[†] Market capitalization thresholds are calculated by using the median of the maximum and minimum market capitalization of businesses in the MSCI World Mid Cap Index on a rolling 12-month basis from December 31, 2024, to December 31, 2025. The capitalization ranges are: Small <\$3B; medium \$3B to \$98B; large >\$98B (C\$). The MSCI World Index is a market-capitalization-weighted index comprising mid-cap equity securities available in developed markets globally. The index is not investible.

Percentages may not sum to total due to rounding. *The Summary of Investment Portfolio* may change due to ongoing portfolio transactions in the investment fund. Updates are available quarterly on our website at www.edgepointwealth.com 60 days after the quarter-end, except for December 31, which is the financial year end, when they are available after 90 days.
