EdgePoint Canadian Growth & Income Portfolio

Semi-annual Management Report of Fund Performance

For the period ended June 30, 2024

This semi-annual Management Report of Fund Performance (“MRFP”) contains financial highlights, but not the Fund’s semi-annual Financial Statements, which may be included at the back of the MRFP. You can obtain a free copy of the semi-annual or annual Financial Statements by calling 1.866.757.7207, writing to EdgePoint Wealth Management Inc., 150 Bloor St. W., Suite 500, Toronto, ON, M5S 2X9, or visiting our website at www.edgepointwealth.com or the SEDAR website at www.sedar.com.

Likewise, unitholders can obtain copies of the Fund’s proxy voting policies and procedures, proxy voting disclosure records and Fund-related quarterly portfolio disclosures.

Please refer to the Fund’s Simplified Prospectus, Fund Facts and the 2023 audited annual Financial Statements for more information.

For the Fund’s current and historical net asset values per unit, please visit www.edgepointwealth.com.

Caution regarding forward-looking statements

This report may contain forward-looking statements about the Fund, including its strategy, expected performance and condition. Forward-looking statements include statements that are predictive in nature, that depend upon or refer to future events or conditions, or that include words such as “expects,” “anticipates,” “intends,” “plans,” “believes,” “estimates,” or negative versions thereof and similar expressions.

In addition, any statement that may be made concerning future performance, strategies or prospects, and possible future fund action, is also a forward-looking statement. Forward-looking statements are based on current expectations and projections about future events and are inherently subject to, among other things, risks, uncertainties and assumptions about the Fund and economic factors.

Forward-looking statements are not guarantees of future performance, and actual events and results could differ materially from those expressed or implied in any forward-looking statements made by the Fund. Any number of important factors could contribute to these differences, including, but not limited to, general economic, political and market factors, interest and foreign exchange rates, global equity and capital markets, business competition, technological change, changes in government regulations, unexpected judicial or regulatory proceedings, and catastrophic events.

We stress that the abovementioned list of important factors is not exhaustive. We encourage you to consider these and other factors carefully before making any investment decisions and urge you to avoid placing undue reliance on forward-looking statements. Further, you should be aware of the fact that the Fund has no specific intention of updating any forward-looking statements whether as a result of new information, future events or otherwise, prior to the release of the next Management Report of Fund Performance.

Management discussion of fund performance

The management discussion of fund performance presents the views of the portfolio management team concerning significant factors and developments that have affected the Fund's performance and outlook.

Please read the aforementioned caution on the preceding page regarding forward-looking statements.

Results of operations**Investment performance**

For the six months ending June 30, 2024, EdgePoint Canadian Growth & Income Portfolio, Series A increased 7.4% versus an increase of 3.5% for its benchmark, the 60% S&P/TSX/40% ICE BofA Canada Broad Market Index. The S&P/TSX Composite Index increased by 6.1%, while the ICE BofA Canada Broad Market Index decreased 0.3%. We manage the Fund independently of the indexes we use as long-term performance comparisons. Differences including security holdings, geographic/sector allocations and the relative weighting between equity and fixed-income investments may impact comparability and could result in periods when our performance differs materially from the index.

During the period, the Fund's outperformance relative to the index can be mainly attributed to the Fund's Energy, Financials and Information Technology businesses. Security selection within these sectors was the main contributor to the Fund's outperformance. In addition, the fixed income securities within the Fund outperformed the ICE BofA Canada Broad Market Index over the period and had a positive impact on relative performance.

Please refer to the Past performance section for the performance of other series, which differ from Series A due largely to varying expenses and/or taxes incurred by each series, as explained in the Prospectus.

The blended benchmark provides a more appropriate comparison in view of the Fund's investment strategy and asset mix. The S&P/TSX Composite Index is a broad-based benchmark for Canadian equities. The ICE BofA Canada Broad Market Index tracks the performance of publicly traded investment-grade debt denominated in Canadian dollars and issued in the Canadian domestic market

Meaningful contributors to investment results included:

- CES Energy Solutions Corp.
- Fairfax Financial Holdings Ltd.
- Topicus.com
- Constellation Software Inc.
- Osisko Gold Royalties Ltd.

As a group, these companies contributed approximately 5.4% to performance over the last six months.

During the period, there were no meaningful detractors from investment results.

While we provide these results to fulfill the disclosure requirements of this report, we measure investment success over periods of 10

years or more and believe it takes considerable skill to consistently add value over the long term.

Portfolio transactions

During the period, the Fund net purchased \$81.8 million worth of investments. Portfolio turnover was 12.8% for the six months ended June 30, 2024 compared to 26.7% for the year ended December 31, 2023.

Businesses purchased

Examples of companies added to the Fund include:

- Koninklijke Philips N.V. - Diversified technology company focused on lighting, medical equipment and consumer lifestyle products
- Lincoln Electric Holdings Inc., - American manufacturer of industrial equipment
- Norfolk Southern Corporation- North American railway company focusing on freight transportation services

Businesses sold

We generally sell a stake in a business for one of two reasons. First, if our thesis about the business is deemed no longer valid. Second, there is a constant culling process whereby we continuously strive to upgrade the quality of the Fund with better ideas.

During the period, examples of businesses sold include:

- TransAlta Corp.
- Secure Energy Services Inc.
- DSM-Firmenich AG

Portfolio composition*Sector exposure*

Overall sector exposure shifted primarily as a result of investment decisions and changes in stock prices. The most significant change was a decrease of 1.2% in the Fund's Consumer Discretionary holdings, primarily due to the decreased share prices of Restaurant Brands International Inc. and AutoCanada Inc.

Asset mix

As at June 30, 2024, the Fund had approximately 38.0% invested in fixed-income securities and cash with the balance in equity securities, a decrease from 38.6% at the end of 2023. The Fund's cash position decreased from 15.2% at the end of 2023 to 9.6% as at June 30, 2024.

Portfolio transactions are a result of our "bottom-up" stock selection process. We don't construct the Fund with an index or benchmark in mind. As a result, the Fund's composition is typically very different from its benchmark index. Our approach to portfolio construction focuses on the quality of the constituent businesses and minimizing the possibility of permanent loss of capital. Although we keep macro-level market issues in mind, they aren't a primary driver in our investment process.

Fixed-income component

We remain primarily invested in corporate fixed-income holdings, as we believe the risk-return potential for corporates is more attractive than government debt.

Income, fees and expenses

The management expense ratio (“MER”) has stayed relatively flat for all series of units of the Fund. We continue to focus on maintaining low operating expenses. Our goal as it relates to MERs has always been to be among the lowest-cost active managers in our distribution channel. Please refer to the *Financial highlights* section for more information about MERs for all series of units.

The overall change in income, operating expenses and net assets attributable to unitholders of redeemable units over the prior period is a result of a change in the Fund’s size and the overall composition of businesses in the portfolio.

Unitholder activity

During the period ended June 30, 2024, the Fund’s net assets attributable to unitholders of redeemable units (“NAV”) increased to \$2,768.4 million from \$2,499.5 million as at December 31, 2023. Of this increase, \$194.1 million is attributed to a gain from operations and \$74.8 million in net inflows to the Fund.

Recent developments

In the first half of 2024, the S&P/TSX Composite Index increased 6.1%, while the ICE BofA Canada Broad Market Index declined 0.3% (total returns, in C\$). The primary driver behind the S&P/TSX Composite Index returns came from the Energy sector, which accounted for almost 40% of the return year-to-date. The ICE BofA Canada Broad Market Index declined, with the yield on the 10-year Government of Canada bond rising close to 40 basis points, to 3.5% at the end of the period.

Inflation and interest rates continued to be a focus for many investors. For most of the year, the Bank of Canada (BoC) kept its policy rate steady at 5%, but in June the BoC implemented a rate cut of 0.25%. This was accompanied by cooling inflation figures, which currently sits at 2.7% at the end of the period, moving closer to the BoC’s target rate. While we are aware of the macroeconomic environment, we do not focus our efforts on predicting the direction of inflation or interest rates. At EdgePoint, we continue to remain focused on our time-tested investment approach and take ownership stakes in businesses that we believe are misunderstood by the broader market. Our investment approach seeks to find businesses that are experiencing some form of change that the market has yet to appreciate, which allows us to buy misunderstood growth businesses at a reasonable price. During the six-month period, the investment team added 9 new businesses to the equity portion of the Fund, while exiting 5 businesses.

When investing in credit, we take risks where we have an edge – which we believe is our ability to generate insights about a business’ credit quality and not predicting where interest rates might be heading. To us, interest rate risk means how much we can be hurt by rapid rate changes, rather than trying to add value from yield curve moves. We view duration (a measure of a debt instrument’s price sensitivity to a change in interest rates) as a tool to prevent us from being negatively exposed to rate movements. In the past, our short duration relative to the index allowed us to benefit from re-investing principal repayments in new and more interesting opportunities. At the end of the period,

the duration of our portfolio was 2.01 years, compared to 7.15 years for the ICE BofA Canada Broad Market Index.

Related parties**Manager**

The Fund is managed by EdgePoint Wealth Management Inc. (“EdgePoint”). As Manager, EdgePoint provides (or arranges for) investment management, distribution, marketing and promotion of the Fund. As compensation for providing these services, EdgePoint receives a monthly management fee based on the daily average NAV of each series of the Fund (see *Management fees*).

EdgePoint is also responsible for the Fund’s day-to-day operation. EdgePoint will often incur, on behalf of the Fund, costs associated with the Fund’s operations including, but not limited to, legal fees, custodian and safekeeping fees, audit fees, administrative and operating costs, including commissions, brokerage fees, trustee fees, taxes, registrar and transfer agency fees, unitholder servicing costs, the costs of preparing and distributing annual and semi-annual reports, prospectuses, statements and investor communications, regulatory filing fees, fees and expenses payable in connection with the Independent Review Committee (“IRC”), interest and other general operating expenses that could include allocated salaries, overhead and other costs directly related to the Fund’s operations. These services are in the normal course of operations and are charged at the rate agreed to by the parties. EdgePoint is entitled to be reimbursed by the Fund for these operating costs.

The management fees payable by Series I unitholders are negotiated and paid directly by them. Operating expenses for Series I unitholders are EdgePoint’s responsibility and are not charged to the Fund.

Investment Advisor

EdgePoint Investment Group Inc. (“Investment Advisor”) is the Fund’s portfolio advisor. The Investment Advisor is entitled to be reimbursed by EdgePoint for certain operating expenses associated with its advisory services, which are paid by EdgePoint with the fees received as Manager. The Fund is not separately charged for the services of the Investment Advisor

Independent Review Committee

EdgePoint has appointed an Independent Review Committee (“IRC”) consisting of three independent members and established under the Canadian Securities Administrators’ National Instrument 81-107. The IRC’s mandate is to review and provide input on EdgePoint’s written policies and procedures that pertain to conflict of interest matters with respect to EdgePoint-managed funds, including EdgePoint affiliates. Additional information about the IRC is available in the Simplified Prospectus and Annual Information Form for the Fund. IRC members receive fees and reimbursement of expenses for services provided to the Fund.

Financial highlights

The following tables show selected key financial information about the Fund and are intended to help you understand the Fund's financial performance for the period ended June 30, 2024 and the years ended December 31, 2023, 2022, 2021, 2020, and 2019. This information is derived from the Fund's Financial Statements.

*Annualized.

Notes

1. Net assets per unit is calculated as follows:

(a) The financial information for 2019-2023 is derived from the Fund's audited annual financial statements.

(b) Net assets per unit of a series is based on the number of units outstanding for that series at the relevant time. The increase (decrease) from operations per unit of a series is based on the weighted-average number of units outstanding for that series during the period. Therefore, the beginning of year net assets plus the increase (decrease) from operations will not sum to the end of period net assets.

(c) Distributions per unit of a series are based on the number of units outstanding for the series on the record dates for distributions. Distributions were both paid in cash and reinvested in additional units at the option of the unitholder.

2. The financial information presented in the *Ratios and supplemental data* table is derived from the Fund's pricing NAVs and is provided as at June 30, 2024, December 31, 2023, December 31, 2022, December 31, 2021, December 31, 2020, and December 31, 2019.

3. The management expense ratio ("MER") is calculated as the total management fees and operating expenses paid by each series of the Fund, including applicable taxes and interest and excluding commissions and other portfolio transaction costs, as a percentage of the average, daily NAV of each series of the Fund on an annualized basis. Any management fee distributions paid by a series of the Fund that effectively reduced management fees payable by some unitholders are not deducted from expenses to determine the overall MER of that series. The Manager, at its sole discretion, waives management fees or absorbs expenses. Such waivers and absorption can be terminated at any time. Fund MERs are shown both with and without the waiver and absorptions.

Notes

1. Net assets per unit is calculated as follows:

(a) The financial information for 2019-2023 is derived from the Fund's audited annual financial statements.

(b) Net assets per unit of a series is based on the number of units outstanding for that series at the relevant time. The increase (decrease) from operations per unit of a series is based on the weighted-average number of units outstanding for that series during the period. Therefore, the beginning of year net assets plus the increase (decrease) from operations will not sum to the end of period net assets.

(c) Distributions per unit of a series are based on the number of units outstanding for the series on the record dates for distributions. Distributions were both paid in cash and reinvested in additional units at the option of the unitholder.

2. The financial information presented in the *Ratios and supplemental data* table is derived from the Fund's pricing NAVs and is provided as at June 30, 2024, December 31, 2023, December 31, 2022 and December 31, 2021.

3. The management expense ratio ("MER") is calculated as the total management fees and operating expenses paid by each series of the Fund, including applicable taxes and interest and excluding commissions and other portfolio transaction costs, as a percentage of the average, daily NAV of each series of the Fund on an annualized basis. Any management fee distributions paid by a series of the Fund that effectively reduced management fees payable by some unitholders are not deducted from expenses to determine the overall MER of that series. The Manager, at its sole discretion, waives management fees or absorbs expenses. Such waivers and absorption can be terminated at any time. Fund MERs are shown both with and without the waiver and absorptions.

Notes

1. Net assets per unit is calculated as follows:

(a) The financial information for 2019-2023 is derived from the Fund's audited annual financial statements.

(b) Net assets per unit of a series is based on the number of units outstanding for that series at the relevant time. The increase (decrease) from operations per unit of a series is based on the weighted-average number of units outstanding for that series during the period. Therefore, the beginning of year net assets plus the increase (decrease) from operations will not sum to the end of period net assets.

(c) Distributions per unit of a series are based on the number of units outstanding for the series on the record dates for distributions. Distributions were both paid in cash and reinvested in additional units at the option of the unitholder.

2. The financial information presented in the *Ratios and supplemental data* table is derived from the Fund's pricing NAVs and is provided as at June 30, 2024, December 31, 2023, December 31, 2022, December 31, 2021, December 31, 2020, and December 31, 2019.

3. The management expense ratio ("MER") is calculated as the total management fees and operating expenses paid by each series of the Fund, including applicable taxes and interest and excluding commissions and other portfolio transaction costs, as a percentage of the average, daily NAV of each series of the Fund on an annualized basis. Any management fee distributions paid by a series of the Fund that effectively reduced management fees payable by some unitholders are not deducted from expenses to determine the overall MER of that series. The Manager, at its sole discretion, waives management fees or absorbs expenses. Such waivers and absorption can be terminated at any time. Fund MERs are shown both with and without the waiver and absorptions.

Notes

1. Net assets per unit is calculated as follows:

(a) The financial information for 2019-2023 is derived from the Fund's audited annual financial statements.

(b) Net assets per unit of a series is based on the number of units outstanding for that series at the relevant time. The increase (decrease) from operations per unit of a series is based on the weighted-average number of units outstanding for that series during the period. Therefore, the beginning of year net assets plus the increase (decrease) from operations will not sum to the end of period net assets.

(c) Distributions per unit of a series are based on the number of units outstanding for the series on the record dates for distributions. Distributions were both paid in cash and reinvested in additional units at the option of the unitholder.

2. The financial information presented in the *Ratios and supplemental data* table is derived from the Fund's pricing NAVs and is provided as at June 30, 2024, December 31, 2023, December 31, 2022, December 31, 2021, December 31, 2020, and December 31, 2019.

3. The management expense ratio ("MER") is calculated as the total management fees and operating expenses paid by each series of the Fund, including applicable taxes and interest and excluding commissions and other portfolio transaction costs, as a percentage of the average, daily NAV of each series of the Fund on an annualized basis. Any management fee distributions paid by a series of the Fund that effectively reduced management fees payable by some unitholders are not deducted from expenses to determine the overall MER of that series. The Manager, at its sole discretion, waives management fees or absorbs expenses. Such waivers and absorption can be terminated at any time. Fund MERs are shown both with and without the waiver and absorptions.

Financial highlights (continued)

Fund level ratios	Jun. 30, 2024	Dec. 31, 2023	Dec. 31, 2022	Dec. 31, 2021	Dec. 31, 2020	Dec. 31, 2019
Trading expense ratio (Note 4) ⁻	0.04	0.04%	0.03%	0.05%	0.07%	0.04%
Portfolio turnover rate (Note 5)	12.79%	26.70%	31.61%	39.17%	43.89%	37.52%

⁻Annualized.

Notes

4. The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of the Fund's daily average NAV. The trading expense ratio is calculated at the fund level and applies to all series of the Fund.
5. Portfolio turnover rate is calculated at the fund level based on the lesser of purchases or proceeds of sales of securities for the period, excluding cash, short term notes and bonds having maturity dates at acquisition of one year or less, divided by the average value of the portfolio securities for the period. The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the period. The higher a fund's portfolio turnover rate in a period, the greater the trading costs payable by the fund in the period, and the greater the chance of an investor receiving taxable capital gains in the period. There is not necessarily a relationship between a high turnover rate and fund performance.

Management fees

As compensation for the services provided, EdgePoint, the Manager of the Fund, receives a monthly management fee based on the daily average NAV of Series A, Series A(N), Series AT4, Series A(N)T4, Series F, Series F(N), Series FT4, and Series F(N)T4. Management fees for Series I are negotiated and paid directly by unitholders and not by the Fund.

For the period ended June 30, 2024, a summary of services received in consideration of the management fees as a percentage of those fees is as follows:

	Absorbed expenses	Distribution costs	Portfolio advisor and other fees*
Series A, Series A(N), Series A(N)T4 and Series AT4	0%	59%	41%
Series F, Series F(N), Series F(N)T4 and Series FT4	0%	0%	100%
Series I	n/a	n/a	n/a

*Portfolio advisor and other fees include investment advisory and portfolio management services, which comprises investment selection, analysis and monitoring, including business travel to corporate head offices; other associated due diligence costs; portfolio construction and risk management; broker analysis, selection and monitoring; trading expertise as well as costs associated with managing the business and profits.

Past performance

This section shows the Fund’s past performance. Past performance includes changes in security value and assumes the reinvestment of all distributions (if any). It does not take into account sales, redemption, distribution or optional charges, or income taxes payable by any investor, which would have reduced returns. It is important to note that the past performance is not an indication of how the Fund will perform in the future.

Year-by-year returns

The following graphs illustrate the Fund’s performance for each of the periods highlighted, including changes from period to period. They indicate, on a percentage basis, how much an investment would have made or lost had you invested on the first day of each financial period and held that investment until the last day of each financial period, as applicable. The differing performance between series of units is due largely to varying expenses charged to each series as explained in the Prospectus and the Financial Statements.

Series A

*Six-month period ended June 30, 2024.

Series A(N) Non-HST

*Six-month period ended June 30, 2024.
