Optional: armrests or backrest
Wood: Accoya® wood

Notche

Stool and benches

This furniture brings together wood and metal, echoing the idea of the notch. It is designed to reflect a dialogue between straight and curved lines, achieved through precise adjustment of materials.

The Notche benches represent an extension of the stool. It extends out to provide longer seating for two or three people.

These products have been designed to offer multiple combinations. They can stand alone or be part of a modular system that adapts to the type of project.
