EdgePoint Canadian Growth & Income Portfolio

Annual Management Report of Fund Performance

For the year ended December 31, 2021

This annual Management Report of Fund Performance (“MRFP”) contains financial highlights, but not the Fund’s annual Financial Statements, which may be included at the back of the MRFP. You can obtain a free copy of the semi-annual or annual Financial Statements by calling 1.866.757.7207, writing to EdgePoint Wealth Management Inc., 150 Bloor St. W., Suite 500, Toronto, ON, M5S 2X9, or visiting our website at www.edgepointwealth.com or the SEDAR website at www.sedar.com.

Likewise, unitholders can obtain copies of the Fund’s proxy voting policies and procedures, proxy voting disclosure records and Fund-related quarterly portfolio disclosures.

Please refer to the Fund’s Simplified Prospectus, Fund Facts and the 2021 audited annual Financial Statements for more information. For the Fund’s current and historical net asset values per unit, please visit www.edgepointwealth.com.

Caution regarding forward-looking statements

This report may contain forward-looking statements about the Fund, including its strategy, expected performance and condition. Forward-looking statements include statements that are predictive in nature, that depend upon or refer to future events or conditions, or that include words such as “expects,” “anticipates,” “intends,” “plans,” “believes,” “estimates,” or negative versions thereof and similar expressions.

In addition, any statement that may be made concerning future performance, strategies or prospects, and possible future fund action, is also a forward-looking statement. Forward-looking statements are based on current expectations and projections about future events and are inherently subject to, among other things, risks, uncertainties and assumptions about the Fund and economic factors.

Forward-looking statements are not guarantees of future performance, and actual events and results could differ materially from those expressed or implied in any forward-looking statements made by the Fund. Any number of important factors could contribute to these differences, including, but not limited to, general economic, political and market factors, interest and foreign exchange rates, global equity and capital markets, business competition, technological change, changes in government regulations, unexpected judicial or regulatory proceedings, and catastrophic events.

We stress that the abovementioned list of important factors is not exhaustive. We encourage you to consider these and other factors carefully before making any investment decisions and urge you to avoid placing undue reliance on forward-looking statements. Further, you should be aware of the fact that the Fund has no specific intention of updating any forward-looking statements whether as a result of new information, future events or otherwise, prior to the release of the next Management Report of Fund Performance.

Management discussion of fund performance

The management discussion of fund performance presents the views of the portfolio management team concerning significant factors and developments that have affected the Fund's performance and outlook.

Please read the aforementioned caution on the preceding page regarding forward-looking statements.

Investment objectives and strategies

The Fund seeks to provide a combination of long-term capital appreciation and income generation by investing primarily in Canadian equity and fixed-income securities. We (the portfolio management team) invest in companies that have strong competitive positions and defensible barriers to entry, strong long-term growth prospects, and are run by competent management teams. We endeavour to acquire ownership stakes in these businesses at prices below our assessment of the company's true worth.

We're long-term investors with an investment horizon greater than five years. We believe the best way to buy a business at an attractive price is to have an idea that isn't widely shared by others – which we refer to as a *proprietary insight*.

Our fixed-income approach begins with fundamental credit analysis supplemented with an analysis of macroeconomic factors affecting economic growth to uncover relative value opportunities both within and across different market sectors.

Our approach is deceptively simple. We buy good, undervalued businesses and hold them until the market fully recognizes their potential. Following this approach requires an ability to think independently and a commitment to embrace the thorough research required to uncover opportunities the market doesn't fully appreciate.

Risk

We believe risk is best managed by applying in-depth, thorough research to each investment idea in order to understand the risks of an individual business, which we weigh against its return potential. We take a common-sense approach to risk by assessing how much money can be lost and the probability of losing it. While this approach may seem overly simplistic, it provides vital clarity about the true investment risks.

There were no significant changes during the period that affected the overall level of risk associated with the Fund.

As discussed in the Prospectus, the Fund remains suitable for investors with an investment horizon of at least five years and who are willing to accept low to medium investment risk.

There are several types of risks that include, but are not limited to:

Concentration risk

Concentration risk can occur by holding a small number of investments, which may reduce the Fund's diversification and liquidity. We invest with conviction and, as a result, the Fund is concentrated in our best ideas. This concentration allows individual holdings to have a meaningful impact on returns. It also allows us greater in-depth knowledge about each company in the Fund, a key element in reducing an investment's potential risk.

As at December 31, 2021, EdgePoint Canadian Growth & Income Portfolio's equity holdings increased slightly from 60 at the end of 2020 to 61 at the end of 2021. Although the number of equity holdings gives the appearance of an unconcentrated Portfolio, over 50% of the Portfolio's assets are in the top 25 names. 15 out of the 61 business ideas are foreign companies and almost 65% of the equity holdings are invested in small to midcap businesses. Part of our Investment team's responsibilities includes continually monitoring our existing holdings to ensure that each remains the best use of capital.

The number of fixed-income issuers increased from 80 at the end of 2020 to 90 at the end of 2021.

Currency risk

The Fund is valued in Canadian dollars; however, it may invest in foreign securities denominated in foreign currencies. To reduce the impact of short-term currency fluctuations, we typically hedge all of our fixed-income foreign currency exposure. In addition, we may hedge all or a portion of our equity-based foreign currency exposure depending on our view of a currency's relative value and its associated risks.

Our investments in foreign securities typically do not exceed 20% of the Fund's net assets.

As at December 31, 2021, the Fund's most significant foreign currency exposure was to the U.S. dollar. The Fund's gross exposure as a percentage of its total net assets was 14% at the end of 2021, down slightly from 17% at the end of 2020. Approximately 63% of the Fund's exposure to the U.S. dollar was hedged, unchanged from the end of 2020.

Our policy of hedging 100% of our U.S. dollar fixed-income exposure remained unchanged over the year. When adding currency hedges, we take into account U.S. business operations of Canadian-owned companies in the Fund.

Credit risk

The Fund invests in corporate fixed-income holdings, which generally have more perceived risk than government bonds. In 2021, the Fund continued to invest all of its fixed-income holdings in corporate bonds, which we believe represented better value during the year.

Interest rate risk

The Fund's fixed-income component is affected by changes in interest rates. A bond portfolio's sensitivity to interest rate movements can be quantified by its modified duration. The higher the number, the greater the Fund's sensitivity to interest rate changes. As at December 31, 2021, the Fund's duration of its fixed-income component was approximately 2.1, unchanged from the end of 2020. In contrast, the ICE BofA Canada Broad Market Index duration was 8.4 at the end of 2021.

Results of operations**Investment performance**

For the year ended December 31, 2021, EdgePoint Canadian Growth & Income Portfolio, Series A returned 25.8% versus a return of 13.3% for its benchmark, the 60% S&P/TSX Composite Index/40% ICE BofA Canada Broad Market Index. We manage the Fund independently of the indexes we use as long-term performance comparisons. Differences including security holdings, geographic/

sector allocations and the relative weighting between equity and fixed income investments may impact comparability and could result in periods when our performance differs materially from the index.

During the period, the Fund's outperformance relative to the index can be mainly attributed to the Fund's Energy and Consumer Discretionary sectors. Security selection within these sectors was a major contributor to the Fund's outperformance. In addition, the fixed income securities within the Fund outperformed the ICE BofA Canada Broad Market Index and were a positive contributor to return.

Please refer to the *Past performance* section for the performance of other series, which differ from Series A due largely to varying expenses and/or taxes incurred by each series, as explained in the Prospectus.

The blended benchmark provides a more appropriate comparison in view of the Fund's investment strategy and asset mix. The S&P/TSX Composite Index, a broad-based benchmark for Canadian equities, increased 25.1%. The ICE BofA Canada Broad Market Index, a broad-based benchmark for Canadian fixed-income securities, returned -2.7%.

With regard to the Fund's equity component, on a sector basis, the Fund's Financial and Energy holdings were the largest contributors to overall performance.

Meaningful contributors to investment results included:

- AutoCanada Inc.
- Advantage Energy Ltd.
- ATS Automation Tooling Systems Inc.
- Tourmaline Oil Corp.
- Fairfax Financial Holdings Ltd.

As a group, these companies contributed approximately 9.6% to overall performance in the last 12 months.

Meaningful detractors to investment results included:

There were no meaningful detractors to investment performance in the last 12 months.

While we provide these results to fulfill the disclosure requirements of this report, we measure investment success over periods of 10 years or more and believe it takes considerable skill to consistently add value over the long term.

Portfolio transactions

Portfolio turnover decreased from 43.9% in 2020 to 39.2% in 2021.

Businesses purchased

Examples of companies added to the Fund include:

- British American Tobacco PLC – A British multinational tobacco company with a focus on vaping and other non-combustion consumption.
- TransAlta Corp. – Engages in the generation and distribution of electricity through wind, hydro, gas and coal power plants.
- Canadian Pacific Kansas City Ltd. – Offers transportation services and supply chain expertise with access to eight major ports & key markets across North America.

Businesses sold

We generally sell a stake in a business or one of two reasons. First, if our thesis about the business is deemed no longer valid. Second, there is a constant culling process whereby we continuously strive to upgrade the quality of the Fund with better ideas.

During the period, examples of businesses sold include:

- Manulife Financial Corp.
- Slate Grocery REIT
- Shiseido Co., Ltd.

Portfolio composition**Sector exposure**

Overall sector exposure shifted primarily as a result of investment decisions and changes in stock prices. The most significant change was a decrease of 5.6% in the Fund's Financials holdings, primarily due to the sale of Manulife Financial Corp. and a reduced position size in Element Fleet Management Corp. The Fund's Industrial holdings increased by approximately 2.0%, primarily due to the purchase of Canadian Pacific Kansas City Ltd.

Asset mix

As at December 31, 2021, the Fund had approximately 36.8% invested in fixed-income securities and cash with the balance in equity securities, a slight change from 37.0% at the end of 2020. The Fund's cash position decreased slightly from 10.4% at December 31, 2020 to 9.1% at the end of 2021.

Portfolio transactions are a result of our "bottom-up" stock selection process. We don't construct the Fund with an index or benchmark in mind. As a result, the Fund's composition is typically very different from its benchmark index. Our approach to portfolio construction focuses on the quality of the constituent businesses and minimizing the possibility of permanent loss of capital. Although we keep macro-level market issues in mind, they aren't a primary driver in our investment process.

Fixed-income component

We remain 100% invested in corporate fixed-income holdings, as we believe the risk-return potential for corporates is more attractive than for government debt.

Income, fees and expenses

The management expense ratio ("MER") has stayed relatively flat for all series of units of the Fund. This is a result of the Fund's growth and a continued focus on reducing operating expenses. Our goal as it relates to MERs has always been to be among the lowest-cost fund providers in our distribution channel. We believe that we've already accomplished this with potential room to lower costs even more. Please refer to the *Financial highlights* section for more information about MERs for all series of units.

The overall change in income, operating expenses and net assets attributable to unitholders of redeemable units over the prior period is a result of a change in the Fund's size and the overall composition of businesses in the Fund.

Unitholder activity

During the year ended December 31, 2021, the Fund's net assets attributable to unitholders of redeemable units ("NAV") increased to \$1,904.4 million from \$1,513.3 million as at December 31, 2020. Of this increase, \$396.1 million is attributed to a gain from operations offset by \$5.0 million in net outflows from the Fund.

Recent developments

Despite concerns around COVID-19 and its new variants dominating headlines in 2021, many equity indices generated attractive total returns with the MSCI World Index returning 20.8%, the S&P/TSX Composite Index gaining 25.1%, the S&P 500 Index up 28.7% and the Nasdaq Composite Index producing a return of 22.2%. Although the calendar year returns for these major indices were pleasing, as the year came to an end, investors were faced with rising inflation and interest rates which began to put pressure on various segments of the market. With all the uncertainty in the market today, we believe it's important to have an investment approach you can trust that will guide you through periods of uncertainty. It is our belief, that the best margin of safety one can have is by buying ownership stakes in business where you aren't being asked to pay for their future growth.

We often get asked about the source of our ideas. Good ideas can come from anywhere. In some cases, we've followed the business for decades. Other ideas come from attending a conference. We might read an article in the newspaper or find an idea on an investing blog.

This answer is probably unsatisfying to most prospective investors who are used to hearing about stock screens. Running quantitative stock screens can be an effective tool to filter the universe of thousands of companies into something more manageable. If you're a "deep-value investor", you might run a screen looking for low multiples of book value or free cash flow. A "quality investor" would run a screen looking at companies with high returns on capital and stable margins. Or a "growth investor" would search for companies with above-average revenue growth. You might be surprised to hear this, but we have never found an investment idea from a screen.

Why? We're looking to buy growth for free. The only way to do this is by having a different view of a business than other investors. This often means finding companies whose future will be different than their past. Stock screens look backward and assume that the past is a good predictor of the future.

Anyone familiar with EdgePoint knows what we look for in businesses – strong competitive positions, barriers to entry and long-term growth prospects run by competent management teams. But this isn't enough. If you want to buy growth for free, you need to have an idea about a business that isn't widely understood.

Over the years we've developed a set of unconventional patterns that can result in great businesses being mispriced. Investors avoid uncertainty – they don't like to defer gratification, they prefer the conventional and would rather own companies that are already great instead of ones that are on a journey to get better.

Seeing these patterns isn't always easy, but that usually means other people miss them too. By continually applying our investment approach, we believe we can keep buying businesses at prices below what they're worth to help investors get to their Point B.

Over the past 30 years, interest rates have done nothing but decline, with the Government of Canada 10-year bond yield declining from 10.3% on December 31, 1990, to 1.4% on December 31, 2021. This has been a massive tailwind to returns. But yields available today don't lie – return prospects going forward are dismal. At the same time, numerous risks are creeping into fixed-income portfolios. As measured by duration, bond prices are more susceptible to an increase in interest rates than ever before. The

average Canadian fixed income bond fund today has a duration of 8.1 years, exposing their investors to a large amount of interest rate risk. In 2021, the Government of Canada 10-year bond rate increased by 0.75%. This tiny rise in interest rates led to the worst bond market performance since 1994.

The fixed income portion of our balanced portfolios remain attractive from a risk-to-return perspective. We continue to maintain a duration of about 2.1 years, much different than the average Canadian fixed income bond fund. At EdgePoint, we continue to minimize the effects of rising interest rates and inflation by buying shorter-term bonds and focus on mispricing in the corporate bond markets.

COVID-19 pandemic

In the second year since the start of the COVID-19 pandemic, uncertainty and volatility relating to the pandemic remain a constant in the market. As in past periods of volatility and uncertainty, the team continued to live in a narrow emotional band and adhered to their investment approach. Our Investment team was very active, taking advantage of compelling opportunities amid extreme market volatility. They continued focusing on the long term by looking for businesses that could thrive beyond the current challenged environment, but where these opportunities weren't recognized by the market and reflected in the price. Although there still may be uncertainty about the future impact of the pandemic on our businesses in the short term, we believe the Fund is well positioned today to deliver pleasing long-term investment performance.

Partnering with like-minded investors who understand our approach meant that there were no liquidity concerns with the Fund's operations, even during the most volatile periods.

The COVID-19 pandemic did not impact our financial reporting environment, nor did it significantly affect any judgment and measurement uncertainty with the Fund.

Related parties**Manager**

The Fund is managed by EdgePoint Wealth Management Inc. ("EdgePoint"). As Manager, EdgePoint provides (or arranges for) investment management, distribution, marketing and promotion of the Fund. As compensation for providing these services, EdgePoint receives a monthly management fee based on the daily average NAV of each series of the Fund (see *Management fees*).

EdgePoint is also responsible for the Fund's day-to-day operation. EdgePoint will often incur, on behalf of the Fund, costs associated with the Fund's operations including, but not limited to, legal fees, custodian and safekeeping fees, audit fees, administrative and operating costs, including commissions, brokerage fees, trustee fees, taxes, registrar and transfer agency fees, unitholder servicing costs, the costs of preparing and distributing annual and semi-annual reports, prospectuses, statements and investor communications, regulatory filing fees, fees and expenses payable in connection with the Independent Review Committee ("IRC"), interest and other general operating expenses that could include allocated salaries, overhead and other costs directly related to the Fund's operations. These services are in the normal course of operations and are charged at the rate agreed to by the parties. EdgePoint is entitled to be reimbursed by the Fund for these operating costs.

The management fees payable by Series I unitholders are negotiated and paid directly by them. Operating expenses for Series I unitholders are EdgePoint's responsibility and are not charged to the Fund.

Investment Advisor

EdgePoint Investment Group Inc. ("Investment Advisor") is the Fund's portfolio advisor. The Investment Advisor is entitled to be reimbursed by EdgePoint for certain operating expenses associated with its advisory services, which are paid by EdgePoint with the fees received as Manager. The Fund is not separately charged for the services of the Investment Advisor.

Independent Review Committee

EdgePoint has appointed an Independent Review Committee ("IRC") consisting of three independent members and established under the Canadian Securities Administrators' National Instrument 81-107. The IRC's mandate is to review and provide input on EdgePoint's written policies and procedures that pertain to conflict of interest matters with respect to EdgePoint-managed funds, including EdgePoint affiliates. Additional information about the IRC is available in the Simplified Prospectus and Annual Information Form for the Fund. IRC members receive fees and reimbursement of expenses for services provided to the Fund.

Other

EdgePoint provided start-up investment capital to the Fund and sufficient initial capital to each of its series to permit them to be valued on a daily basis. EdgePoint's investment in the Fund is recorded at the NAV per unit of each series, as applicable. From time to time, EdgePoint may provide the initial capital required on the introduction of a new series to the Fund. During the year ended December 31, 2021, the Fund launched 4 new series: Series AT4, Series A(N)T4, Series FT4 and Series F(N)T4.

Financial highlights

The following tables show selected key financial information about the Fund and are intended to help you understand the Fund's financial performance for the year ended December 31, 2021 and the years ended December 31, 2020, 2019, 2018 and 2017. This information is derived from the Fund's Financial Statements.

	Dec 31, 2021		Dec 31, 2020		Series A Dec 31, 2019		Dec 31, 2018		Dec 31, 2017

Net asset value per unit	\$	25.08	\$	20.84	\$	21.05	\$	19.15	\$	22.20

Notes

1. Net assets per unit is calculated as follows

(a) The financial information for 2017-2021 is derived from the Fund's audited annual financial statements.

(b) Net assets per unit of a series is based on the number of units outstanding for that series at the relevant time. The increase (decrease) from operations per unit of a series is based on the weighted-average number of units outstanding for that series during the year. Therefore, the beginning of year net assets plus the increase (decrease) from operations will not sum to the end of year net assets.

(c) Distributions per unit of a series are based on the number of units outstanding for the series on the record dates for distributions. Distributions were both paid in cash and reinvested in additional units at the option of the unitholder.

2. The financial information presented in the *Ratios and supplemental data* table is derived from the Fund's pricing NAVs and is provided as at December 31, 2021, December 31, 2020, December 31, 2019, December 31, 2018, and December 31, 2017.

3. The management expense ratio ("MER") is calculated as the total management fees and operating expenses paid by each series of the Fund, including applicable taxes and interest and excluding commissions and other portfolio transaction costs, as a percentage of the average, daily NAV of each series of the Fund on an annualized basis. Any management fee distributions paid by a series of the Fund that effectively reduced management fees payable by some unitholders are not deducted from expenses to determine the overall MER of that series. The Manager, at its sole discretion, waives management fees or absorbs expenses. Such waivers and absorption can be terminated at any time. Fund MERs are shown both with and without the waiver and absorptions.

Notes

- Net assets per unit is calculated as follows
 - The financial information for 2017-2021 is derived from the Fund's audited annual financial statements.
 - Net assets per unit of a series is based on the number of units outstanding for that series at the relevant time. The increase (decrease) from operations per unit of a series is based on the weighted-average number of units outstanding for that series during the year. Therefore, the beginning of year net assets plus the increase (decrease) from operations will not sum to the end of year net assets.
 - Distributions per unit of a series are based on the number of units outstanding for the series on the record dates for distributions. Distributions were both paid in cash and reinvested in additional units at the option of the unitholder.
- The financial information presented in the *Ratios and supplemental data* table is derived from the Fund's pricing NAVs and is provided as at December 31, 2021, December 31, 2020, December 31, 2019, December 31, 2018, and December 31, 2017.
- The management expense ratio ("MER") is calculated as the total management fees and operating expenses paid by each series of the Fund, including applicable taxes and interest and excluding commissions and other portfolio transaction costs, as a percentage of the average, daily NAV of each series of the Fund on an annualized basis. Any management fee distributions paid by a series of the Fund that effectively reduced management fees payable by some unitholders are not deducted from expenses to determine the overall MER of that series. The Manager, at its sole discretion, waives management fees or absorbs expenses. Such waivers and absorption can be terminated at any time. Fund MERs are shown both with and without the waiver and absorptions.
- Beginning of operations for the series was November 2, 2021.

Notes

1. Net assets per unit is calculated as follows

(a) The financial information for 2017-2021 is derived from the Fund's audited annual financial statements.

(b) Net assets per unit of a series is based on the number of units outstanding for that series at the relevant time. The increase (decrease) from operations per unit of a series is based on the weighted-average number of units outstanding for that series during the year. Therefore, the beginning of year net assets plus the increase (decrease) from operations will not sum to the end of year net assets.

(c) Distributions per unit of a series are based on the number of units outstanding for the series on the record dates for distributions. Distributions were both paid in cash and reinvested in additional units at the option of the unitholder.

2. The financial information presented in the *Ratios and supplemental data* table is derived from the Fund's pricing NAVs and is provided as at December 31, 2021, December 31, 2020, December 31, 2019, December 31, 2018, and December 31, 2017.

3. The management expense ratio ("MER") is calculated as the total management fees and operating expenses paid by each series of the Fund, including applicable taxes and interest and excluding commissions and other portfolio transaction costs, as a percentage of the average, daily NAV of each series of the Fund on an annualized basis. Any management fee distributions paid by a series of the Fund that effectively reduced management fees payable by some unitholders are not deducted from expenses to determine the overall MER of that series. The Manager, at its sole discretion, waives management fees or absorbs expenses. Such waivers and absorption can be terminated at any time. Fund MERs are shown both with and without the waiver and absorptions.

4. The Series was closed on December 29, 2021 and all assets were switched to Series A.

Fund MERs are shown both with and without the waiver and absorptions.
- Beginning of operations for the series was November 2, 2021.

Financial highlights (continued)

	Dec 31, 2021		Dec 31, 2020		Series I Dec 31, 2019		Dec 31, 2018		Dec 31, 2017	
Fund's net assets per unit (Note 1)										
Net assets, beginning of year	\$	21.28	\$	21.52	\$	19.57	\$	22.69	\$	21.47
Increase (decrease) from operations:										
Total revenue	\$	0.54	\$	0.58	\$	0.62	\$	0.62	\$	0.56
Total expenses		(0.02)		(0.02)		(0.02)		(0.02)		(0.02)
Realized gains (losses) for the year		1.70		0.18		1.40		1.00		0.86
Unrealized gains (losses) for the year		3.63		0.26		1.96		(3.58)		0.69
Total increase (decrease) from operations	\$	5.85	\$	1.00	\$	3.96	\$	(1.98)	\$	2.09
Distributions to unitholders:										
From income (excluding dividends)	\$	–	\$	(0.07)	\$	(0.03)	\$	(0.09)	\$	–
From dividends		(0.45)		(0.52)		(0.58)		(0.51)		(0.51)
From capital gains		(1.24)		(0.02)		(1.17)		(0.62)		(0.45)
Total distributions to unitholders	\$	(1.69)	\$	(0.61)	\$	(1.78)	\$	(1.22)	\$	(0.96)
Net assets, end of year	\$	25.53	\$	21.28	\$	21.52	\$	19.57	\$	22.69
Ratios and supplemental data (Note 2)										
Total net asset value ('000s)	\$	47,509	\$	27,715	\$	23,070	\$	28,718	\$	28,387
Number of units outstanding ('000s)		1,861		1,303		1,072		1,467		1,251
Management expense ratio (Note 3)		–%		–%		–%		–%		–
Management expense ratio before waivers or absorptions		–%		–%		–%		–%		–
Net asset value per unit	\$	25.53	\$	21.28	\$	21.52	\$	19.57	\$	22.69

Notes

1. Net assets per unit is calculated as follows

(a) The financial information for 2017-2021 is derived from the Fund's audited annual financial statements.

(b) Net assets per unit of a series is based on the number of units outstanding for that series at the relevant time. The increase (decrease) from operations per unit of a series is based on the weighted-average number of units outstanding for that series during the year. Therefore, the beginning of year net assets plus the increase (decrease) from operations will not sum to the end of year net assets.

(c) Distributions per unit of a series are based on the number of units outstanding for the series on the record dates for distributions. Distributions were both paid in cash and reinvested in additional units at the option of the unitholder.

2. The financial information presented in the *Ratios and supplemental data* table is derived from the Fund's pricing NAVs and is provided as at December 31, 2021, December 31, 2020, December 31, 2019, December 31, 2018, and December 31, 2017.

3. The management expense ratio ("MER") is calculated as the total management fees and operating expenses paid by each series of the Fund, including applicable taxes and interest and excluding commissions and other portfolio transaction costs, as a percentage of the average, daily NAV of each series of the Fund on an annualized basis. Any management fee distributions paid by a series of the Fund that effectively reduced management fees payable by some unitholders are not deducted from expenses to determine the overall MER of that series. The Manager, at its sole discretion, waives management fees or absorbs expenses. Such waivers and absorption can be terminated at any time. Fund MERs are shown both with and without the waiver and absorptions.

Financial highlights (continued)**Fund level ratios**

	Dec. 31, 2021	Dec. 31, 2020	Dec. 31, 2019	Dec. 31, 2018	Dec. 31, 2017
Trading expense ratio (Note 4)	0.05%	0.07%	0.04%	0.06%	0.05%
Portfolio turnover rate (Note 5)	39.17%	43.89%	37.52%	34.80%	22.03%

Notes

- The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of the Fund's daily average NAV. The trading expense ratio is calculated at the fund level and applies to all series of the Fund.
- Portfolio turnover rate is calculated at the fund level based on the lesser of purchases or proceeds of sales of securities for the year, excluding cash, short term notes and bonds having maturity dates at acquisition of one year or less, divided by the average value of the portfolio securities for the year. The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year. The higher a fund's portfolio turnover rate in a year, the greater the trading costs payable by the fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and fund performance.

Management fees

As compensation for the services provided, EdgePoint, the Manager of the Fund, receives a monthly management fee based on the daily average NAV of Series A, Series A(N), Series AT4, Series A(N)T4, Series F, Series F(N), Series FT4 and Series F(N)T4. Management fees for Series I are negotiated and paid directly by unitholders and not by the Fund.

For the year ended December 31, 2021, a summary of services received in consideration of the management fees as a percentage of those fees is as follows:

	Absorbed expenses	Distribution costs	Portfolio advisor and other fees*
Series A, Series A(N), Series AT4 and Series A(N)T4	0%	59%	41%
Series F, Series F(N), Series FT4 and Series F(N)T4	0%	0%	100%
Series I	n/a	n/a	n/a

*Portfolio advisor and other fees include investment advisory and portfolio management services, which comprises investment selection, analysis and monitoring, including business travel to corporate head offices; other associated due diligence costs; portfolio construction and risk management; broker analysis, selection and monitoring; trading expertise as well as costs associated with managing the business and profits.

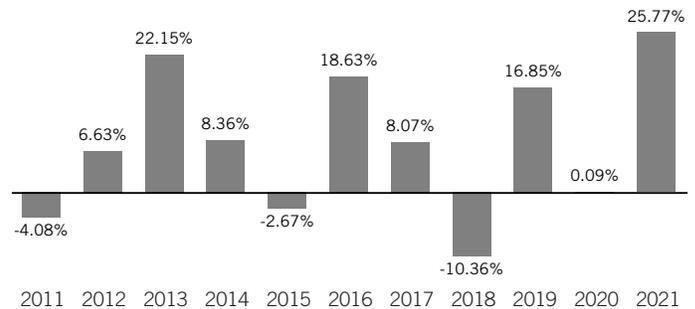

Past performance

This section shows the Fund’s past performance. Past performance includes changes in security value and assumes the reinvestment of all distributions (if any). It does not take into account sales, redemption, distribution or optional charges, or income taxes payable by any investor, which would have reduced returns. It is important to note that the past performance is not an indication of how the Fund will perform in the future.

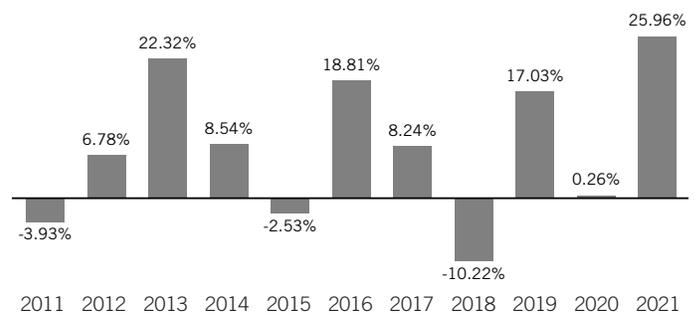

Year-by-year returns

The following graphs illustrate the Fund’s performance for each of the periods highlighted, including changes from period to period. They indicate, on a percentage basis, how much an investment would have made or lost had you invested on the first day of each financial period and held that investment until the last day of each financial period, as applicable. The differing performance between series of units is due largely to varying expenses charged to each series as explained in the Prospectus and the Financial Statements.

Series A(N) Non-HST

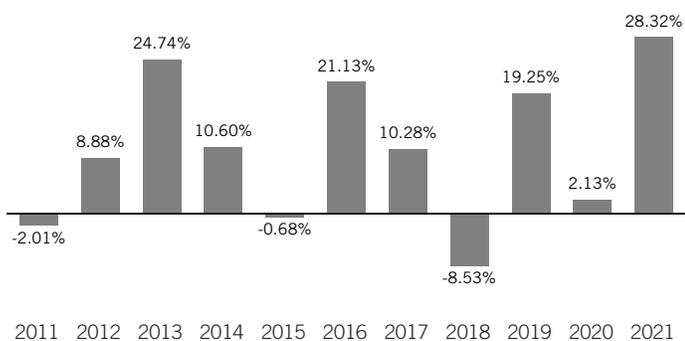

Series F

Series F(N) Non-HST

Series I

Benchmark

The Fund uses a blended index made up of a 60% weighting in the S&P/TSX Composite Index and a 40% weighting in the ICE BofA Canada Broad Market Index as a broad-based benchmark for long-term performance comparisons.

The S&P/TSX Composite Index is a market-capitalization-weighted index comprising the largest and most widely held stocks traded on the Toronto Stock Exchange. The ICE BofA Canada Broad Market Index, tracks the performance of publicly traded investment-grade debt denominated in Canadian dollars and issued in the Canadian domestic market.

While the Fund uses these indexes for long-term performance comparisons, it is not managed relative to the composition of the indexes. There are differences which include security holdings, geographic and sector allocation which impact comparability. Additional factors such as credit quality, issuer type and yield may impact fixed-income comparability. As a result, the Fund may experience periods when its performance differs materially from the indexes. Please see the *Results of operations* section for a discussion of recent performance results.

Annual compound returns

The following table compares the Fund's annual compound returns for all Series of the Fund against the returns of the Indices noted above for the periods shown, all ended December 31, 2021.

Portfolio	1-year	3-year	5-year	10-year	Since inception*
EdgePoint Canadian Growth & Income Portfolio - Series A	25.77%	13.72%	7.34%	8.79%	10.30%
EdgePoint Canadian Growth & Income Portfolio - Series F	27.21%	15.04%	8.58%	10.05%	11.63%
EdgePoint Canadian Growth & Income Portfolio - Series I	28.32%	16.04%	9.53%	11.03%	12.71%
<i>60% S&P TSX Composite Index/40% ICE BofA Canada Broad Market Index</i>	13.31%	12.33%	7.52%	6.92%	8.07%
EdgePoint Canadian Growth & Income Portfolio - Series A(N) Non-HST	25.96%	13.90%	7.51%	8.95%	8.34%
EdgePoint Canadian Growth & Income Portfolio - Series F(N) Non-HST	27.30%	15.12%	8.66%	10.12%	9.50%
<i>60% S&P TSX Composite Index/40% ICE BofA Canada Broad Market Index</i>	13.31%	12.33%	7.52%	6.92%	6.79%
EdgePoint Canadian Growth & Income Portfolio - Series AT4					2.01%
EdgePoint Canadian Growth & Income Portfolio - Series A(N)T4					2.03%
EdgePoint Canadian Growth & Income Portfolio - Series FT4					2.20%
EdgePoint Canadian Growth & Income Portfolio - Series F(N)T4					2.21%
<i>60% S&P TSX Composite Index/40% ICE BofA Canada Broad Market Index</i>					1.51%

* Since inception returns for fund series with less than 1 year of history are cumulative, not annualized. All Series' inception date was November 17, 2008, except for Series A(N) and Series F(N), which was August 3, 2010 and Series A(N)T4, Series AT4, Series F(N)T4 and Series FT4, which was November 2, 2021.
