**EdgePoint Global Growth & Income Portfolio**

**Semi-annual Management Report of Fund Performance**

*For the period ended June 30, 2022*

---

This semi-annual Management Report of Fund Performance (“MRFP”) contains financial highlights, but not the Fund’s semi-annual Financial Statements, which may be included at the back of the MRFP. You can obtain a free copy of the semi-annual or annual Financial Statements by calling 1.866.757.7207, writing to EdgePoint Wealth Management Inc., 150 Bloor St. W., Suite 500, Toronto, ON, M5S 2X9, or visiting our website at [www.edgepointwealth.com](http://www.edgepointwealth.com) or the SEDAR website at [www.sedar.com](http://www.sedar.com).

Likewise, unitholders can obtain copies of the Fund’s proxy voting policies and procedures, proxy voting disclosure records and Fund-related quarterly portfolio disclosures.

Please refer to the Fund’s Simplified Prospectus, Fund Facts and the 2021 audited annual Financial Statements for more information.

For the Fund’s current and historical net asset values per unit, please visit [www.edgepointwealth.com](http://www.edgepointwealth.com).

### **Caution regarding forward-looking statements**

This report may contain forward-looking statements about the Fund, including its strategy, expected performance and condition. Forward-looking statements include statements that are predictive in nature, that depend upon or refer to future events or conditions, or that include words such as “expects,” “anticipates,” “intends,” “plans,” “believes,” “estimates,” or negative versions thereof and similar expressions.

In addition, any statement that may be made concerning future performance, strategies or prospects, and possible future fund action, is also a forward-looking statement. Forward-looking statements are based on current expectations and projections about future events and are inherently subject to, among other things, risks, uncertainties and assumptions about the Fund and economic factors.

Forward-looking statements are not guarantees of future performance, and actual events and results could differ materially from those expressed or implied in any forward-looking statements made by the Fund. Any number of important factors could contribute to these differences, including, but not limited to, general economic, political and market factors, interest and foreign exchange rates, global equity and capital markets, business competition, technological change, changes in government regulations, unexpected judicial or regulatory proceedings, and catastrophic events.

We stress that the abovementioned list of important factors is not exhaustive. We encourage you to consider these and other factors carefully before making any investment decisions and urge you to avoid placing undue reliance on forward-looking statements. Further, you should be aware of the fact that the Fund has no specific intention of updating any forward-looking statements whether as a result of new information, future events or otherwise, prior to the release of the next Management Report of Fund Performance.

---

**Management discussion of fund performance**

The management discussion of fund performance presents the views of the portfolio management team concerning significant factors and developments that have affected the Fund's performance and outlook.

Please read the aforementioned caution on the preceding page regarding forward-looking statements.

**Results of operations*****Investment performance***

For the six-month period ended June 30, 2022, EdgePoint Global Growth & Income Portfolio, Series A decreased 11.4% versus a decrease of 16.1% (C\$) for its benchmark, the 60% MSCI World Index/40% ICE BofA Canada Broad Market Index. The MSCI World Index decreased by 18.8%, while the ICE BofA Canada Broad Market Index decreased 11.9%. We manage the Fund independently of the indexes we use as long-term performance comparisons. Differences including security holdings, geographic/sector allocations and the relative weighting between equity and fixed-income investments may impact comparability and could result in periods when our performance differs materially from the index.

During the period, the Fund's outperformance versus the index can mainly be attributed to security selection within the Consumer Discretionary sector. In addition, the Fund's positive allocation effect and security selection within the Information Technology sector further contributed to outperformance. The fixed income securities within the Fund outperformed the ICE BofA Canada Broad Market Index over the period and provided an additional source of outperformance relative to the index.

Please refer to the *Past performance* section for the performance of other series, which differ from Series A due largely to varying expenses and/or taxes incurred by each series, as explained in the Prospectus.

The blended benchmark provides a more appropriate comparison in view of the Fund's investment strategy and asset mix. The MSCI World Index is a market-capitalization-weighted index comprising equity securities available in developed markets globally. The ICE BofA Canada Broad Market Index tracks the performance of publicly traded investment-grade debt denominated in Canadian dollars and issued in the Canadian domestic market.

No sector or security meaningfully contributed to overall performance.

**Meaningful detractors to investment results included:**

- Berry Global Group Inc.
- Affiliated Managers Group, Inc.
- SAP SE
- The Middleby Corp.
- Koninklijke Philips NV

As a group, these companies detracted approximately 3.8% from overall performance.

While we provide these results to fulfill the disclosure requirements of this report, we measure investment success over periods of 10 years or more and believe it takes considerable skill to consistently add value over the long term. We don't believe any meaningful conclusions can be drawn based on such a short period.

***Portfolio transactions***

During the period, the Fund net purchased \$247.9 million worth of investments. Portfolio turnover was 19.2% for the six months ended June 30, 2022 compared to 46.3% for the year ended December 31, 2021.

**Businesses purchased**

Examples of companies added to the Fund include:

- Schneider Electric SE – A French multinational manufacturer of energy management and automation products.
- Cellnex Telecom SA – A Spanish wireless infrastructure operator that manages cellular towers across Europe.
- Sea Ltd., ADR – A Singaporean developer of internet services including payment, e-commerce and gaming.

**Businesses sold**

We generally sell a stake in a business for one of two reasons. First, if our thesis about the business is deemed no longer valid. Second, there is a constant culling process whereby we continuously strive to upgrade the quality of the Fund with better ideas.

During the six-month period, examples of businesses sold include:

- Sony Group Corp.
- O'Reilly Automotive, Inc.
- Diageo plc

***Portfolio composition******Sector exposure***

Overall sector exposure shifted primarily as a result of investment decisions and changes in market values of our holdings. The Fund's Communication Services holdings increased by 1.2% primarily due to the purchase of Cellnex Telecom S.A. and Sea Ltd. The Fund's exposure to the Financial sector decreased by approximately 1.8% primarily due to the decreased positions in Affiliated Managers Group Inc. and Brookfield Asset Management Inc.

***Asset mix***

As at June 30, 2022, the Fund had a 36.4% investment in fixed-income securities and cash, a slight increase from December 31, 2021. The balance of the Fund's assets consisted of equity securities. The Fund's cash position decreased from 9.0% as at year end to 4.9% as at June 30, 2022.

Portfolio transactions are a result of our "bottom-up" stock selection process. We don't construct the Fund with an index or benchmark in mind. As a result, the Fund's composition is typically very different from its benchmark index.

### *Fixed-income component*

We remain primarily invested in corporate fixed-income holdings, as we believe the risk-return potential for corporates is more attractive than government debt.

### **Income, fees and expenses**

The management expense ratio (“MER”) has not changed significantly for all series of units of the Fund. We continue to focus on maintaining low operating expenses. Our goal as it relates to MERs has always been to be among the lowest-cost fund providers in our distribution channel. Please refer to the *Financial highlights* section for more information about MERs for all series of units.

The overall changes to income, operating expenses, and net assets attributable to unitholders of redeemable units over the prior period is a result of change in Fund size and the overall composition of businesses in the Fund.

### **Unitholder activity**

During the period ended June 30, 2022, the Fund’s net assets attributable to unitholders of redeemable units (“NAV”) decreased to \$7.7 billion from \$8.7 billion as at December 31, 2021. Of this decrease, \$965.8 million is a loss attributed to operations and \$184.4 million is attributed to net outflows from the Fund.

### **Recent developments**

Rising interest rates, increased levels of inflation and soaring energy prices were some of the major concerns that investors were faced with in the first half of calendar year 2022. This increased level of uncertainty is typically followed by market volatility, which many investors have experienced across various asset classes. Major equity indices such as the MSCI World Index, S&P 500 Index and S&P/TSX Composite Index declined -19%, -18% and -10% (total returns, in C\$) respectively from December 31, 2021 to June 30, 2022.

We don’t get too fussed by noisy headlines. The reality is nobody knows if the markets will continue to experience a pullback, how sharp it could be or how long it might last. We aren’t good at “timing” the market and don’t believe anyone can consistently do it well. Rather, we consider the facts surrounding the underlying businesses we own and make judgments based on those facts.

We believe that the biggest risk to investors’ long-term returns is unfortunately likely themselves. During periods of volatility, investors tend to let fear dictate their decisions which results in the dreaded buy high sell low behavior.

It’s our view that market volatility is a friend to the investor who knows the true value of a business and the enemy of the investor who does not. Despite the portfolio experiencing a negative year-to-date return so far this year, we stay true to our investment approach and focus on the long-term growth prospects of the businesses we own.

We’ve used the volatility to our advantage and were active throughout the six-month period. We purchased equity stakes in 6 new businesses in the portfolio while selling 6 businesses.

Equity indices were not the only volatile asset class throughout the first half of the year. Investment grade and high yield fixed income indices, such as the ICE BofA Canada Broad Market Index and the ICE BofA US High Yield Index, experienced double digit declines of about 12% (total returns, in C\$) - among the worst declines in history.

Since inception, we’ve maintained a much lower duration than the overall index. Duration is a measure of a fixed income securities price sensitivity to a change in interest rates. We don’t believe we have an edge in predicting interest rate moves, therefore our view was that maintaining a lower duration was a more prudent approach. Our edge is focusing on the fundamentals of the underlying businesses. We lend money to businesses and, by-and-large, performance of the individual businesses that we are invested in has been strong. We’re buying corporate bonds issued by businesses where we think the credit quality of the business will improve over our holding period.

The duration and yield-to-maturity of the EdgePoint Global Growth & Income Portfolio was 2.1 years and 2.8% respectively as at Dec. 31, 2021. By June 30, 2022 the duration of the portfolio increased slowly to 2.3 years and the yield-to-maturity increased to 5.4%. Our lower duration has allowed us to take advantage of rising interest rates and we’re excited about the current positioning of our fixed income securities within the portfolio.

Although the world is very uncertain, we approach investing with measured confidence and an approach that has navigated investors through all types of market and economic environments.

### **Related parties**

#### **Manager**

The Fund is managed by EdgePoint Wealth Management Inc. (“EdgePoint”). As Manager, EdgePoint provides (or arranges for) investment management, distribution, marketing and promotion of the Fund. As compensation for providing these services, EdgePoint receives a monthly management fee based on the daily average NAV of each series of the Fund (*see Management fees*).

EdgePoint is also responsible for the Fund’s day-to-day operation. EdgePoint will often incur, on behalf of the Fund, costs associated with the Fund’s operations including, but not limited to, legal fees, custodian and safekeeping fees, audit fees, administrative and operating costs, including commissions, brokerage fees, trustee fees, taxes, registrar and transfer agency fees, unitholder servicing costs, the costs of preparing and distributing annual and semi-annual reports, prospectuses, statements and investor communications, regulatory filing fees, fees and expenses payable in connection with the Independent Review Committee (“IRC”), interest and other general operating expenses that could include allocated salaries,

overhead and other costs directly related to the Fund's operations. These services are in the normal course of operations and are charged at the rate agreed to by the parties. EdgePoint is entitled to be reimbursed by the Fund for these operating costs.

The management fees payable by Series I unitholders are negotiated and paid directly by them. Operating expenses for Series I unitholders are EdgePoint's responsibility and are not charged to the Fund.

***Investment Advisor***

EdgePoint Investment Group Inc. ("Investment Advisor") is the Fund's portfolio advisor. The Investment Advisor is entitled to be reimbursed by EdgePoint for certain operating expenses associated with its advisory services, which are paid by EdgePoint with the fees received as Manager. The Fund is not separately charged for the services of the Investment Advisor.

***Independent Review Committee***

EdgePoint has appointed an Independent Review Committee ("IRC") consisting of three independent members and established under the Canadian Securities Administrators' National Instrument 81-107. The IRC's mandate is to review and provide input on EdgePoint's written policies and procedures that pertain to conflict of interest matters with respect to EdgePoint-managed funds, including EdgePoint affiliates. Additional information about the IRC is available in the Simplified Prospectus and Annual Information Form for the Fund. IRC members receive fees and reimbursement of expenses for services provided to the Fund.

***Other***

EdgePoint provided start-up investment capital to this Fund and sufficient initial capital to each of its series to permit them to be valued on a daily basis. EdgePoint's investment in the Fund is recorded at the NAV per unit of each series, as applicable. From time to time, EdgePoint may provide the initial capital required on the introduction of a new series to the Fund.

---

**Financial highlights**

The following tables show selected key financial information about the Fund and are intended to help you understand the Fund's financial performance For the period ended June 30, 2022 and the years ended December 31, 2021, 2020, 2019, 2018, and 2017. This information is derived from the Fund's Financial Statements.

-Annualized.

**Notes**

1. Net assets per unit is calculated as follows:

(a) The financial information for 2017-2021 is derived from the Fund's audited annual financial statements.

(b) Net assets per unit of a series is based on the number of units outstanding for that series at the relevant time. The increase (decrease) from operations per unit of a series is based on the weighted-average number of units outstanding for that series during the period. Therefore, the beginning of year net assets plus the increase (decrease) from operations will not sum to the end of period net assets.

(c) Distributions per unit of a series are based on the number of units outstanding for the series on the record dates for distributions. Distributions were both paid in cash and reinvested in additional units at the option of the unitholder.

2. The financial information presented in the *Ratios and supplemental data* table is derived from the Fund's pricing NAVs and is provided as at June 30, 2022, December 31, 2021, December 31, 2020, December 31, 2019, December 31, 2018, and December 31, 2017.

3. The management expense ratio ("MER") is calculated as the total management fees and operating expenses paid by each series of the Fund, including applicable taxes and interest and excluding commissions and other portfolio transaction costs, as a percentage of the average, daily NAV of each series of the Fund on an annualized basis. Any management fee distributions paid by a series of the Fund that effectively reduced management fees payable by some unitholders are not deducted from expenses to determine the overall MER of that series. The Manager, at its sole discretion, waives management fees or absorbs expenses. Such waivers and absorption can be terminated at any time. Fund MERs are shown both with and without the waiver and absorptions.

## Notes

1. Net assets per unit is calculated as follows:

(a) The financial information for 2021 is derived from the Fund's audited annual financial statements.

(b) Net assets per unit of a series is based on the number of units outstanding for that series at the relevant time. The increase (decrease) from operations per unit of a series is based on the weighted-average number of units outstanding for that series during the period. Therefore, the beginning of year net assets plus the increase (decrease) from operations will not sum to the end of period net assets.

(c) Distributions per unit of a series are based on the number of units outstanding for the series on the record dates for distributions. Distributions were both paid in cash and reinvested in additional units at the option of the unitholder.

2. The financial information presented in the *Ratios and supplemental data* table is derived from the Fund's pricing NAVs and is provided as at June 30, 2022 and December 31, 2021.

3. The management expense ratio ("MER") is calculated as the total management fees and operating expenses paid by each series of the Fund, including applicable taxes and interest and excluding commissions and other portfolio transaction costs, as a percentage of the average, daily NAV of each series of the Fund on an annualized basis. Any management fee distributions paid by a series of the Fund that effectively reduced management fees payable by some unitholders are not deducted from expenses to determine the overall MER of that series. The Manager, at its sole discretion, waives management fees or absorbs expenses. Such waivers and absorption can be terminated at any time. Fund MERs are shown both with and without the waiver and absorptions.

## Notes

1. Net assets per unit is calculated as follows:

(a) The financial information for 2017-2021 is derived from the Fund's audited annual financial statements.

(b) Net assets per unit of a series is based on the number of units outstanding for that series at the relevant time. The increase (decrease) from operations per unit of a series is based on the weighted-average number of units outstanding for that series during the period. Therefore, the beginning of year net assets plus the increase (decrease) from operations will not sum to the end of period net assets.

(c) Distributions per unit of a series are based on the number of units outstanding for the series on the record dates for distributions. Distributions were both paid in cash and reinvested in additional units at the option of the unitholder.

2. The financial information presented in the *Ratios and supplemental data* table is derived from the Fund's pricing NAVs and is provided as at June 30, 2022, December 31, 2021, December 31, 2020, December 31, 2019, December 31, 2018, and December 31, 2017.

3. The management expense ratio ("MER") is calculated as the total management fees and operating expenses paid by each series of the Fund, including applicable taxes and interest and excluding commissions and other portfolio transaction costs, as a percentage of the average, daily NAV of each series of the Fund on an annualized basis. Any management fee distributions paid by a series of the Fund that effectively reduced management fees payable by some unitholders are not deducted from expenses to determine the overall MER of that series. The Manager, at its sole discretion, waives management fees or absorbs expenses. Such waivers and absorption can be terminated at any time. Fund MERs are shown both with and without the waiver and absorptions.

## Notes

1. Net assets per unit is calculated as follows:

(a) The financial information for 2017-2021 is derived from the Fund's audited annual financial statements.

(b) Net assets per unit of a series is based on the number of units outstanding for that series at the relevant time. The increase (decrease) from operations per unit of a series is based on the weighted-average number of units outstanding for that series during the period. Therefore, the beginning of year net assets plus the increase (decrease) from operations will not sum to the end of period net assets.

(c) Distributions per unit of a series are based on the number of units outstanding for the series on the record dates for distributions. Distributions were both paid in cash and reinvested in additional units at the option of the unitholder.

2. The financial information presented in the *Ratios and supplemental data* table is derived from the Fund's pricing NAVs and is provided as at June 30, 2022, December 31, 2021, December 31, 2020, December 31, 2019, December 31, 2018, and December 31, 2017.

3. The management expense ratio ("MER") is calculated as the total management fees and operating expenses paid by each series of the Fund, including applicable taxes and interest and excluding commissions and other portfolio transaction costs, as a percentage of the average, daily NAV of each series of the Fund on an annualized basis. Any management fee distributions paid by a series of the Fund that effectively reduced management fees payable by some unitholders are not deducted from expenses to determine the overall MER of that series. The Manager, at its sole discretion, waives management fees or absorbs expenses. Such waivers and absorption can be terminated at any time. Fund MERs are shown both with and without the waiver and absorptions.

## Financial highlights (continued)

## Fund level ratios

	Jun 30, 2022	Dec 31, 2021	Dec 31, 2020	Dec 31, 2019	Dec 31, 2018	Dec 31, 2017
Trading expense ratio (Note 4) <sup>-</sup>	0.05%	0.05%	0.05%	0.03%	0.05%	0.05%
Portfolio turnover rate (Note 5)	19.24%	46.26%	50.11%	38.29%	35.12%	36.89%

<sup>-</sup>Annualized.

## Notes

- The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of the Fund's daily average NAV. The trading expense ratio is calculated at the fund level and applies to all series of the Fund.
- Portfolio turnover rate is calculated at the fund level based on the lesser of purchases or proceeds of sales of securities for the period, excluding cash, short term notes and bonds having maturity dates at acquisition of one year or less, divided by the average value of the portfolio securities for the period. The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the period. The higher a fund's portfolio turnover rate in a period, the greater the trading costs payable by the fund in the period, and the greater the chance of an investor receiving taxable capital gains in the period. There is not necessarily a relationship between a high turnover rate and fund performance.

**Management fees**

As compensation for the services provided, EdgePoint, the Manager of the Fund, receives a monthly management fee based on the daily average NAV of Series A, Series A(N), Series AT4, Series A(N)T4, Series F, Series F(N), Series FT4, and Series F(N)T4. Management fees for Series I are negotiated and paid directly by unitholders and not by the Fund.

For the period ended June 30, 2022, a summary of services received in consideration of the management fees as a percentage of those fees is as follows:

	Absorbed expenses	Distribution costs	Portfolio advisor and other fees*
Series A, Series A(N), Series A(N)T4 and Series AT4	0%	59%	41%
Series F, Series F(N), Series F(N)T4 and Series FT4	0%	0%	100%
Series I	n/a	n/a	n/a

\*Portfolio advisor and other fees include investment advisory and portfolio management services, which comprises investment selection, analysis and monitoring, including business travel to corporate head offices; other associated due diligence costs; portfolio construction and risk management; broker analysis, selection and monitoring; trading expertise as well as costs associated with managing the business and profits.

**Past performance**

This section shows the Fund’s past performance. Past performance includes changes in security value and assumes the reinvestment of all distributions (if any). It does not take into account sales, redemption, distribution or optional charges, or income taxes payable by any investor, which would have reduced returns. It is important to note that past performance is not an indication of how the Fund will perform in the future.

**Year-by-year returns**

The following graphs illustrate the Fund’s performance for each of the periods highlighted, including changes from period to period. They indicate, on a percentage basis, how much an investment would have made or lost had you invested on the first day of each financial period and held that investment until the last day of each financial period, as applicable. The differing performance between series of units is due largely to varying expenses charged to each series as explained in the Prospectus and the Financial Statements.

**Series A**

\*Six-month period ended June 30, 2022.

**Series A(N) Non-HST**

Series F(N) Non-HST

\*Six-month period ended June 30, 2022.

Series I

\*Six-month period ended June 30, 2022.

### Benchmark

The Fund uses the MSCI World Index and the ICE BofA Canada Broad Market Index as broad-based benchmarks for long-term performance comparisons. The Fund uses a blended index made up of a 60% weighting in the MSCI World Index and a 40% weighting in the ICE BofA Canada Broad Market Index.

The MSCI World Index is a market-capitalization-weighted index comprising equity securities available in developed markets globally. The ICE BofA Canada Broad Market Index tracks the performance of publicly traded investment grade debt denominated in Canadian dollars and issued in the Canadian domestic market.

While the Fund uses these indexes for long-term performance comparisons, it is not managed relative to the composition of the indexes. There are differences which include security holdings, geographic and sector allocation which impact comparability. Additional factors such as credit quality, issuer type and yield may impact fixed-income comparability. As a result, the Fund may experience periods when its performance differs materially from the indexes. Please see the *Results of operations* section of this report for a discussion of recent performance results.
