Dose responsibly

Not all pain and fever medicines are the same. To make sure TYLENOL® or MOTRIN® is right for your child, always read and follow the label.

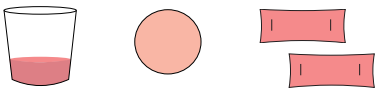
Read the label

Active ingredient: the medicinal ingredient in the product, including its strength and the amount present

Uses: the intended benefit of the product

Directions: how to use the product responsibly

Warnings: important safety information relating to allergies, medical conditions, side effects and medical assistance, if required



Choose the right medicine

TYLENOL® and MOTRIN® come in a variety of formats and flavours. Choose the one that's best for your child's age, weight, and preference (flip this page to see dosage chart):

Liquid: easy to swallow

Chewable: can be chewed or left to dissolve in the mouth (only available for TYLENOL®)

Dissolve packs: portable powder (only available for TYLENOL®)

Give the right amount

- If possible, use your child's weight to dose instead of age
- Always use the dosing device (cup, syringe or dropper) that comes in the box

Check the time

Follow directions on the package when dosing your child's medicine

TYLENOL® Active ingredient: acetaminophen	**MOTRIN®** Active ingredient: ibuprofen
• An analgesic (pain reliever) that provides effective, temporary relief of fever and pain • Dosed every 4 to 6 hours • Can be used for infants and children. Talk to your healthcare professional if your child is 4 months of age or younger **Important:** Take only one medicine containing acetaminophen at a time	• A non-steroidal anti-inflammatory medication (NSAID) that provides effective, temporary relief of fever and pain • Provides up to 8 hours of fever relief • Can be used for infants and children. Talk to your healthcare professional if your child is 4 months of age or younger
