

Starlight Gaming

Starlight Gaming stations provide kids with hours of fun and distraction. Powered by Nintendo®, Starlight Gaming stations are designed so they can roll anywhere in the hospital. They are manufactured to meet strict infection safety protocols, and they allow children to play video games or stream their favorite movies and TV shows from the comfort of their hospital bed or in a playroom with a group of kids. Starlight Gaming provides hours of entertainment and a sense of normalcy to hospitalized kids.

Since 1992,

7,200 Starlight Gaming Stations

have delivered happiness to over

11.6 million children at more than

800 children's hospitals & pediatric units

in all 50 States and Puerto Rico.

The Starlight Gaming Stations are an incredible and unique tool that helps turn a sick or injured child's pain, fear and stress into smiles and laughter by providing them with the best in entertainment, education, and one-of-a-kind experiences. We are thrilled and thankful to Starlight Children's Foundation for this generous gift.

—Anthony Scaduto, M.D., Orthopedic Institute for Children

Play

Highly interactive experiences engage children through mastery and achievement.

Entertainment

Playing popular games provides children a much-needed sense of relief and distraction from stressful situations.

Socialization

Gaming gives pediatric patients an opportunity to connect with their siblings, peers, and clinicians.

Normalization

Playing video games provides structure, familiarity, and security during hospitalization.

Emotional Support

Video games redirect a child's focus, resulting in reduced anxiety and improved mood.

Pain Management

Engaging with games that require user participation leads to less perception of pain at the central brain level.

Physical Therapy

Unique features of the gaming units allow physical therapists to capitalize on their patients' functional abilities in a fun way.
