

HTSX 400 & 480 VAC

Thermon is pleased to announce the latest advance in thermal technology with the launch of our new 400 & 480 Vac options for our best-in-class HTSX™ self-regulating electric heat tracing product line.

These new high voltage trace heaters are the latest achievement in Thermon's storied history of innovation, as we continue to create exceptional value for our customers by protecting and maintaining their critical assets, regardless of the weather.

www.Thermon.com

Increases Circuit Length up to 110% with over 70% Increase in Voltage Rating

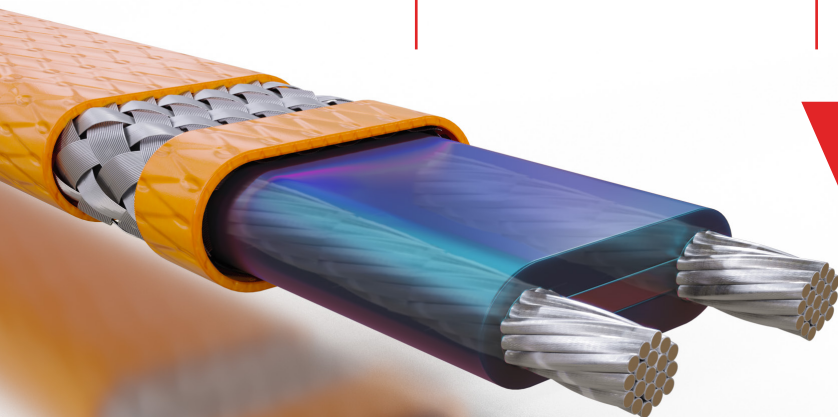

Simplifies Plant Design, Optimizing Installation and Maintenance Costs

Reliable High Performance with Thermon's Unique and Proven Monolithic Co-Extrusion (MCE) Technology

Easier Installation and Enhanced Safety Compared to Other High Voltage Heat Trace Technologies. Features Identical T-Ratings to Lower Voltage HTSX options.

Specify the new high voltage HTSX™ to optimize your critical freeze protection and process maintenance heat tracing systems today!
