REFLECTIVE DROPPER WITH SAFETY MESSAGE

**Cable Stop Reflective dropper with safety message  
2000mm drop with 400mm square message panel**

These mining Reflective droppers with large safety message panels are made from our Reflective Roll Up material with added stiffening rod insert to keep rigid and a weighted insert to the bottom message panel to reduce movement. As they are designed to hang from the overhead ceiling rods or mesh, which are usually too high to reach, they have a fixed Nickel Hook to the top which stays in place without holding, this allows easy attachment for a worker stood on ground level. This dropper allows double sided viewing messages.
