

DENTON COUNTY GREENBELT PLAN IMPLEMENTATION GRANT PROGRAM

REQUEST FOR APPLICATIONS SUMMARY

Purpose and Benefits:

Upper Trinity Conservation Trust (UTCT) is accepting applications to provide funding for projects that implement on-the-ground practices and activities that will provide water quality benefits and help to accomplish the goals of the Denton County Greenbelt Plan (www.DentonCountyGreenbeltPlan.com).

Eligible Properties and Applicants:

- Rural and Urban Properties
- Private Landowners
- Municipalities
- Utilities or other Municipal Governmental Districts
- Non-profit organizations (e.g. 501(c)(3))

Projects that are eligible for funding include, but are not limited to:

- Riparian restoration (planting, seeding or similar activity that would lead to a diverse and resilient riparian area)
- Land management practices that improve natural processes that can reduce erosion and benefit water quality
- Green stormwater infrastructure
- Educational signage or similar items

Projects that are not eligible for funding include, but are not limited to:

- Planning and/or design efforts
- Trail development

Requirements:

- Applicant(s) must adopt the Denton County Greenbelt Plan by resolution or provide written letter of support.
- Projects must be within the watersheds of Lakes Grapevine, Lewisville or Ray Roberts or the Elm Fork of the Trinity River downstream from Lewisville Lake.
- Application must be filled out completely and sent to balldredge@utrwd.com.

Background and Purpose

Denton County contains three major drinking water supply reservoirs (Lakes Grapevine, Lewisville and Ray Roberts) which are fed by thousands of miles of creeks and rivers that flow through privately-owned lands and cities. These reservoirs are also a major recreational and economic benefit for residents. As Denton County urbanizes, preserving riparian greenbelt corridors - the vegetated areas along creeks, rivers and lakes - will help protect water quality in the County's reservoirs.

The Denton County Greenbelt Plan (Plan) was adopted in 2017 as a guide to preserve riparian greenbelt corridors and protect water quality in the creeks, rivers and lakes in the County that act as a natural filter and help to stabilize banks, among other benefits. The Plan also encourages implementing green stormwater infrastructure practices to reduce the amount of stormwater runoff (and associated pollutants) from urbanized areas. More information about the Plan can be found at www.DentonCountyGreenbeltPlan.com.

Grant Guidelines and Requirements

Upper Trinity Conservation Trust is accepting applications for projects that implement on-the-ground practices and activities that accomplish the goals of the Denton County Greenbelt Plan. Applicants must have either adopted the Plan by resolution or proclamation, have a co-applicant (Project Partner) that has adopted the Plan, or provide a written letter of support of the Plan that can be included with the application.

Applicants should submit proposals for projects that range in cost from \$5,000 - \$20,000 with the final funding amount to be determined by UTCT based on the value of the project and/or other projects that may be requesting funds. Projects with total costs greater than \$20,000 will be accepted but should consider including matching funds if needed to cover the costs of the project since UTCT funds are limited. UTCT funds may also be used as match for other grant opportunities. Please contact us to discuss this possibility. Projects will be scored and ranked based on the points assigned to each question in the application for a total of 100 points. Final decisions on funding projects will be made by the UTCT Board of Trustees.

Projects that are eligible for funding include, but are not limited to:
