CLIMATE CRISIS

HOW DID WE GET THIS FAR?

DARE TO CHANGE:

The role of future generations in solving the climate crisis.

Humanity's actions of the past and present are threatening our existence in the future. Are we set on an irreversible course, or will you - the next generation - find the solution?

Data shows that the Earth's climate is warming at an accelerated rate. Atmospheric carbon dioxide and methane are at record levels, with extreme weather events becoming more frequent, damaging, and deadly.

There is overwhelming scientific evidence demonstrating the extent to which human activity has accelerated the climate crisis, leading 196 parties to sign a legally binding treaty on climate change during COP 21 and pledging to limit global warming to 1.5oC (compared to pre-industrial levels). Humanity is investing great faith in renewable energy advancements and green transport, but is this enough?

With the "climate clock" currently at +1.2597oC and rising by the second, we question where we went wrong and what else we can do to avoid catastrophe. The fate of the world is in the hands of today's youth.

How did the climate crisis reach this point? Can anyone be held responsible?

What are you and your school doing to tackle the climate crisis? Can we all do more?

What if we do nothing or don't do enough? What are the dire impacts on the planet?

If you could ask world leaders for one thing, what would it be?

Please Note: This is an invite only event, where selected students and their peers will be asked to join the Next Gen World Majlis to share their perspective and collectively contribute to building a better future.

SUBMISSION DATE:

7 Nov 2022

SESSION DATE:

21 Nov 2022

VENUE:

Expo City Dubai, Terra

TIME:

10:00 AM to 12:00 PM
