

Quality Policy

The heart of the AUBRILAM brand is to make cities unique, beautiful and intelligent through lighting products, furniture and associated services.

We have been enhancing outdoor spaces for over 40 years.

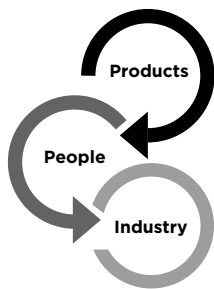

The latest economic and environmental challenges have naturally prompted us to reinvent our business, our solutions and our products. A space is always in motion and living. The material AUBRILAM brings to these spaces is living and sustainable, adding meaning, beauty and creating a place for people to live and interact, everywhere and for everyone.

Our living spaces, both now and in the future, deserve to be designed with furniture that benefits everyone. We put all our energy into bringing it to life.

**We strive every day to keep our original values intact:
respect for the environment, innovation and product quality.**

AUBRILAM, a company in the BEGA Group, has always been committed to the same philosophy, which is to manufacture high-quality products that last over time and blend in harmoniously with the surrounding architecture, by day and by night. With innovation as our guiding principle, we respond to and forward-think the demands of our markets.

There are 3 key elements to this:

Our products

We bring innovative, standout, sustainable, quality products to the market.

Our people

Every employee is involved in the continuous improvement of our products and manufacturing processes.

Our industry

Our industry is constantly moving forward technologically, enabling us to match our customers' expectations.

With our Quality policy, we seek to maintain and bolster our market position by providing products and services that meet our customers' requirements and comply with legal and regulatory requirements.

This makes AUBRILAM a valued partner for outdoor space developers.

AUBRILAM is fully committed to a quality approach based on the NF EN ISO 9001 standard to ensure the implementation of its Quality policy.
