

CITIES THAT MOVE US: DESIGNING HEALTHIER, HAPPIER, GREENER COMMUNITIES

As the world navigates rapid urbanization, the need for sustainable city design echoes across the globe. The innovations and strategies forged in this era will chart the course for vibrant, resilient communities for generations ahead.

The surging demands of climate change, escalating pollution levels, sedentary lifestyles, and the erosion of natural spaces heighten the need for integrating health, happiness, and greenery into urban fabrics.

How will the fusion of movement, well-being, and nature redefine our cities and societies? Can we tackle the ethical, environmental, and inclusive challenges while unlocking the true promise of regenerative urban planning?

Application Questions (Audio submission should answer one of these questions)

How can nature-based design solve urban challenges like flooding or heat?

What does a wellness-conscious school, mall or community look like?

How can we make well-being accessible for everyone?

How can we build better buildings in a sustainable city?

Please ensure students would be available for all rounds before applying.

SESSION DATES

Round 1:	7 October (120 students)
Round 2:	15 October (20 students)
Round 3:	23 October (10 students)
NGWM Session:	28 October (4 students)

SUBMISSION DEADLINE

26 September 2025

TERRA, EXPO CITY DUBAI
