

FOOTBALL MANAGEMENT FOR EXPERTS

goalunited Legends is a football management simulation with unique gaming depth that offers long time motivation like no other management game. The detailed and very complex match calculation creates realism without compromise.

REALISM

As manager and coach at the same time the player takes on the role as powerful team boss. Only real football strategists can lead their club to the top of the league table and are able to compete with the tough competition in other events like the national cup and the International Masters.

GAME DEPTH

From building up your stadium into an entertainment arena to the acquisition of sponsors and employees, the manager takes full responsibility of the important decisions. Youth work also takes on an important role. Finding and improving young talents eliminates the need for the purchase of expensive stars later on. The manager should never lose sight of the real time transfer market either though, as an injury of a key player in your team might make a quick replacement needed. Is the medical staff ready to compete with the first league? Build a new fan shop or rather a modern fast food restaurant? Parking garage or train station? Are the sponsors happy? Is the club attractive enough for new fans?

VARIETY

Managers that need more than the regular team management, can challenge other managers at any time to play UNITED special events and optimize their team step by step.

CHALLENGE

Only managers that keep an eye on every detail, learn every trick in the book, use the smartest tactics and never lose sight of the big picture, will have a chance to stand up to the tough competition from the worldwide community and become a legend in football history.

KEY FACTS:
