SESAR Deployment - A Brief Introduction

About the SESAR Deployment Manager function

The SESAR Deployment Manager (SDM) function was established by the Article 9 of European Commission Implementing Regulation (EU) N°409/2013. Under the oversight of the European Commission, the SDM function performs the synchronisation and coordination of the deployment of the “Common Projects”.

A Common Project is a Commission Implementing Regulation which mandates the implementation of the most essential operational and technical changes defined in the European ATM Master Plan, endorsed by the Member States of the European Union and their operational stakeholders.

The first Common Project is known as the Pilot Common Project (PCP) and is defined by the Regulation (EU) N°716/2014. The SDM synchronises and coordinates implementation against the SESAR Deployment Programme which is a project view of the Common Projects, organizing their implementation into optimum sequences of activities by all the stakeholders required to implement.

To develop and maintain the SESAR Deployment Programme in close consultation with all the stakeholders is another important task under the SDM function.

The SESAR Deployment Alliance

The SESAR Deployment Alliance is the organization which has been selected by the European Commission to perform the SDM function until at least 31st December 2020.
