

The Crest

**PRITZKER ARCHITECTURE PRIZE
LAUREATE 2013**

Toyo Ito is one of the most influential architects in practice today. In this career, Toyo Ito has developed an illustrious body of work that combines conceptual innovation with keen sensitivity to the landscape, creating exceptional architecture.

Bearing his signature, *The Crest* represents an appreciation for timeless design, an intimacy of architecture and nature, and a celebration of life's many peaks.

INSPIRED BY NATURE

In the natural environment, Nature has its own way of keeping cool. While sunlight promotes photosynthesis, evaporation through the leaves of trees has a passive cooling effect that keeps the environment cool. The leaves also help to moderate wind conditions and provide shade. This is a strategy that works in nature and has also inspired the design of *The Crest*.

DESIGNED FOR COMFORT

Designed by Pritzker Prize Laureate Toyo Ito, *The Crest* has been created to provide a bright and airy living environment with magnificent views. Sky planters that are part of the architecture promote passive cooling and complement the lush landscaping and water features.
