

Starlight Hospital Wear

The transition from one's own clothes to traditional hospital wear is one of the highest stress moments in a child's hospital experience. Starlight Gowns™ are superior to regular hospital gowns because they are better at supporting both the functional needs of hospital staff and the psychosocial and emotional needs of pediatric patients.

Since 2016, over

250,000 Starlight Gowns

have been distributed to seriously ill children at more than

350 hospitals & pediatric units

in 48 states

92%

of family survey respondents agree or strongly agree that their child feels better about how they look in a Starlight Gown than a traditional hospital gown.¹

86%

of staff report that Starlight Gowns make it easier for medical staff to build rapport with seriously ill children and their families.

87%

of staff report that the Starlight Gown's design makes performing routine tasks easier and more efficiently for medical staff and less stressful for children.¹

“

I had a young 6-year-old child who was extremely anxious. Once the child saw how fun this gown was, he was immediately ready to change, and became more compliant and at ease. By seeing him become less anxious, his family members also became calmer.

—Lexi Little, CCLS, CHRISTUS Shreveport-Bossier Health System

Comfort

Starlight Gowns are softer, provide more coverage, movement, and a better fit than a regular hospital gown.

Socialization

The colorful gowns are a conversation starter with everyone from clinical staff to other patients.

Normalization

Familiar characters and kid-friendly designs remind children of comfortable pajamas from home.

Procedural Support

Clinicians can easily perform routine medical procedures with multiple points of access.

Emotional Support

Choosing an outfit provides an outlet for kids to express emotions and identity through their appearance.
