Deployment
Programme

- **The European ATM Master Plan:**
 - Is the essential connector between SESAR JU and SESAR DM;
 - Provides the framework for close cooperation to ensure a coherent end to end, from R&D to implementation, operation and service, SESAR vision;
- The European ATM Master Plan drives the definition of the Common Projects which then form the scope for SDM planning, monitoring, coordination through the SESAR Deployment Programme

Conclusions

- The European ATM Master Plan is the overarching document for the SESAR
- The edition 2015 comes timely to frame and support SESAR 2020 and the acceleration of SESAR deployment through potential review of the PCP and future Common Projects
