Litter bin

Technical description

Litter bin made of Molded plywood composed of 9 layers of beech wood from sustainably managed forests, PEFC certified. 12 mm thickness with double-sided laminate veneer. Outdoor protection with 4-layer varnished edges, including 2 protective saturation layers, 1 UV-resistant layer, and 1 pigmented UV-resistant coloration layer. UV resistance tested and validated by CNEP. Manufacturing process and outdoor durability tested and validated in the laboratory by CRITT Bois. Fire reaction class EUROCLASS D-s2, d0 according to EN 13501-1 standard.
Structure made of stainless steel, polyester powder-coated.
Removable galvanized steel bin.
Seawater atmosphere protection available upon request.

Dimensions: 580 × 410 mm • H 1130 mm
Capacity: 60 liters
Weight: 24 kg

Lifespan

The estimated lifespan of the product exceeds 25 years.
Depending on usage, the estimated lifespan of molded plywood is over 7 years.

Maintenance and lifespan

In order to maintain the performance of the products and their aesthetics, it is advisable to clean molded plywood with soapy water using a soft (non-abrasive) sponge, then wipe and drying with a clean, soft cloth. Refer to the manufacturer's instructions for more details.
It is recommended to regularly clean metal surfaces with soapy water. Make sure to use non-aggressive products. Never use corrosive products or scouring pads. Once a year, check that there are no signs of oxidation on the metal parts.

Installation

Floor fixation required.

Cuztomization

Customization available upon request.

Finish

The finish presented is in compact laminate 0870 NT – Dark Honey Marvel Walnut and Black 2100 sanded metal, **code +.H09.M05**. Finish options available in any of the standard shades from the AUBRILAM color chart.
