

SESAR Deployment Programme 2025

Annex I ACCs proposed list

2022-122-SESAR Deployment Manager FPA
SGA MOVE/E3/SUB/2022-122/SI2.875834

Deliverable 1.1.1

September 2024

Annex I

This Annex provides information regarding the applicability of Extended AMAN functionality to ACCs associated to and residing within the 180NM horizon of airports mandated to implement Extended AMAN.

The following and first table lists all ACC's, associated to and residing within the 180NM horizon of airports mandated to implement Extended AMAN, that are recommended to not implement extended AMAN operations (section 3.1), based upon the assessment that the extension to those ACCs does not provide performance benefits and considering the provision related to recommendations of horizons of a shorter distance (than 180 NM) in the text of the § 1.1.1 (a) of the Annex of Regulation (EU) n. 2021/116 (CP1).

Supplementary information about the assessment leading to the identification of these ACCs may be found in the 2024 SDP Supporting Material document.

For complementary information, the following and second table lists the other ACCs, associated to and residing within the 180NM horizon of airports mandated to implement Extended AMAN, that are required to implement extended AMAN operations (section **Error! Reference source not found.**).

Note that Extended AMAN operations, upon decision of the respective ANSPs, may be operated in relation to some other ACCs, within the 180 NM horizon and outside of the EU/Norway/Switzerland airspace, and/or beyond the 180 NM horizon. This Annex does not list such ACCs but the SDP monitoring view will provide some level of reporting on those.
