

# Label and Digital Sheet Range

**Specialist supplier of self-adhesive materials to the printing industry**

QUALITY | RELIABILITY | SERVICE | INDEPENDENT ADVICE

# introducing SAM

SAM is a major supplier of adhesive coated products to the printing sector. Our extensive product range is available from leading paper merchants in label, sheet or reel formats.

SAM's label and digital ranges are sold under our own brand names which include Perfect Labels; suitable for laser, inkjet and litho printing and Perfect Digital which is a range specially developed for the digital printing market.

SAM can also provide a bespoke die cutting service for 'one-offs' or short runs without the requirement for expensive tooling and can even die cut before or after printing.

Our digital range has been strengthened recently with the addition of the Fasson Digital range which can be supplied in SRA3 sheets with the option to incorporate die cut labels in any of the grades.

At SAM it's our service that sets us apart and, with extensive stocks and short lead times, our service is second to none.

## the RANGE

<ul style="list-style-type: none"> <li>■ <b>SHEETS</b></li> </ul>	A SRA3 range of self-adhesive sheets and labels developed to meet the exacting demands of the SRA3 digital market where trouble-free running and print quality are key requirements.	<b>PAGE 4</b>
<ul style="list-style-type: none"> <li>■ <b>LABELS</b></li> </ul>	SRA3 and SRA2 sizes are also available, suitable for digital and litho printing.	<b>PAGE 6</b>

<ul style="list-style-type: none"> <li>■ <b>MULTI-PURPOSE LASER</b></li> <li>■ <b>COPIER</b></li> <li>■ <b>INKJET</b></li> </ul>	<p>An A4 range of labels designed to combine trouble-free feeding through laser, copier and inkjet printers together with excellent toner fusing qualities. The adhesive is formulated to withstand the high temperatures associated with some of these printing processes and is also suitable for litho printing.</p> <p>The range includes a number of Avery compatible sizes/layouts.</p>	<b>PAGE 9</b>
<ul style="list-style-type: none"> <li>■ <b>PRINTER'S LABELS</b></li> </ul>	<p>The Perfect label range of printers' blanks is specifically designed for litho printing where a more rigid sheet is preferred and an ink receptive surface is important. They are also compatible with most laser, digital and inkjet processes and are therefore an ideal choice if pre-printing is required.</p> <p>Available in 5 sheet sizes and packed 200 sheets per box. A choice of adhesives and face materials are available as standard, including colours and cast coated face papers. Now available in SRA2 sheet sizes too!</p>	<b>PAGE 10</b>
<ul style="list-style-type: none"> <li>■ <b>SPECIALITY LAMINATES</b></li> </ul>	A range of A4 sheets packed 100 or 500 sheets per box	<b>PAGE 12</b>
<ul style="list-style-type: none"> <li>■ <b>A4 SHEET RANGE</b></li> </ul>	A wide selection of face materials including paper and boards, colours, fluorescent and filmic materials, available in solid back and split back options and a choice of adhesives in A4.	<b>PAGE 13</b>
<ul style="list-style-type: none"> <li>■ <b>LABELS ON ROLLS</b></li> </ul>	Ask about our range of labels on rolls including thermal labels and a range of UK produced thermal transfer ribbons suitable for all the major makes of printers.	

<ul style="list-style-type: none"> <li>■ <b>CUTTING SERVICE</b></li> </ul>	We are now able to offer a bespoke cutting service for one-off or short-run labels without the need for expensive tooling. For larger runs we can switch production to our new precision die cutting machine for perfect register in sizes up to SRA2.	<b>PAGE 14</b>

## NEED TO LAMINATE STOCK TOGETHER?

The **NEW SAM Double-Sided Adhesive** is the product you should be using!

SAM has introduced a double-sided adhesive sheet which allows customers to laminate two sheets together after printing or turn a plain sheet into a self-adhesive sheet. The product is easy to use: simply remove one of the silicon coated backing sheets and apply the exposed adhesive face to the sheet to be laminated. You can now use the construction as a self-adhesive product or, by removing the second backing sheet, you can laminate a second sheet.

**HANDY TIP** When laminating two sheets, use two similar thickness sheets as it helps to keep the material flat

**SAM Double-Sided Adhesive is available in sheets as large as B1 down to handy 100 sheet boxes of 320mm x 460mm.**

**It's an economic, clean and easy solution for laminating material or making your own self-adhesive sheets.**

Want to know more about selecting the right Film? Go to our website [www.samukltd](http://www.samukltd), select information and scroll down to film info.

Other sizes, materials and pack sizes available on request

**NEW:** Bespoke Back splits and labels available. Sheets can be supplied with Die Cut Labels or Custom Face Splits

320mm x 450mm Suitable for Litho, Laser and Copier Toner Based Systems and HP Indigo.

Available as standard in Machine Coated Permanent Adhesive - 100 Sheets Per Box or in any of the materials in our Perfect Digital Sheet Range on pages 4 and 5.

**Other sizes, materials and pack sizes available on request**

**Standard Layouts**

The label layout is standard on all label sizes giving a consistent 13.25mm margin on the leading edges (both grip and lay) and with a constant 2.5mm gap between the labels.

**More Labels per Sheet**

The label layouts are designed to use the available area as efficiently as possible which means we get as many labels on a sheet as we can. More labels per sheet help to reduce production cost and wastage and it's environmentally sensible.

**Bespoke Cut service**

Our new Bespoke Cut service can supply labels in a wide range of stock materials or even die cut your own material using our advance print registration equipment which ensures accurate die cutting and creasing, even if the print wanders a little. See page 14.

**NEW**

Labels now available in any of the Digital Sheet Grades.

Bespoke Die Cutting Service for small runs without need for tooling

Precision Die cutting guarantees consistent and accurate die cutting

ALSO, PRECISION DIE CUT SHEETS NOW AVAILABLE IN SRA2

**ASK FOR DETAILS**

# perfect labels

The Perfect Label range provides the perfect solution to your labelling needs with a comprehensive range of specially developed products that cater for all of the major printing techniques and applications. Accurate die cutting guarantees perfect register every time and the high quality adhesive ensures superb performance on an extensive range of substrates

**SAM's products are available through leading paper merchants**

QUALITY | RELIABILITY | SERVICE | INDEPENDENT ADVICE

# choosing THE RIGHT PRODUCT

First decide what the primary printing process will be. For example, if the main printing process is litho, select a label from the Printers range which has a face paper ideally suited for this process. Alternatively, if the primary printing process is laser, copier or inkjet select a label from this range.

Next, select the label size. All label sizes are listed with the smallest dimension first and in ascending size order. Now finally check the sheet size, adhesive and printing surface is suitable.

A range of sheets and labels are available in SRA3 and SRA2 sheet formats in the Perfect Digital and Printers range, all made by precision die cutting.

Most materials can be printed by any of the conventional printing processes.

A wide range of face materials and adhesives are available in the Bespoke Label Range and A4 sheet range if you are looking for something special.

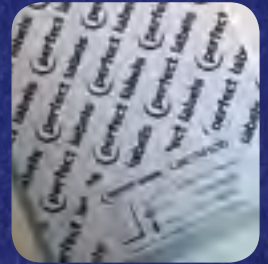

Please ensure that materials are thoroughly tested to ensure that they satisfy the requirements of the end user and are compatible with the printing and conversion processes.

## LABEL RANGE at a glance

### MULTI PURPOSE LASER, COPIER AND INKJET

Packed 100/500 sheets per box as standard, our speciality laminate range of materials are available in any of the listed sizes. With only a one box minimum and a guaranteed fast lead time, speciality labels can be produced to satisfy most requirement. The range is ideal for any job size and being packed 500 sheets per box reduces handling time and saves on wasteful packaging if larger volumes are needed.

## BESPOKE REQUIREMENTS

A wide collection of tools exist (or can be made) to provide a label in a size or material to suit your specific requirement. Labels are also available in roll and fanfold formats. Bespoke features including perforations, window trims, peel out sections, special packaging etc. are also available.

# bespoke cut

## PERFECT LABELS

We are now able to offer a bespoke cutting service for one off or short run labels without the need for expensive tooling. For larger runs we can switch production to our new precision die cutting machine for perfect register in sizes up to SRA2.

Bespoke features including perforations, window trims, peel out sections, special packaging etc. are also available

**SAM's products are available through leading paper merchants**

# The **(perfect answer** to short run die cutting

A bespoke die cutting service is available for one-off or short run jobs which can be achieved without the need for costly tooling.

The Bespoke Cut service offers an economic alternative to conventional label production on runs up to approximately 200 sheets. The smaller the run the more cost effective this service becomes.

All we need is an outline of your label or your final layout and we will supply die cut sheets in any of the materials that we stock. Alternatively, we can create the artwork and templates for you.

We can also die cut after printing or even cut out shapes completely using our advanced registration mark sensing system and can accommodate a maximum sheet size of 610x920mm.

Our equipment is also capable of cutting a wide range of non self-adhesive products, ranging from corrugated and microflute boards, high density foam boards and signage materials up to approximately 1.5mm thick.

## **Advantages:**

- You can buy as little as one sheet of labels
- No need for expensive tooling
- Die cut before or after printing
- Face, back or diagonal splits are all possible
- Maximum sheet size up to 610x920mm
- Wide range of self-adhesive substrates and adhesives available
- Speeds up job turn round times by using pre-cut labels
- Capable of cutting a wide range of non self-adhesive products up to 1.5mm thick.
- Shapes can be cut out completely.
- Guaranteed standard of quality and service synonymous with the Perfect Label range

SAM's latest acquisition in our constant drive to improve our service to you is a new sheet fed label press that can die cut labels in sheets up to SRA2. It provides precision die cutting in perfect and consistent register and will die cut material up to 600 $\mu$ . The press is equipped with waste stripping facilities and it is also possible to insert face slits or back slits. This press is ideal for large runs.
