

# HABITATS: FINDING A PLACE TO LIVE

Name: \_\_\_\_\_

Class: \_\_\_\_\_

Your challenge is to find a new home for **Beena** somewhere around your school!

1 • Tick what **Beena** would need in her new home

☐ Water 

☐ Predators 

☐ Food 

☐ Shelter from the Sun 

☐ Lots of Humans 

**FACT**

Bees like to live in areas between 20°C and 30°C, even in the summer!

Look around your school to see if you can find some places that would be good for **Beena** to make her home. Measure the temperature of each place with a thermometer to make sure it is not too hot, or too cold.

PLACE	TEMPERATURE °C	CAN BEENA LIVE HERE? ✓ OR X

2• Which one of the places did you find around school that would make the best habitat for **Beena**?

3• What improvements could you make to this place to make it even better? Write or make a drawing showing the improvements you would make.

DID YOU  
KNOW?

Special '**Beebricks**' are being used in some towns in England so that Bees have a safe place to live.

Do you think they are a good idea? Would you like to see *beebricks* in your home?
