Terra

The World's Living Wonder

Our mission: to create a world where
humans and nature thrive in harmony

The Terra Bees

In 2017 bees were found on the
Terra construction site.

They were carefully rehomed
off-site and cared for
by expert beekeepers.

The Jane Goodall Pollinator Garden

In 2024, the bees were brought back home

Today, approximately 30,000 bees are thriving at the Jane Goodall Pollinator Garden at Terra.

Why bees?

- Pollinators are responsible for 1 in 3 mouthfuls of the food we eat
- The UAE currently imports around 95% of its bees.
- Human activities, such as pollution, climate change, and habitat loss are weakening bee populations in the UAE

Hundred Hives' mission is to:

- to actively increase biodiversity in the UAE.
- to make our school communities active stewards of the natural world.

Hundred Hives aims to:

- Install hundreds of hives in hundreds of schools
- Actively increase biodiversity in the UAE
- Drive academic research around UAE bee populations

Hundred Hives

Guiding Schools from Beginners to Expert Beekeepers

Level 1 **Beginner Beekeepers**

Terra provides all skills and tools necessary for students and teachers to gain confidence in managing their own beehives

Level 2 **Novice Beekeepers**

The school begins to play a more active role in hive maintenance with more students and teachers being trained.

Level 3 **Experienced Beekeepers**

Students and teachers take ownership of hive management, still with support of Terra.
Schools begin supporting Level 1 beekeepers

Level 4 **Expert Beekeepers**

Schools are now independent beekeepers, but continue to actively contribute to the Hundred Hives network.

Hundred Hives Hive Location

have suitable
plants within a
5 km radius

be well-shaded

have a water
source nearby

not be in the vicinity
of heating, ventilation,
and air conditioning
systems

Hundred Hives

How it works

1

May-July 2025

Pre-installation:

Risk assessments,
planning

2

September 2025

Training:

School staff

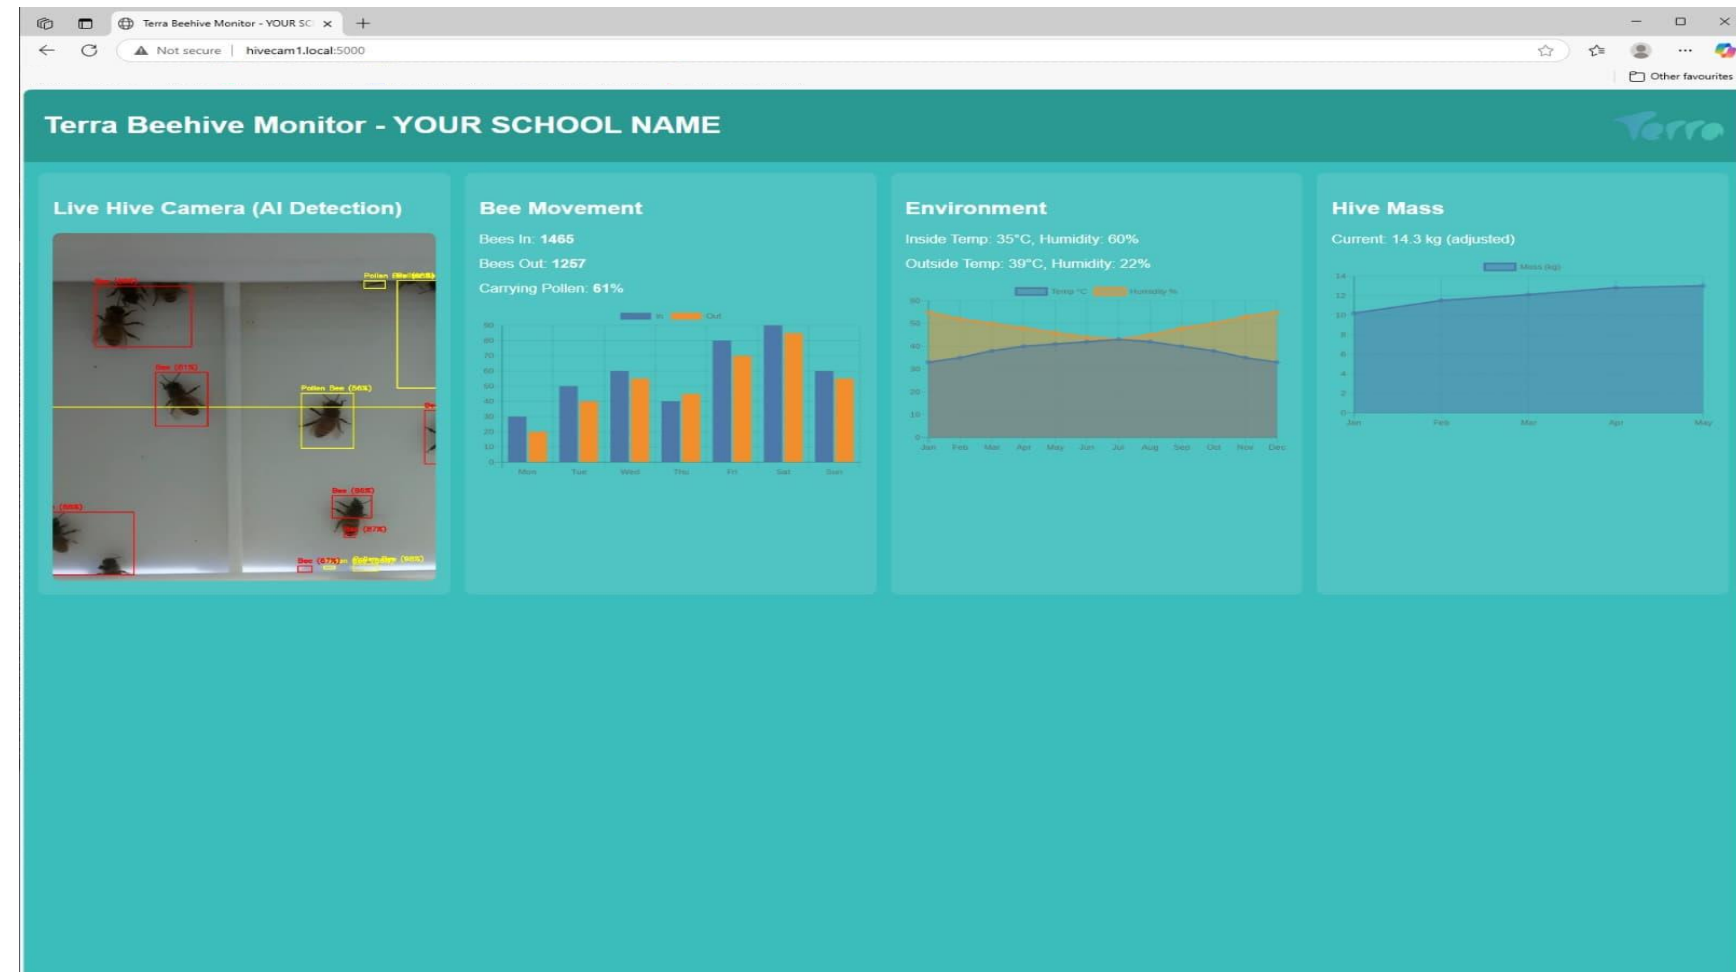

3

November 2025

*Hive Installation
and Start of
Programme*

Hundred Hives Smart Network
