kVA / kW	585 / 505
Operating mode	V	400 and 480
Tank	l	750 inkl., 2000 optional
Fuel		Diesel & HVO-fuel
Consumption*	l/h	30–50

* Actual consumption depends on the specific application

5 reasons to choose UNTHA

Customised, long-lasting shredding solutions

Premium products developed and produced in Austria

All-encompassing expertise, from development to production, under one roof

Reliable customer service with the best technical know-how

More than 10,000 satisfied reference customers worldwide

We deliver what we promise

Since our founding in 1970, we've followed our promise of being "the reliable brand", which applies to every product and service that UNTHA delivers.

We work hard to consistently outperform our competitors, and provide customers with the confidence that – in choosing UNTHA – they have made the best decision for their business.
