

KITO

AUBRILAM

Compact area, great effect

Kito focuses on the essentials whilst still making a clear design statement. The cross-shaped frame characterises the unmistakeable character of the series: graphic, light and impressive.

Designed for spaces where every square meter counts, Kito blends just as naturally into more spacious interior designs. From an

espresso to a meal together – with configurations for two to eight people, you can create spaces suitable for any purpose. Designed for outdoor use, Kito combines robust metal frames with UV-resistant high-pressure laminate. Durable, modular, individually adaptable and easy to maintain, the range creates space for sociability and encounter – regardless of the available area.

Conviviality for up to 8 people

Modular

Designed for outdoor use

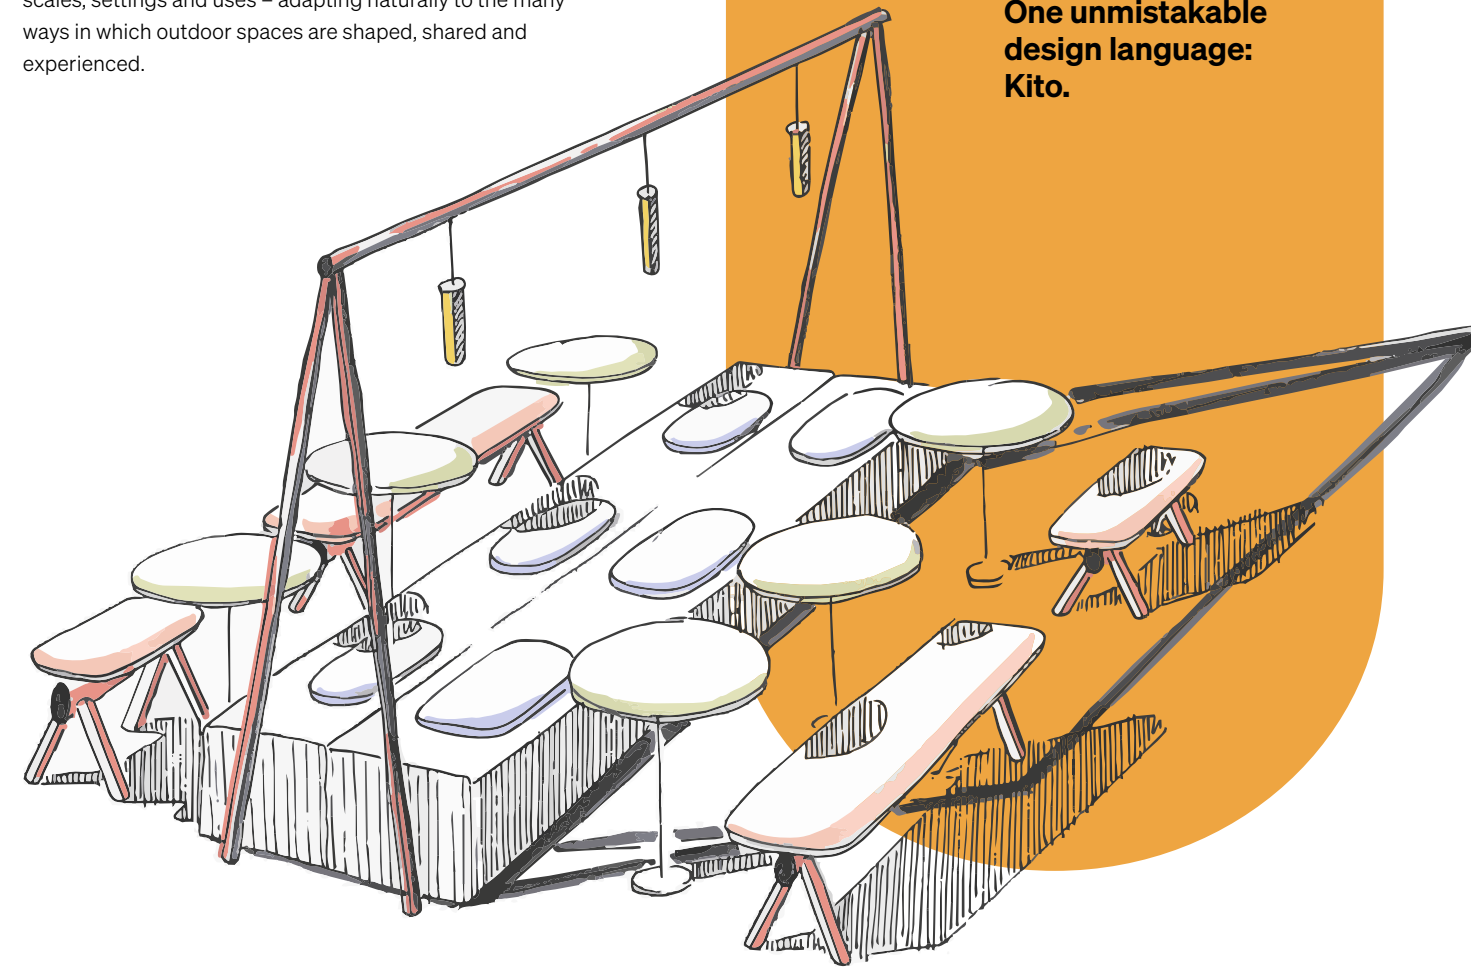

A clear idea, a strong signature

Kito was born from a clear construction principle: a cross-shaped assembly both functional, graphic, and easily adaptable. From this essential gesture, an entire range has emerged. Tables, benches, seats... each element uses the same formal vocabulary, with a deliberately simple design capable of offering multiple configurations.

From the earliest sketches, the vision was to create a collection that could move effortlessly between different scales, settings and uses – adapting naturally to the many ways in which outdoor spaces are shaped, shared and experienced.

**Different products.
Different settings.
One unmistakable
design language:
Kito.**

AUBRILAM, world leader in outdoor terrace furnishing.

Your needs shape our solutions

For nearly 50 years, AUBRILAM has been imagining, designing and deploying outdoor furnishing solutions made to last. With more than 700 terraces equipped every year (and a 30-year partnership with McDonald's), AUBRILAM supports major brands and local authorities in creating high-performance, welcoming and durable outdoor spaces.

A 100% integrated company

Our strength: complete control of the project, from idea to installation. Design, R&D, purchasing, production, quality, logistics, installation, maintenance and after-sales service: everything is integrated to ensure consistency, responsiveness and reliability.

40 years of experience

Recognised expertise in outdoor furnishing.

+ de 700 terraces delivered per year

Large-scale projects deployed all over the world.

Our expertise

Lighting solutions • Urban furniture
Restaurant terraces

Our services

Simplicity in 3 steps

With AUBRILAM, every project moves forward simply

We support you at every stage to design a terrace suited to your site, your uses and your identity. From layout to after-sales service, our teams provide complete, precise and efficient support.

1

Consulting

We help you imagine the right configuration: layout plan, 3D visualisation, choice of elements, customisation and optimisation of uses.

2

Installation

Our experienced technicians work on all types of sites and surfaces, using suitable and durable fixing solutions.

3

Maintenance

Because a terrace is used every day, we handle the replacement of worn or defective parts, with a responsive and attentive after-sales service.

**Kito is there for
the moments that
matter.**

Hospitality

The essentials, consistently through out

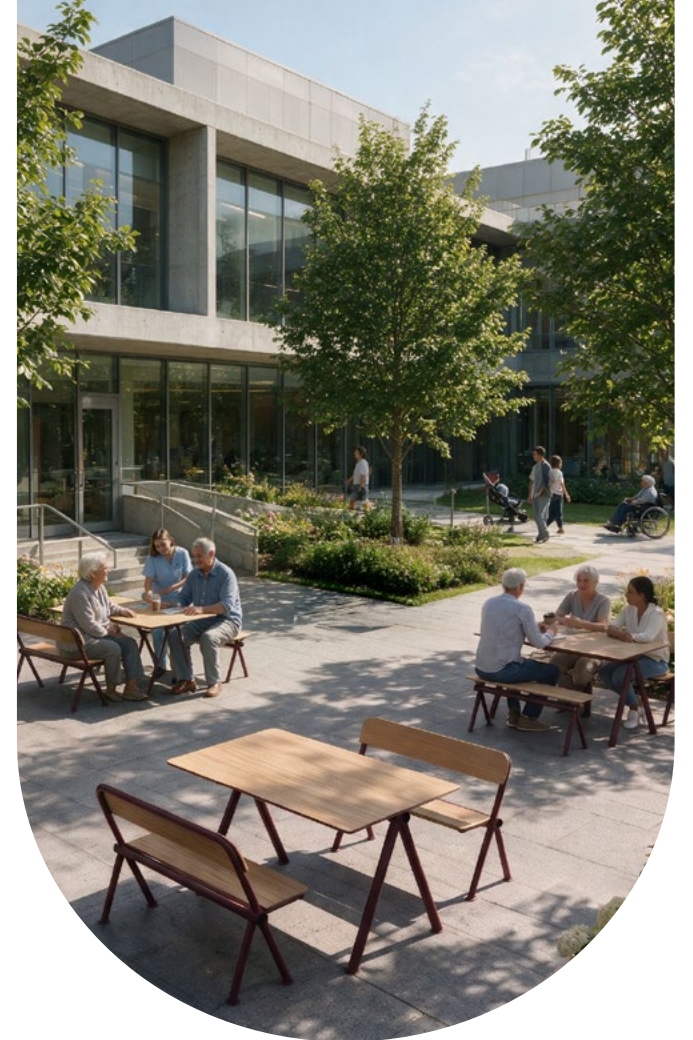

From your first coffee in the morning to dinner on the terrace – Kito creates the perfect setting for socialising and spending time together with compact, durable and versatile solutions.

Leisure

A break that remains part of the experience

Kito creates inviting spaces for relaxing breaks. Robust, modular and designed for intensive outdoor use, the range meets the requirements of catering and leisure areas.

Contract

Designing spaces for everyday life

Kito creates spaces that invite people to linger, exchange ideas and meet. Thanks to a wide range of configuration options, the range adapts flexibly to different uses and requirements whilst ensuring a clear, uniform appearance.

Materials made for outdoor living

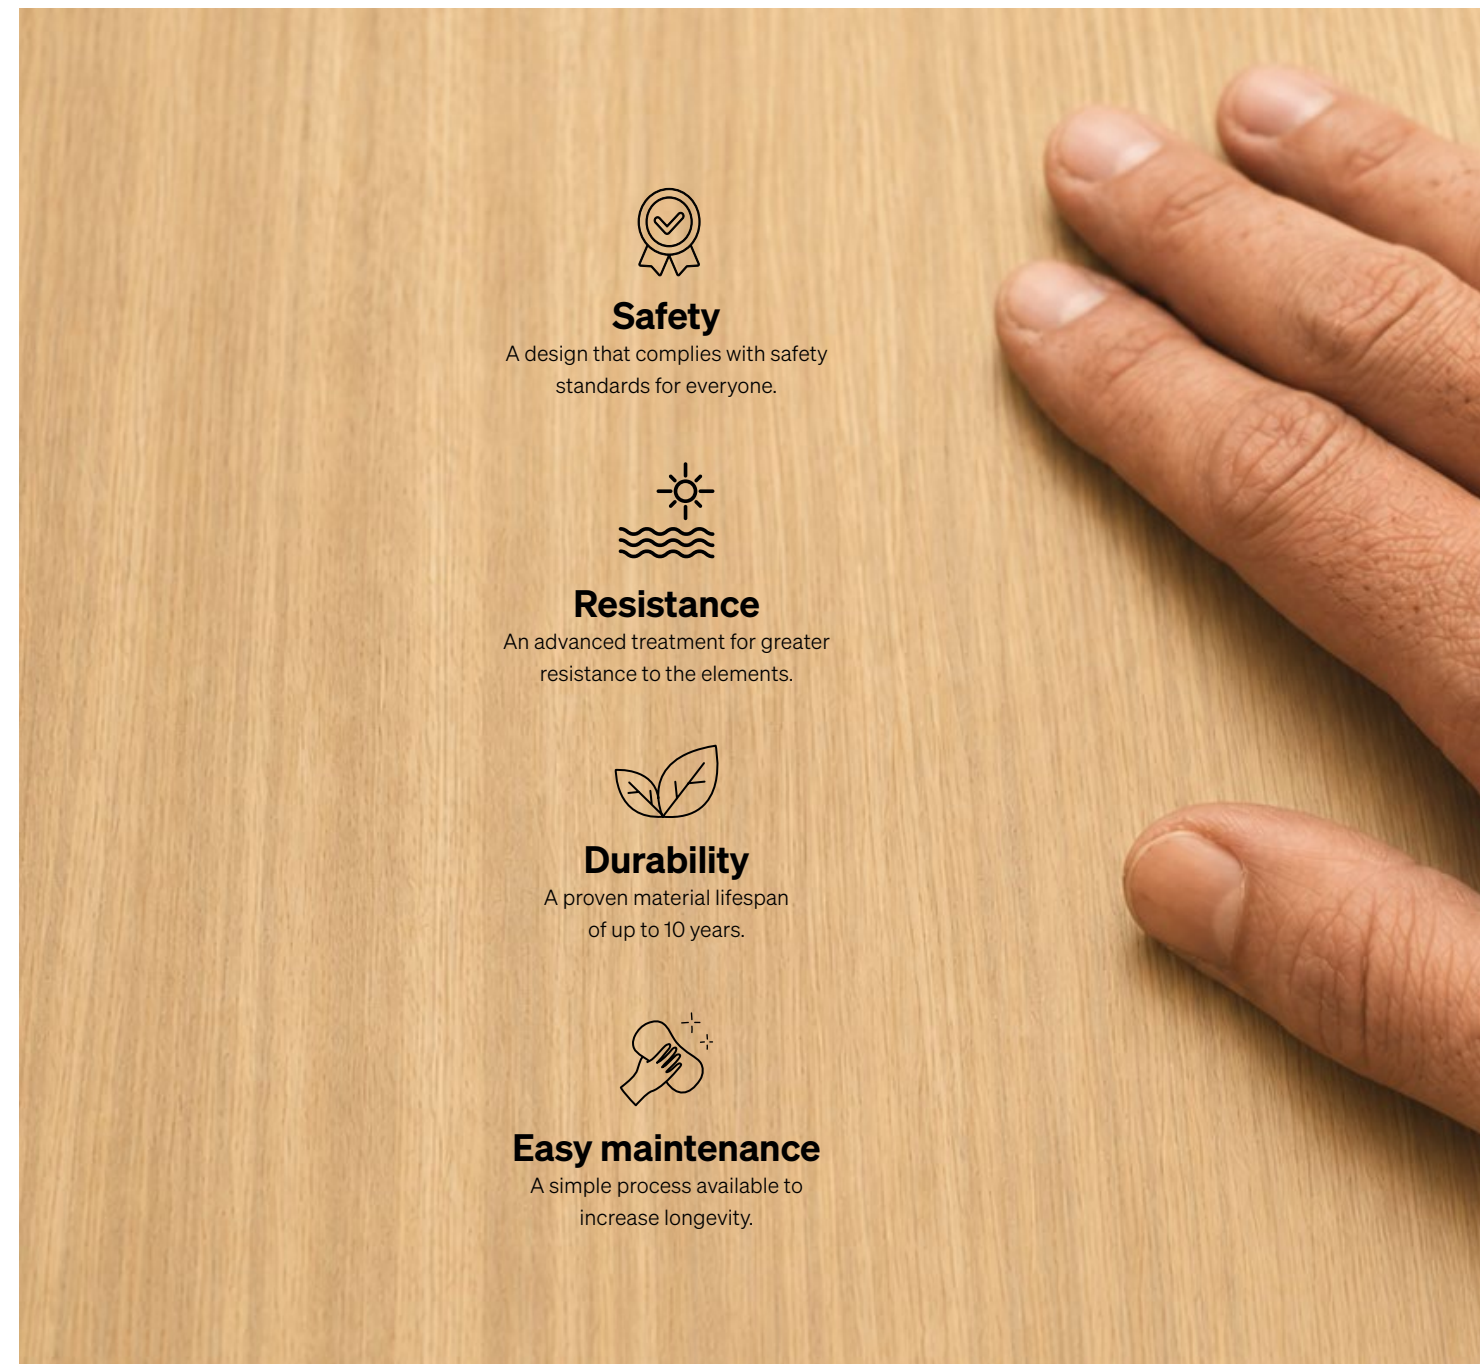

Strength combined with durability

Compact laminate

Resistant, dense and easy to live with, compact HPL laminate is particularly well suited to heavily used outdoor spaces. It combines perceived quality, durability and ease of maintenance.

Metal

Les structures en acier inoxydable apportent robustesse, stabilité et signature visuelle. Protégées par un thermolaquage polyester, elles offrent une excellente résistance aux conditions extérieures tout en conservant une silhouette épurée et contemporaine.

Safety

A design that complies with safety standards for everyone.

Resistance

An advanced treatment for greater resistance to the elements.

Durability

A proven material lifespan of up to 10 years.

Easy maintenance

A simple process available to increase longevity.

Colour chart

Colour to seal an identity

Choosing a colour is already telling a story
Kito offers a palette of shades and decors designed to suit every environment: natural, urban, contemporary or warmer settings.

Wood effect, mineral tones, deep blacks, metallic finishes: each combination helps create an atmosphere consistent with your place, your brand and your customer experience.
