## **EdgePoint Canadian Portfolio**

### **Semi-Annual Management Report of Fund Performance**

*For the period ended June 30, 2025*

---

This semi-annual Management Report of Fund Performance (“MRFP”) contains financial highlights, but not the Fund’s semi-annual Financial Statements, which may be included at the back of the MRFP. You can obtain a free copy of the semi-annual or annual Financial Statements by calling 1.866.757.7207, writing to EdgePoint Wealth Management Inc., 150 Bloor St. W., Suite 700, Toronto, ON, M5S 2X9, or visiting our website at [www.edgepointwealth.com](http://www.edgepointwealth.com) or the SEDAR+ website at [www.sedarplus.ca](http://www.sedarplus.ca).

Likewise, unitholders can obtain copies of the Fund’s proxy voting policies and procedures, proxy voting disclosure records and Fund-related quarterly portfolio disclosures.

Please refer to the Fund’s Simplified Prospectus, Fund Facts and the 2024 audited annual Financial Statements for more information. For the Fund’s current and historical net asset values per unit, please visit [www.edgepointwealth.com](http://www.edgepointwealth.com).

## **CAUTION REGARDING FORWARD-LOOKING STATEMENTS**

This report may contain forward-looking statements about the Fund, including its strategy, expected performance and condition. Forward-looking statements include statements that are predictive in nature, that depend upon or refer to future events or conditions, or that include words such as “expects,” “anticipates,” “intends,” “plans,” “believes,” “estimates,” or negative versions thereof and similar expressions.

In addition, any statement that may be made concerning future performance, strategies or prospects, and possible future fund action, is also a forward-looking statement. Forward-looking statements are based on current expectations and projections about future events and are inherently subject to, among other things, risks, uncertainties and assumptions about the Fund and economic factors.

Forward-looking statements are not guarantees of future performance, and actual events and results could differ materially from those expressed or implied in any forward-looking statements made by the Fund. Any number of important factors could contribute to these differences, including, but not limited to, general economic, political and market factors, interest and foreign exchange rates, global equity and capital markets, business competition, technological change, changes in government regulations, unexpected judicial or regulatory proceedings, and catastrophic events.

We stress that the abovementioned list of important factors is not exhaustive. We encourage you to consider these and other factors carefully before making any investment decisions and urge you to avoid placing undue reliance on forward-looking statements. Further, you should be aware of the fact that the Fund has no specific intention of updating any forward-looking statements whether as a result of new information, future events or otherwise, prior to the release of the next Management Report of Fund Performance.

---

**Management discussion of fund performance**

The management discussion of fund performance presents the views of the portfolio management team concerning significant factors and developments that have affected the Fund's performance and outlook.

Please read the aforementioned caution on the preceding page regarding forward-looking statements.

**Results from Operations****Investment performance**

For the six-month period ended June 30, 2025, EdgePoint Canadian Portfolio, Series A increased 7.7% versus an increase of 10.2% (C\$) for its benchmark, the S&P/TSX Composite Index.

We manage the Fund independently of the index we use for long-term performance comparisons. Differences including security holdings and geographic/sector allocations may impact comparability and could result in periods when our performance differs materially from the index. During the period, the Fund's underperformance relative to the index was primarily attributable to security selection in the Energy and Information Technology sectors. Within Energy, CES Energy Solutions weighed on relative performance as the stock delivered a total return of -32.4%. Within Information Technology, Dye & Durham Ltd., an off-benchmark name, had a challenging start to the year, returning -45.2%. However, Financials provided a partial offset to these declines. In particular, the Fund's significant overweight in Fairfax Financial Holdings contributed 1.3% to relative performance, attributable to its 24.2% return and outperforming many of Canada's major banks.

Please refer to the *Past performance* section for the performance of other series, which differ from Series A due largely to varying expenses and/or taxes incurred by each series, as explained in the Prospectus.

Meaningful contributors to investment results included:

- Fairfax Financial Holdings Ltd.
- OR Royalties Inc.
- Topicus.com, subordinate voting

As a group, these companies contributed approximately 6.4% to overall performance in the last six months.

Meaningful detractors from investment results included:

- Dye & Durham Ltd.
- CES Energy Solutions Corp.
- Computer Modelling Group

As a group, these companies detracted approximately 3.5% from overall performance in the last six months.

While we provide these results to fulfill the disclosure requirements of this report, we measure investment success over periods of 10 years or more and believe it takes considerable skill to consistently add value over the long term. We don't believe any meaningful conclusions can be drawn based on such a short period.

**Portfolio transactions**

During the period, the Fund net purchased \$103.6 million worth of investments. Portfolio turnover was 14.0% for the six months ended June 30, 2025 compared to 21.8% for the year ended December 31, 2024.

*Businesses purchased*

Examples of companies added to the Fund include:

- Canadian Pacific Kansas City Ltd. – Canadian railway company operating in Canada, the U.S. and Mexico
- Parkland Corp. – Canadian operator of retail gas stations and fuel distributors
- Canadian Natural Resources Ltd. – Canadian oil and natural gas producer

*Businesses sold*

We generally sell a stake in a business for one of two reasons. First, if our thesis about the business is deemed no longer valid. Second, there is a constant culling process whereby we continuously strive to upgrade the quality of the Fund with better ideas.

During the six-month period, examples of businesses sold include:

- Qualcomm Technologies Inc.
- Lincoln Electric Holdings, Inc.
- Barrick Mining Corp.

**Portfolio composition***Sector exposure*

Overall sector exposure shifted primarily as a result of investment decisions and changes in stock prices. The most significant change was an increase of approximately 2.4% in the Fund's Industrials sector investments and a decrease of 1.9% in the Information Technology sector investments. The increase in the Fund's Industrials exposure was mainly due to the purchase of Canadian Pacific Kansas City Ltd. and increased position in ATS Corp. Additionally, the decrease in the Fund's Information Technology sector exposure was primarily from a price decline in Dye & Durham Ltd. and the exited position in Qualcomm Technologies Inc. The Fund's cash position decreased from 2.8% at the end of 2024 to 1.6% as at June 30, 2025.

Portfolio transactions are a result of our "bottom-up" stock selection process. We don't construct the Fund with an index or benchmark in mind. As a result, the Fund's composition is typically very different from its benchmark index. Our approach to portfolio construction focuses on the quality of the constituent businesses and minimizing the possibility of permanent loss of capital. Although we keep macro-level market issues in mind, they aren't a primary driver in our investment process.

**Income, fees and expenses**

The management expense ratio ("MER") has not changed significantly for all series of units of the Fund. We continue to focus

on maintaining low operating expenses. Our goal as it relates to MERs has always been to be among the lowest-cost active managers in our distribution channel. Please refer to the Financial highlights section for more information about MERs for all series of units.

The overall changes to income, operating expenses, and net assets attributable to unitholders of redeemable units over the prior period is a result of change in Fund size and the overall composition of businesses in the Fund

### ***Unitholder activity***

During the period ended June 30, 2025, the Fund's net assets attributable to unitholders of redeemable units ("NAV") increased to \$4.4 billion from \$4.0 billion as at December 31, 2024. Of this increase, \$336.3 million is a gain attributed to operations and \$37.6 million in net inflows to the Fund.

### **Recent developments**

Domestic conditions over the period reflected a mix of slowing economic growth, persistent core inflation, and the Bank of Canada's decision to lower its policy rate from 3.25% in December to 2.75% by March. The move offered some relief to borrowers but came against a backdrop of lingering uncertainty. In April, the announcement of higher U.S. tariffs, including the doubling of steel and aluminum duties, pressured sentiment and introduced fresh challenges for export-oriented sectors. The S&P/TSX Composite Index declined in early April before staging a strong rebound into June, helped by renewed strength in the materials and financials sectors.

Through it all, we stayed anchored to our time-tested investment approach. Rather than reacting to short-term headlines, we focused on investing in businesses with durable competitive advantages, strong balance sheets and the flexibility to adapt in uncertain environments.

Volatility is often where opportunity hides, and this period was no different. It allowed us to initiate positions in 5 new businesses and exit 6 others, sharpening the portfolio's focus on businesses we believe can compound wealth for our investors over the long term.

### **Related parties**

#### ***Manager***

The Fund is managed by EdgePoint Wealth Management Inc. ("EdgePoint"). As Manager, EdgePoint provides (or arranges for) investment management, distribution, marketing and promotion of the Fund. As compensation for providing these services, EdgePoint receives a monthly management fee based on the daily average NAV of each series of the Fund (see Management fees).

EdgePoint is also responsible for the Fund's day-to-day operation. EdgePoint will often incur, on behalf of the Fund, costs associated with the Fund's operations including, but not limited to, legal fees, custodian and safekeeping fees, audit fees, administrative and operating costs, including commissions, brokerage fees, trustee fees, taxes, registrar and transfer agency fees, unitholder servicing costs, the costs of preparing and distributing annual and semi-annual

reports, prospectuses, statements and investor communications, regulatory filing fees, fees and expenses payable in connection with the Independent Review Committee ("IRC"), interest and other general operating expenses that could include allocated salaries, overhead and other costs directly related to the Fund's operations. These services are in the normal course of operations and are charged at the rate agreed to by the parties. EdgePoint is entitled to be reimbursed by the Fund for these operating costs.

The management fees payable by Series I unitholders are negotiated and paid directly by them. Operating expenses for Series I unitholders are EdgePoint's responsibility and are not charged to the Fund.

### ***Investment Advisor***

EdgePoint Investment Group Inc. ("Investment Advisor") is the Fund's portfolio advisor. The Investment Advisor is entitled to be reimbursed by EdgePoint for certain operating expenses associated with its advisory services, which are paid by EdgePoint with the fees received as Manager. The Fund is not separately charged for the services of the Investment Advisor.

### ***Independent Review Committee***

EdgePoint has appointed an Independent Review Committee ("IRC") consisting of three independent members and established under the Canadian Securities Administrators' National Instrument 81-107. The IRC's mandate is to review and provide input on EdgePoint's written policies and procedures that pertain to conflict of interest matters with respect to EdgePoint-managed funds, including EdgePoint affiliates. Additional information about the IRC is available in the Simplified Prospectus and Annual Information Form for the Fund. IRC members receive fees and reimbursement of expenses for services provided to the Fund.

**Financial highlights**

The following tables show selected key financial information about the Fund and are intended to help you understand the Fund's financial performance for the period ended June 30, 2025 and the years ended December 31, 2024, 2023, 2022, 2021 and 2020. This information is derived from the Fund's Financial Statements.

Net asset value per unit	\$ 57.74	\$ 53.60	\$ 43.76	\$ 37.89	\$ 36.71	\$ 26.31	

**Notes**

1. Net assets per unit is calculated as follows:

(a) The financial information for 2020-2024 is derived from the Fund's audited annual financial statements.

(b) Net assets per unit of a series is based on the number of units outstanding for that series at the relevant time. The increase (decrease) from operations per unit of a series is based on the weighted-average number of units outstanding for that series during the period. Therefore, the beginning of year net assets plus the increase (decrease) from operations will not sum to the end of period net assets.

(c) Distributions per unit of a series are based on the number of units outstanding for the series on the record dates for distributions. Distributions were both paid in cash and reinvested in additional units at the option of the unitholder.

2. The financial information presented in the Ratios and supplemental data table is derived from the Fund's pricing NAVs and is provided as at June 30, 2025, December 31, 2024, December 31, 2023, December 31, 2022, December 31, 2021, and December 31, 2020.

3. The management expense ratio ("MER") is calculated as the total management fees and operating expenses paid by each series of the Fund, including applicable taxes and interest and excluding commissions and other portfolio transaction costs, as a percentage of the average, daily NAV of each series of the Fund on an annualized basis. Any management fee distributions paid by a series of the Fund that effectively reduced management fees payable by some unitholders are not deducted from expenses to determine the overall MER of that series. The Manager, at its sole discretion, waives management fees or absorb expenses. Such waivers and absorption can be terminated at any time. Fund MERs are shown both with and without the waiver and absorptions.

**Notes**

1. Net assets per unit is calculated as follows:

(a) The financial information for 2020-2024 is derived from the Fund's audited annual financial statements.

(b) Net assets per unit of a series is based on the number of units outstanding for that series at the relevant time. The increase (decrease) from operations per unit of a series is based on the weighted-average number of units outstanding for that series during the period. Therefore, the beginning of year net assets plus the increase (decrease) from operations will not sum to the end of period net assets.

(c) Distributions per unit of a series are based on the number of units outstanding for the series on the record dates for distributions. Distributions were both paid in cash and reinvested in additional units at the option of the unitholder.

2. The financial information presented in the Ratios and supplemental data table is derived from the Fund's pricing NAVs and is provided as at June 30, 2025, December 31, 2024, December 31, 2023, December 31, 2022, December 31, 2021, and December 31, 2020.

3. The management expense ratio ("MER") is calculated as the total management fees and operating expenses paid by each series of the Fund, including applicable taxes and interest and excluding commissions and other portfolio transaction costs, as a percentage of the average, daily NAV of each series of the Fund on an annualized basis. Any management fee distributions paid by a series of the Fund that effectively reduced management fees payable by some unitholders are not deducted from expenses to determine the overall MER of that series. The Manager, at its sole discretion, waives management fees or absorb expenses. Such waivers and absorption can be terminated at any time. Fund MERs are shown both with and without the waiver and absorptions.

**Notes**

1. Net assets per unit is calculated as follows:

(a) The financial information for 2020-2024 is derived from the Fund's audited annual financial statements.

(b) Net assets per unit of a series is based on the number of units outstanding for that series at the relevant time. The increase (decrease) from operations per unit of a series is based on the weighted-average number of units outstanding for that series during the period. Therefore, the beginning of year net assets plus the increase (decrease) from operations will not sum to the end of period net assets.

(c) Distributions per unit of a series are based on the number of units outstanding for the series on the record dates for distributions. Distributions were both paid in cash and reinvested in additional units at the option of the unitholder.

2. The financial information presented in the Ratios and supplemental data table is derived from the Fund's pricing NAVs and is provided as at June 30, 2025, December 31, 2024, December 31, 2023, December 31, 2022, December 31, 2021, and December 31, 2020.

3. The management expense ratio ("MER") is calculated as the total management fees and operating expenses paid by each series of the Fund, including applicable taxes and interest and excluding commissions and other portfolio transaction costs, as a percentage of the average, daily NAV of each series of the Fund on an annualized basis. Any management fee distributions paid by a series of the Fund that effectively reduced management fees payable by some unitholders are not deducted from expenses to determine the overall MER of that series. The Manager, at its sole discretion, waives management fees or absorb expenses. Such waivers and absorption can be terminated at any time. Fund MERs are shown both with and without the waiver and absorptions.

<b>Ratios and supplemental data (Note 2)</b>			
Total net asset value ('000s)	\$ 140	\$ 3	
Number of units outstanding ('000s)	13	0	
Management expense ratio (Note 3)	0.95%	1.00%	
Management expense ratio before waivers or absorptions	0.95%	1.00%	
Net asset value per unit	\$ 10.43	\$ 9.62	

**Notes**

1. Net assets per unit is calculated as follows:

(a) The financial information for 2024 is derived from the Fund's audited annual financial statements.

(b) Net assets per unit of a series is based on the number of units outstanding for that series at the relevant time. The increase (decrease) from operations per unit of a series is based on the weighted-average number of units outstanding for that series during the period. Therefore, the beginning of year net assets plus the increase (decrease) from operations will not sum to the end of period net assets.

(c) Distributions per unit of a series are based on the number of units outstanding for the series on the record dates for distributions. Distributions were both paid in cash and reinvested in additional units at the option of the unitholder.

2. The financial information presented in the Ratios and supplemental data table is derived from the Fund's pricing NAVs and is provided as at June 30, 2025, and December 31, 2024.

3. The management expense ratio ("MER") is calculated as the total management fees and operating expenses paid by each series of the Fund, including applicable taxes and interest and excluding commissions and other portfolio transaction costs, as a percentage of the average, daily NAV of each series of the Fund on an annualized basis. Any management fee distributions paid by a series of the Fund that effectively reduced management fees payable by some unitholders are not deducted from expenses to determine the overall MER of that series. The Manager, at its sole discretion, waives management fees or absorbs expenses. Such waivers and absorption can be terminated at any time. Fund MERs are shown both with and without the waiver and absorptions.

Financial highlights (continued)

Fund level ratios	Jun 30, 2025	Dec 31, 2024	Dec 31, 2023	Dec 31, 2022	Dec 31, 2021	Dec 31, 2020
Trading expense ratio (Note 4)~	0.07%	0.06%	0.07%	0.04%	0.06%	0.09%
Portfolio turnover rate (Note 5)	13.97%	21.79%	27.57%	29.30%	29.22%	36.22%

~Annualized

Notes

4. The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of the Fund's daily average NAV. The trading expense ratio is calculated at the fund level and applies to all series of the Fund.
5. Portfolio turnover rate is calculated at the fund level based on the lesser of purchases or proceeds of sales of securities for the period, excluding cash, short term notes and bonds having maturity dates at acquisition of one year or less, divided by the average value of the portfolio securities for the period. The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the period. The higher a fund's portfolio turnover rate in a period, the greater the trading costs payable by the fund in the period, and the greater the chance of an investor receiving taxable capital gains in the period. There is not necessarily a relationship between a high turnover rate and fund performance.

## Management fees

As compensation for the services provided, EdgePoint, the Manager of the Fund, receives a monthly management fee based on the daily average NAV of Series A, Series A(N), Series AT6, Series A(N)T6, Series F, Series F(N), Series FT6, Series F(N)T6 and Series U. Management fees for Series I and Series IT8 are negotiated and paid directly by unitholders and not by the Fund.

For the period ended June 30, 2025, a summary of services received in consideration of the management fees as a percentage of those fees is as follows:

	Absorbed expenses	Distribution costs	Portfolio advisor and other fees*
Series A, Series A(N), Series A(N)T6 and Series AT6	0%	56%	44%
Series F, Series F(N), Series F(N)T6, Series FT6 and Series U	0%	0%	100%
Series I and Series IT8	n/a	n/a	n/a

\*Portfolio advisor and other fees include investment advisory and portfolio management services, which comprises investment selection, analysis and monitoring, including business travel to corporate head offices; other associated due diligence costs; portfolio construction and risk management; broker analysis, selection and monitoring; trading expertise as well as costs associated with managing the business and profits.

## Past performance

This section shows the Fund's past performance. Past performance includes changes in security value and assumes the reinvestment of all distributions (if any). It does not take into account sales, redemption, distribution or optional charges, or income taxes payable by any investor, which would have reduced returns. It is important to note that past performance is not an indication of how the Fund will perform in the future.

### Year-by-year returns

The following graphs illustrate the Fund's performance for each of the periods highlighted, including changes from period to period. They indicate, on a percentage basis, how much an investment would have made or lost had you invested on the first day of each financial period and held that investment until the last day of each financial period, as applicable. The differing performance between series of units is due largely to varying expenses charged to each series as explained in the Prospectus and the Financial Statements.
