

A photograph of an outdoor dining area at dusk. In the foreground, a round wooden table with a dark frame is set for a meal with plates, glasses, and a floral centerpiece. It is surrounded by curved wooden benches. In the background, another similar table is visible. The setting is a courtyard with a stone building featuring large arched windows. Warm string lights are strung across the scene, and the interior lights of the building are on, creating a cozy atmosphere.

Solea

The art of outdoor living

AUBRILAM

More than a terrace, a destination

Solea transforms every space into a true place to live. A space where people settle in, share, and make the moment last.
Designed for restaurants, hotels, campsites, campuses, offices and public spaces, the range structures outdoor areas with elegance and efficiency.

Tables, seating, planters, barriers, windbreaks and sorting solutions form a coherent, modular and durable whole. Each element naturally finds its place to create welcoming, easy-to-read and functional terraces. **Solea makes people want to stay. And to come back.**

Conviviality for up
to 8 people

Modular

Durable materials

UV resistant

Designed for
outdoor use

AUBRILAM

where space comes to life

Your needs shape our solutions

For 40 years, AUBRILAM has been imagining, designing and deploying outdoor furnishing solutions made to last.

With more than 700 terraces equipped every year (and a 30-year partnership with McDonald's), AUBRILAM supports major brands and local authorities in creating high-performance, welcoming and durable outdoor spaces.

A 100% integrated company

Our strength: complete control of the project, from idea to installation. Design, R&D, purchasing, production, quality, logistics, installation, maintenance and after-sales service: everything is integrated to ensure consistency, responsiveness and reliability.

Our expertise

- Lighting solutions
- Urban furniture
- Restaurant terraces

Our references

- McDonald's
- UGAP
- Total Energies
- Unibail

World leader in outdoor terrace furnishing.

40 years of experience
Recognised expertise in outdoor furnishing.

+700 terraces delivered per year
Large-scale projects deployed all over the world.

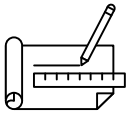

Our services

Simplicity in 3 steps

Exclusive support

With AUBRILAM, every project moves forward simply
We support you at every stage to design a terrace suited to your site, your uses and your identity. From layout to after-sales service, our teams provide complete, precise and efficient support.

1

Consulting
We help you imagine the right configuration: layout plan, 3D visualisation, choice of elements, customisation and optimisation of uses.

2

Installation
Our experienced technicians work on all types of sites and surfaces, using suitable and durable fixing solutions.

3

Maintenance
Because a terrace is used every day, we handle the replacement of worn or defective parts, with a responsive and attentive after-sales service.

You imagine the terrace. We make it possible.

One range, a thousand ways to live outdoors

Food service

Create a welcoming, fluid and profitable terrace
Solea supports every moment of consumption: a quick break, a group lunch, a leisurely dinner or an informal moment with friends. The range's modularity optimises seating capacity while preserving comfort and circulation.

Campsites & Resorts

Create warm, practical and resistant spaces
Around a pool, in front of accommodation, on a small square or near a restaurant, Solea creates easy-to-use meeting places, suited to intensive use and holiday atmospheres.

Campuses & Offices

Make the outdoors a natural extension of workspaces
Coffee breaks, lunches, informal meetings, relaxation moments: Solea encourages hybrid uses and turns outdoor areas into useful, convivial and inspiring places.

Public spaces

Design open, easy-to-read and durable places
Squares, forecourts, gardens, pedestrian streets or waiting areas: Solea structures space without weighing it down, while bringing comfort, greenery and quality of use.

Customisation In your image

Expertise down to the smallest detail

Every project has its own identity
Solea adapts to your graphic universe, your architecture and the constraints of your site. Colours, finishes, engraving, specific configurations: our design office supports you in creating a terrace that is coherent, recognisable and perfectly integrated.

Modularity
Dimensions, compositions, uses, site constraints: our teams adapt the solution to meet your project precisely.

Customisation
Logo, brand name, pictogram or visual: engraving embeds your identity directly into the material, with elegance and durability.

Special colour
Your ideas are studied beyond the standard options to harmonise your furniture with your concept, facade or graphic guidelines.

Floor fixing

Two solutions for distinct needs

Anchored to the ground

For durable fixing - AKL01105

Ideal for permanent installations and high-traffic areas. The screw fixing ensures a solid and secure hold in the ground.

- maximum stability
- withstands intensive use and bad weather
- recommended for durable installations

On adjustable feet

Perfect for modular configurations - PPD04240

Adjustable feet over 25 mm adapt to any type of floor and make it easier to move the furniture.

- mobility and flexibility
- ideal for evolving and temporary terraces

Accessory options

Comfort in the details

Hooks for tables

Discreet and robust, these hooks allow jackets and bags to be placed safely, for greater comfort and mobility.

Cushions for seats and backrests

Bring more comfort and colour to your spaces. These cushions are designed for outdoor use: water-repellent and easy to maintain.

Raised serving shelves for communal tables

The raised tray adds a new function to the tables and creates a dedicated space for shared dishes or personal belongings.

Options

The extra touch that changes everything

The parasol guide and table insert

The parasol guide makes it easy to integrate a shading solution directly into the table. The insert provides a perfect finish when the parasol is not in use.

Together, they bring more comfort, greater flexibility and a higher perceived quality. A simple yet decisive detail for demanding outdoor spaces.

Materials made for outdoor living

Strength combined with durability

Designed to last, the Solea collection combines refined lines, robust materials and high-quality finishes.

The tabletops and cladding in bio-based high-pressure compact HPL laminate offer excellent resistance to UV, weather, impact and intensive use. The metal structures ensure stability, safety and longevity, even in demanding environments.

The result: reliable furniture that is easy to maintain and designed to retain its appearance season after season.

Compact laminate

Resistant, dense and easy to live with, compact HPL laminate is particularly well suited to heavily used outdoor spaces. It combines perceived quality, durability and ease of maintenance.

Safety

A design that complies with safety standards for everyone.

Durability

A proven material lifespan of up to 10 years.

Resistance

An advanced treatment for greater resistance to the elements.

Easy maintenance

A simple process available to increase longevity.

Metal

Metal structures provide robustness, stability and visual lightness. In electrogalvanised steel or aluminium with a powder-coated finish, they guarantee excellent durability over time while retaining a light, contemporary silhouette.

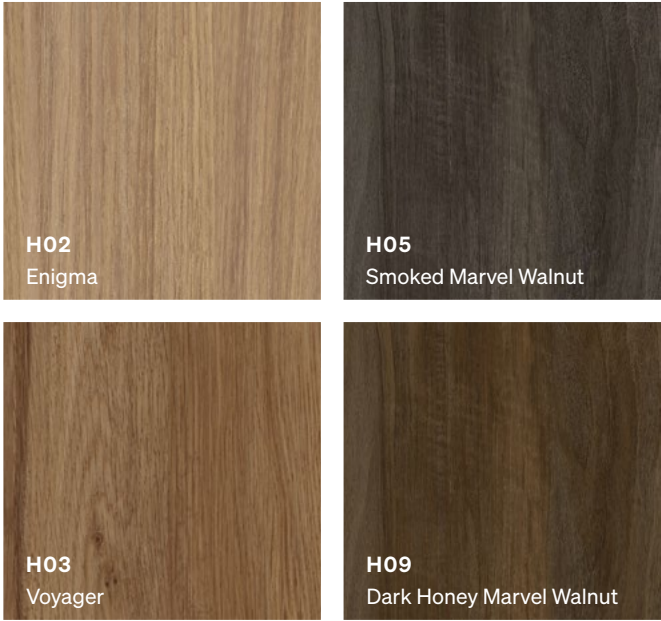

Colour chart

Colour to seal an identity

Choosing a colour is already telling a story
Solea offers a palette of shades and decors designed to suit every environment: natural, urban, contemporary or warmer settings.

Wood effect, mineral tones, deep blacks, metallic finishes: each combination helps create an atmosphere consistent with your place, your brand and your customer experience.

Compact laminate decors

Metal finish

Seating with backrest

Comfort that extends shared moments

Natural support for settling in
and staying

With their understated lines and natural support, Solea seats with backrests invite users to sit comfortably, without constraint.

They fit naturally on a restaurant terrace, rooftop, reception area, campus or relaxation zone. Their balanced design combines comfort, resistance and ease of use.

Designed for outdoor use and intensive use, they accompany everyday moments with discretion, solidity and elegance.

More comfort.
More shared enjoyment.

Dining sets, or not!

Conviviality reinvented

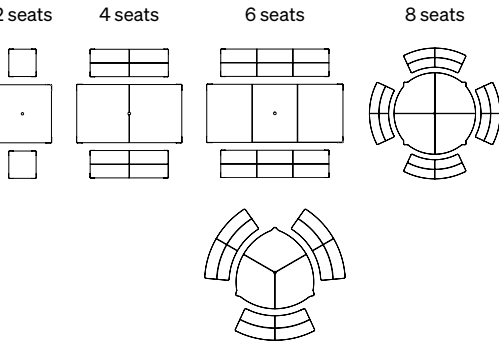

Lunching, chatting, working, waiting, getting together: Solea sets adapt to every use.

Available in several formats, from 2 to 8 people, they make it easy to create convivial, easy-to-read and efficient spaces. In standard or high versions, they create varied atmospheres: group meals, quick breaks, exchange islands or more intimate spaces.

Simple shapes for unique comfort

Solea sets optimise space without sacrificing comfort. Their streamlined design makes layout, circulation and everyday maintenance easier.

Higher versions for greater privacy

The high versions create more dynamic and more intimate zones. Ideal for giving rhythm to a terrace, they encourage spontaneous exchanges and add depth to the layout.

For two, four or eight: everyone finds their place.

Low elements

An invitation to slow down

Solea is not limited to dining areas

With its lounge elements, the range makes it possible to imagine calmer, more flexible and more relaxed zones. Coffee tables, occasional seating and modular compositions create break areas,

waiting spaces or informal conversation spots.
Another way to enjoy the terrace, softer and freer.

Every corner has its combination

Small area, great potential

Solea low elements make it possible to use every available space to create a richer and more welcoming experience.

Here, people do not just sit down. They switch off.

Waste management

The environment as a priority

Elegance serving sustainable spaces

Waste management is an integral part of outdoor furnishing. With Solea, it becomes simpler, clearer and more attractive. Sorting solutions integrate naturally into the terrace thanks to finishes coordinated with the furniture. They make good habits easier, improve the cleanliness of spaces and contribute to a more responsible experience.

Modularity and mobility to simplify everything
Mobile, modular and easy to position, Solea sorting solutions adapt to the flows, uses and constraints of each site.

A simple gesture that changes everything
Well placed, clearly identified and well integrated: an effective solution naturally encourages the right reflexes.

Because a beautiful space is also a well-designed space.

Arranging the space

Defining, protecting and greening

Guaranteed protection and visibility

Windbreaks protect users while preserving visibility and light. They improve comfort without making the space feel heavy.

Greening and structuring the layout

Planters bring a warm plant presence while serving as visual markers and natural dividers.

Structuring space without closing it off

A successful terrace can be understood at first glance

With its barriers, planters and windbreaks, Solea helps structure spaces, guide circulation, preserve comfort and create more intimate atmospheres.

The range defines without partitioning, protects without isolating, and greens without cluttering. It gives rhythm to the layout while enhancing quality of use.

A better-structured space means a better-lived experience.

The coffee table
